

WINTER WALKING

The High-Pro™ Ice Cleat

Model: JD6625

The new High-Pro™ ice cleat is a compact and light weight yet industrially designed ice and snow walking device that fits easily and conveniently over all types of shoes and boots. Extremely easy to use and can be put on or taken off in seconds. Light in weight, the High-Pro™ is virtually inconspicuous on the user's foot or when carried in a pocket.

The High-Pro™ features molded-in "High Profile" studs for maximum traction for employees that are faced with harsh outdoor ice and snow conditions. With the High-Pro™ employees can have the confidence to walk and work in these conditions while still wearing their normal winter footwear.

Available in sizes S-XXL, the High-Pro™ will fit over even the largest of winter boots.

"High Profile"
tungsten
carbide stud
for maximum
traction.

Aggressive treaded sole for maximum traction in snow Conditions.

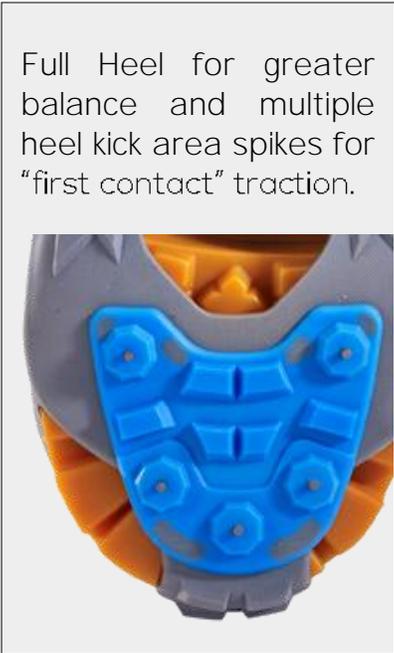

The **High-Pro™** features a thinner but durable upper designed for maximum stretch for easy on/off.

A thick non-elastic sole for maximum stud retention and abrasion resistance.

Features a patented rear dual-pull tab for the easiest on and off.

Full Heel for greater balance and multiple heel kick area spikes for "first contact" traction.

The **High-Pro™** features 26 "molded-in" tungsten carbide studs. The studs are designed to provide maximum traction in ice and snow environments. The tungsten carbide material provides excellent abrasion resistance and durability in industrial conditions.

The studs are molded into a thick non-elastic sole which is then co-molded to an elastic upper. This combination provides maximum stretch in the upper, where you need it for easy on and off and maximum durability on the sole to ensure product longevity.
