M18 FUEL™ 1/2" Mid-Torque Impact Wrench with Friction Ring (Tool Only)

3 Reviews Write a Review (https://www.milwaukeetool.com/write-review/?pr_page_id=2861-20&pr_merchant_id=375152&pr_api_key=dd031606-9334-476a-906e-368515eeaad9&pr_merchant_group_id=14854)

Delivering 450 ft-lbs Fastening torque and 600 ft-lbs Nut-Busting torque, the M18 FUEL™ Mid-Torque Impact Wrench is more powerful while also being up to 2" shorter and up to 1.5 lbs lighter than many competitive impact wrenches. The POWERSTATE™ Brushless Motor delivers up to 0-2,400 RPM resulting in increased productivity. REDLINK PLUS™ Intelligence is the most advanced electronic system on the market, preventing damage to the tool and battery caused by overloading or overheating. For use with REDLITHIUM™ Compact Batteries or Extended Capacity Batteries (sold separately), the M18 FUEL™ Mid-Torque delivers more work per charge and more work over the life of the pack than competitive batteries on the market. The 3-Mode DRIVE CONTROL™ provides greater control over output speed and power for greater versatility. At 6.7" in length and 5.3 lbs with a 5.0Ah battery, the M18 FUEL™ 1/2" Mid-Torque Impact Wrench delivers the balance and weight desired by professionals for all day use. This tool offers quick, tool-free socket changes with a 1/2" friction ring anvil. A new overmold material gives you ultimate comfort during prolonged use while lasting longer against corrosive materials.

I couldn't ask for more

In my line of work This tool gets plenty of use and it handles everything I've thrown at it with ease. It's very compact and surprisingly powerful for its size. I've gone out of my way to find stuff the do just to use it. It feels great in the hand and doesn't cause any fatigue. Out of all the Milwaukee tools I own (dozens, too many to count) this is one of my favorites. I would recommend this to anyone looking for a quality mid torque impact. Great job Milwaukee team on this tool!

A Beast like knife through butter

This impact wrench is a beast for the size. It will do 90% of the job you'll encounter in your shop or garage or diy spots. I own the big brother (2763) too of this impact and I haven't used it ever since I got the little brother (2861). I LOVE this impact wrench and would highly recommend it to everyone. The only thing I think milwaukee should have done was to make sure that the protective boot was available before the release of this mid torque impact so as to have the option of buying it along with it like I did when I bought the 2763, which by the way still looks BRAND NEW bcuz of the boot. The mid torque is already having scratches on it bcuz of lack of availability of the boot. I called milwaukee and they said it will be available in late spring. RPeally? I don't think that's smart bcuz by then, those of us who bought early, ours would have been scratched up regardless of how careful you are. Better off, Milwaukee should have attached a protective boot to the impact that you spent all that \$ on like Makita does. Other than the above mentioned protective boot stuffs, the performance of this impact is second to none. Pleeeeease Milwaukee make the boot available ASAP.
