#NI3012

Chemstop™

Unsupported Nitrile Gloves

Nitrile gloves offer many benefits. Three times stronger than latex, they offer good puncture resistance in addition to great abrasion and snag resistance, and perform in a wide range of temperatures, from -4° to 149°C (25° - 300°F). They resist oils, fuels, and certain organic solvents, making them a great choice for red meat and poultry processing, chemical processing, machining operations using cutting oil, and battery manufacturing. And they are a great alternative for those with latex allergies.

These unsupported gloves have an embossed finish for a better grip. CFIA approved for food handling.

Available in **15" (#NI3822)** size 10**, 19" (#NI4622)** sizes 7-11.
