

Hammer drill bit imperial TE-CX

Features

Solid carbide head with four carbide cutting edges and innovative X-geometry for optimum material removal

Special two-component carbide (gradient technology) absorbs impacts much better than conventional carbide especially when drilling into rebars

Good resistance to high temperatures

Up to 30% longer life than other hammer drill bits

Faster drilling progress thanks to new flute design

Applications

Drilling anchor holes in reinforced and unreinforced concrete

Drilling holes for post-installed rebar connections

Technical Data

Tool type All tools with TE-C (SDS Plus) connection
