- 100% wool terry liner for added protection
- 12" length
- Superior cut resistance gloves are ideal for handling sharp or rough metal objects
- Elasticized wrist for snug fit and enhanced protection

APPLICATIONS

Medium to High-Heat Applications
Foundries
Steel Mills
Glass Handling

Let the Dragon™ fight extreme heat for you! Designed to withstand temperatures as high as 500°F, these gloves will give you the confidence to get the job done with the needed dexterity to perform tasks safely. We've combined several high-performance materials to satisfy requirements for applications in which one is intermittently handling hot steel, glass or other metals.

Kevlar® is the number one material of choice for this type of application. It will not melt on contact with open flame or hot materials. Seamless-knit construction that provides unparalleled dexterity and comfort for workers in some of the most challenging applications.
