### Overview

EMERGENCY-STOP mushroom push button with F adapter for bus connection

The AS-Interface F adapter is used to connect an EMERGENCY-STOP device according to ISO 13850 from the 3SB3 series to the AS-Interface bus system. The F adapter is suitable for control devices with mounting on front plates.

The F adapter has a safe AS-Interface 2I slave and is snapped from behind onto the EMERGENCY-STOP mushroom push button. In the 2I/1O expanded version, an output is also available for actuating an indicator light with LED.

Depending on the version, screw terminals or spring-type terminals or the insulation piercing method are used for connecting to the AS-Interface bus cable. Addressing is performed using the AS-Interface connection or the integrated addressing socket.

Safety category 4 (SIL 3) is achieved with the adapter.

### Selection and ordering data

Version	DT	Screw terminals 	PS
---------	----	---	----

Order No.			

3SF5 402-1AA03

#### AS-Interface F adapter for 3SB3 EMERGENCY-STOP mushroom push buttons

For mounting on front plates

- 2I
