

**DUAL DIRECTION FILTER WRENCH**

•Universal, designed to fit most domestic and imported cars and trucks, by simply sizing itself to the filter •Works with a 3/8" drive socket wrench or 7/8" open end wrench

Part No.	Description
703	Fits filters from 2-7/8" to 3-3/16" diameter
704	Fits filters from 3-3/8" to 3-3/4" diameter

**EEE/1613**

**THE BONE**  
Creepers & Creeper Seats

**TAIL BONE CREEPER SEAT**

•5" diameter wheels let the Tail Bone roll effortlessly over air hoses, drop cords, shop clutter, rough surfaces and much more •The base is a uniquely designed tripod, so it's a naturally stable working platform even on uneven surfaces •It turns with the user, so the legs always stay out of the way and let you tuck your feet under you for comfort or convenience •The tripod design also means fewer wheels to have to roll over obstacles •The seat and the base are molded of tough engineering grade polymer that's smooth, impact resistant, impervious to oil, cleaners and common solvents and easy to clean •Seat height: 13-1/2" •350 lb. capacity  
Part No. C503.

**THE BONE CREEPER**

•Called The Bone because its uniquely shaped one-piece molded body resembles a huge dog bone •The creeper's unusual shape allows large, specially designed 5" diameter x 1" wheels, and the rider is 1-3" closer to the ground than all other creepers on the market •Most important to users, the large diameter wheels roll easily over cracked pavement, floor drains, grates, and other obstacles that can stop an ordinary creeper in its tracks •The rib-reinforced body is molded of a state-of-the-art, engineering grade co-polymer to resist the effects of common solvents, so cleaning is quick and easy at the end of the job •The smooth, comfortable one-piece design has no cracks, corners or other pinch points, and the outboard wheel post prevents tipping and flipping •47" L x 25-1/2" W x 6-1/4" H •1-3/4" ground clearance •Weights 18 lbs. •300 lb. capacity  
Part No. C603.

**THE BONE ROUGH RIDER CREEPER**

•The Bone Rough Rider is named because it's designed to go where no other creeper has gone before, outdoors and off the pavement! •The secret of the Rough Rider's unmatched mobility on rough terrain lies in the unique shape of the one-piece molded body, which allows large, specially designed 5-3/8" diameter wheels and still cradles the user closer to the ground than many conventional creepers •The extra wide, high flotation treaded tires don't sink into many soft surfaces and the large diameter wheels roll easily on gravel, dirt, or broken pavement where ordinary creepers get stuck dead in their tracks •Each wheel has a heavy-gauge steel frame with 2-1/2" roller swivel bearings for strength where it counts •The rib-reinforced body is molded of a state-of-the-art, engineering grade co-polymer to resist the effects of common solvents, so cleaning is quick and easy at the end of the job •The smooth, comfortable one-piece design has no cracks, corners or other pinch points, and the outboard wheel pods prevent tipping and flipping •47" L x 25-1/2" W x 7-1/2" H •2-7/8" ground clearance •Weights 20 lbs. •400 lb. capacity.  
Part No. C703.

**THE BONE-STER CREEPER**

The Bone-ster™ is the lighter, more compact sibling of the original Bone™ creeper that revolutionized working under a car. The patented "dog bone" shape cradles the user between the wheels, about 1-1/4" above the ground. This proven design is more durable, more comfortable, less likely to tip over and easier to work on than any other creeper on the market. The unique one-piece body is molded of the same special engineering-grade co-polymer as the original Bone™. It is smooth, comfortable, easy to clean, and resistant to gasoline, oil and almost all other common solvents. The deep, smoothly molded structural ribs add incredible strength and durability without adding bulk and weight, which provides welcome ventilation for those hot muggy days. Two molded in handholds make it easy to carry and easy to secure. The Bone-ster™ is also more comfortable for the big and tall crowd, as the smaller wheel pods allow for less restricted shoulder movement. The wheels are 3" diameter with oil impregnated sintered steel center bearings and a molded in place 7/8" wide tire that resists gas and most common solvents. Using this advanced technology, the tires form a strong molecular bond to the wheels, essentially becoming a strong one-piece wheel. Heavy gauge, cad plated steel caster frames have dual race ADJUSTABLE ball bearing swivels, and each one is through-bolted to the body with four 1/4" diameter bolts that won't ever tear off, strip out or fall apart.

Part No.	Description
C403	Creeper
C403W	Replacement 3" wheels

Specifications	
Length	43"
Width	24"
Height (assembled)	5.25"
Weight	13 lbs.
Capacity	400 lbs.
Ground Clearance	1.25"
Wheel size	3"

**CREEPER WHEELS**

•Replacement wheels only

Part No.	Description
C603W	5" creeper wheel
C703W	5-3/8" creeper wheel

C603W C703W
