

SCIENCEWARE® Sterileware® Red Sterile Sampling Scoops, Bel-Art

Sterileware® scoops are the perfect shape and size for taking samples, especially from wide-mouth containers. Designed to hold various capacities, these one-piece sterile scoops are molded from high-impact polystyrene plastic, individually sealed and sterilized in a polyethylene bag, and ready for one-time use and disposal.

The 60mL (2oz.) and 120mL (4oz.) sampling scoops have a long handle that increases the distance between the hand and sample. When placed on a flat surface they remain upright and can be used as weighing boats. The bright red color reduces the chance of these scoops being accidentally left behind in a sample.

The distinctive color can also serve as a code to avoid cross contamination and provide a contrasting background to better view light colored samples. Made from FDA grade materials, they are lot stamped for accurate lot tracing and shipped with a Certificate of Processing for Sterilization.

Capacity	Bowl Dimensions	Supplier No.	Cat. No.
60 mL (2 oz.)	2.5W x 7.6L x 3.8H cm (1 x 3 x 1 1/2")	369022002	47751-004

Puritan® Tongue Depressors, Puritan Medical Products

Smooth, splinter-free tongue blades are made from northern white birch. May be used as a clinical diagnostic aid, or as a stirrer for liquid medicine. Available in sterile or nonsterile.

Description	Dimensions	Sterility	Packaging	Supplier No.	Cat. No.
Standard	152L x 17.5W mm (6 x 0.688")	Nonsterile	Bulk Packed	704	CA62505-007

HSW® Norm-Ject® Sterile Luer-Slip Syringes, Air-Tite

Norm-Ject® syringes feature medical-grade plastics, including a polypropylene barrel and a polyethylene plunger. These inert syringes are sterile, latex-free and contain no rubber, silicone oil, or styrene. They do not contain contaminants often associated with disposables. Syringes can be used for sampling, mixing, and filtering. They are smooth drawing with a positive safety stop to prevent accidental spills. Accurate, easy-to-read increments.

Volume	Graduations	Supplier No.	Cat. No.
1 mL	0.01 mL	4010.200V0	53548-001
