## Stainless steel JIC enclosures

The 5412 ESSCH are used indoors or outdoors to protect the enclosed controls from dust, dirt, oil and water splashing. The 5412 ESSCH are made from quality 16 GA (Type 304) stainless steel, with corner seems continuously welded. The opening has a curled lip around all sides to prevent dripping water from entering the enclosure when the door is open, it also increases rigidity. A high quality robotically poured-in-place seamless gasket ensures a complete and durable water tight seal.
This enclosure features incorporat-
ed hinging, meaning that the hinge is a part of the box and part of the cover. This minimizes the amount of welding and allows the door to be easily removed by pulling out the full length mushroom head hinge pin. Very few JIC type enclosures offer this considerable advantage.
EXM's exclusive flange-mounted $1 / 4$ turn locking system ensures positive closing while leaving a full workable mounting surface on the door. Each enclosure comes complete with a 14 GA inner panel which mounts on weld nuts. The four external wall-mounting holes
are oblong to facilitate installation and the mounting feet are incorporated into the body of the enclosure. The enclosures' exterior are unpainted and brushed smooth. The enclosures' interior and panels are finished with white heat fused powder paint, electrostatically applied on a pretreated base.
CSA Certified / UL Listed NEMA/EEMAC 4X / IP66
