

E•A•R® Push-Ins™ ComforTip™ Reusable Earplugs

Extremely soft, form-fitting foam, a unique bulb shape, and the lack of an inner stem in the canal tip combine to ensure a high level of comfort and fit. Body temperature softens E•A•Rform™ foam, allowing the earplug to mold to the shape of the ear canal. Easily inserted nub has a wide, rounded base for a secure, comfortable seal. The paddle-style stem eliminates roll down and makes insertion quick and easy. NRR 26 dB.

EAR318-1015	Corded	200 Pr/Box

E•A•R® UltraFit® 27 Earplugs

The latest model in the best-selling UltraFit family combines the proven triple-flange design with new ergonomics and new materials. The UltraFit 27's ergonomic pistol grip, with its angled shape, is even easier to insert, ensuring maximum fit and performance. Combine that with a patented polymer formulation and you get the highest attenuation of any premolded reusable earplug. NRR 27 dB.

E•A•R® SuperFit 30™ and SuperFit 33™ Disposable Earplugs

To achieve complete protection, an earplug must be inserted correctly. E•A•R SuperFit Disposable Earplugs take the guesswork out of properly fitting your earplugs. An orange “fitting ring” circles the center of the earplug. When inserted correctly, no orange should be visible. Made from a formula of low-pressure foam for increased comfort, softness and performance. Fits securely in a wide range of ear canal sizes. **SuperFit 30** has an NRR of 30 dB. **SuperFit 33** has an NRR of 33 dB, the highest NRR available today.

EAR312-1261	Uncorded	200 Pr/Box
EAR312-1260	Corded	200 Pr/Box

E•A•R® Classic® Disposable Foam Earplugs

Made of soft, slow-recovery PVC foam that expands in the ear for a comfortable, custom fit. Because it will not absorb moisture and swell, the foam maintains comfort, fit and recovery characteristics. Classic Plus Earplugs are longer and can be inserted deeper into the ear canal for greater noise reduction. **Classic Earplugs** have an NRR of 29 dB, while **Classic Plus Earplugs** have an NRR of 33 dB.

E•A•R® Push-Ins™ Earplugs

E•A•R Push-Ins require no roll-down, so they're ready to wear right out of the pack, and hand-to-ear contamination is eliminated. The unique cone shape of the ultrasoft E•A•Rform™ soft foam tips fits a wide range of ear canal sizes and shapes, and the stiff stem on each earplug allows the foam cone to be inserted deeply within the ear canal to form a high-attenuating, low-pressure seal that protects against damaging noise. Innovative Grip Rings, molded right into the foam, are designed to keep the earplugs from slipping out of place, so attenuation remains high. Designed to be reusable, but priced like disposables. NRR 28 dB.

E•A•R UltraFit® Metal-Detectable Earplugs

The UltraFit proprietary design with a metal-detectable steel ball securely positioned in the stem. Ideal for the food processing, pulp and paper or rubber processing industry. A metal-detectable cord enhances safety and eliminates concern if the earplugs and cord somehow become separated. One pair per poly bag, packed 100 pairs per box. NRR 25 dB.

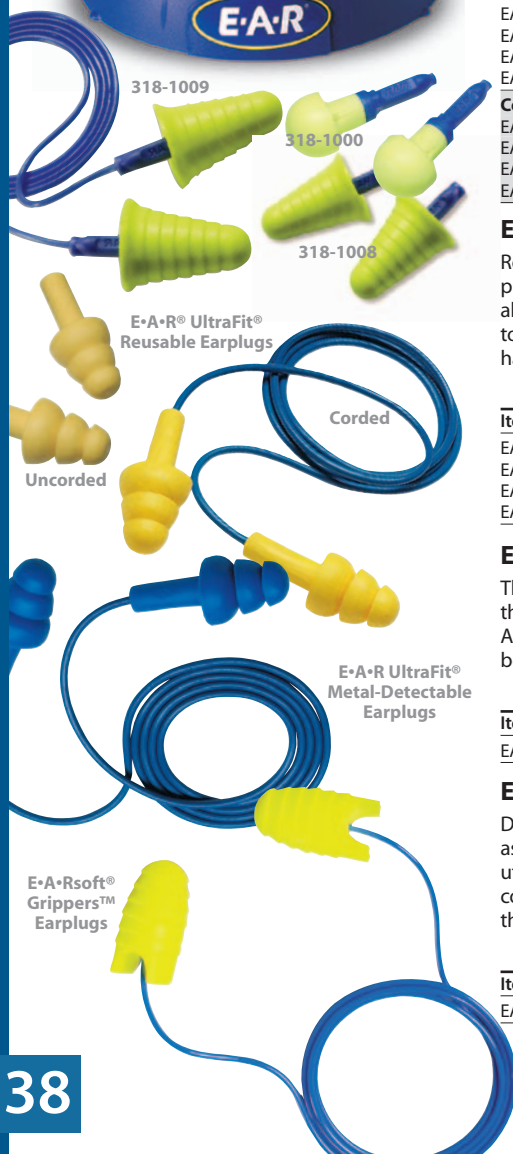

Item No	Description	Unit
EAR340-4007	UltraFit Metal-Detectable, Corded	100 Pr/Box

E•A•Rsoft® Grippers™ Earplugs

Designed to prevent "backing out" of the ear, which makes them an ideal choice for use as extended-wear earplugs. The soft foam earplugs expand to fit the ear canal and utilize patented Grip Rings which comfortably hold the earplugs in place and provide a secure and consistent seal. A concave base makes insertion easy, and Easy-Grip handles allow for quick removal of the earplugs. Available in convenient dispenser boxes of 200 pairs. NRR 31 dB.

Jazz Band® Canal Cap Hearing Protector

Features soft, comfortable foam pods that gently cap the ear canal, which offers superior comfort and increased convenience and compliance. An optional breakaway neck cord allows the Jazz Band to conveniently hang around the user's neck when not in use. Replacement Pods are included in each package. NRR 22 dB (under the chin).

Item No	Description	Unit
MOL6506	Jazz Band w/ Repl. Pods and Neck Cord	10/Box
MOL6504	Jazz Band Repl. Pods (5 pr.) and Neck Cord	5 Pr/Box

Cool Cap® Canal Cap Hearing Protector

The lightweight Cool Cap has two flexible arms that distribute pressure evenly for a comfortable fit. The soft foam pods gently cap the ear canal. Dual contrasting materials on the band give the Cool Cap a stylish look. The low-pressure design and soft foam pods are great for workers who need to wear a band frequently in moderate noise areas. NRR 22 dB (under the chin).

Item No	Description	Unit
MOL6508	Cool Cap Earband	10/Box

Rock Band® Canal Cap Hearing Protector

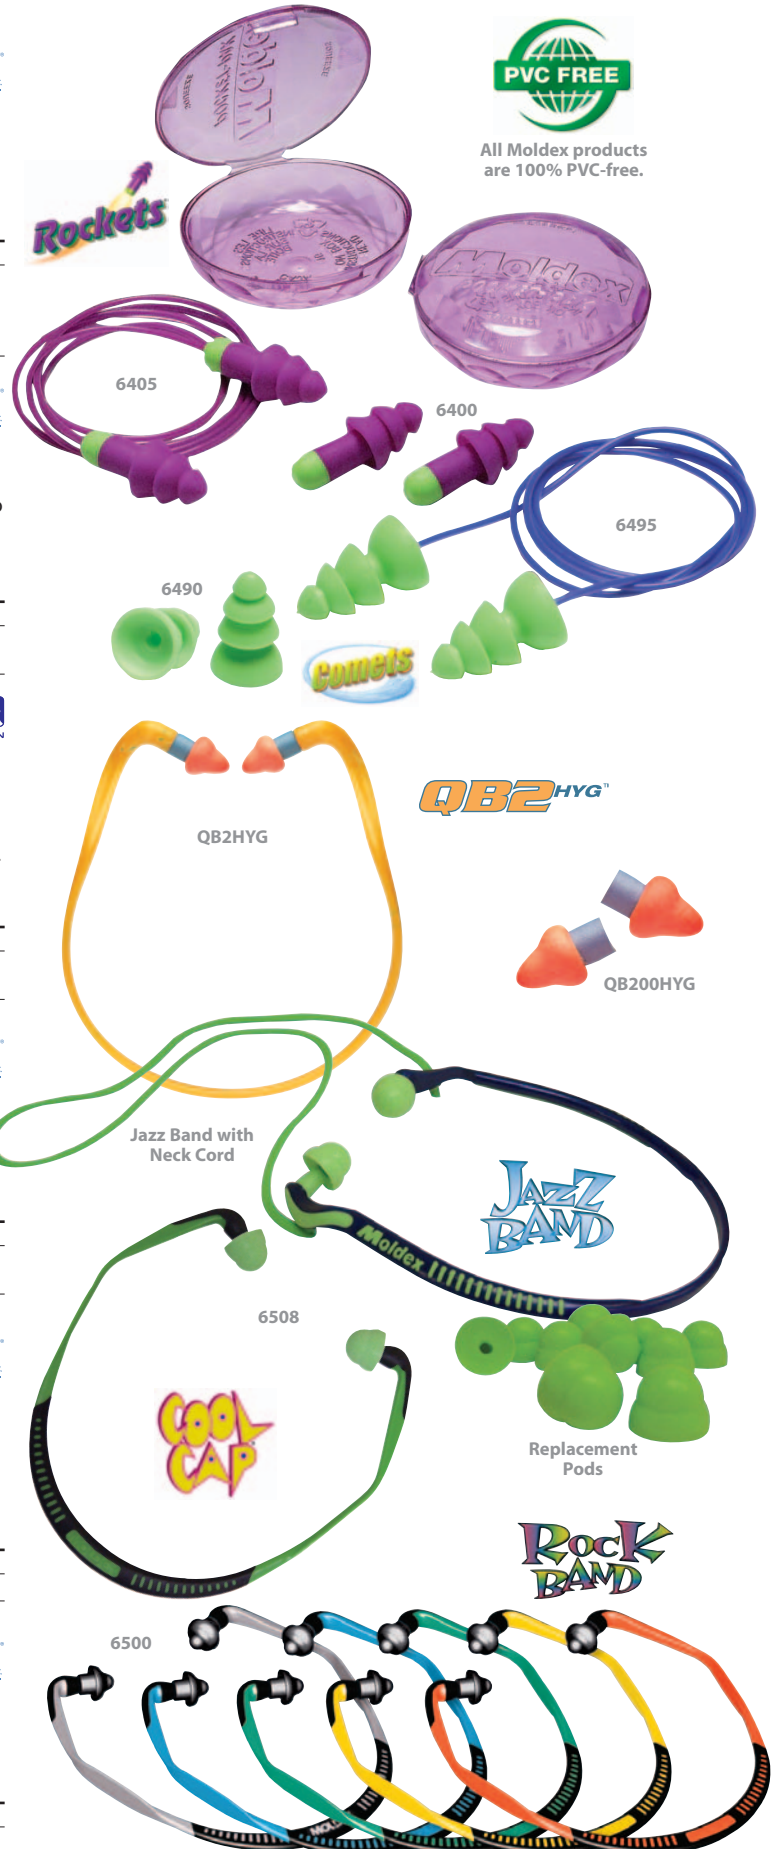

Younger workers love the five exciting colors that the Rock Band comes in. Pods are soft and reusable, and gently cap off the ear canal. Pressure is distributed evenly by the two flexible arms, assuring a comfortable fit. NRR 22 dB (when worn under the chin).

Item No	Description	Unit
MOL6500	Rock Band Protector	10/Box

All Moldex products are 100% PVC-free.

Optime™ 95 Earmuffs

Optime 95 Earmuffs offer protection in areas with noise levels up to 95 dBA. They are comfort engineered for continuous use with two low-pressure points for comfortable alignment to the head. The low-profile design features patented liquid/foam-filled ear cushions with slim tapered domes which pivot for a maximum fit.

Headband style **H6A/v** features a simple height adjustment without projecting parts. NRR 20 dB. **H6B/v** behind-the-head style

has an NRR of 19 dB. Convenient folding style **H6F/v** has an NRR of 21 dB. Cap-mounted styles **H6P3AC/v** and **H6P3E/v** each have an NRR of 20 dB.

Optime™ 98 Earmuffs

Optime 98 Earmuffs protect the wearer in work areas where assessed noise levels reach as high as 98 dBA. The earmuffs utilize liquid/foam-filled ear cushions and pivoting earcups which ensure a secure fit. Model **H9A** features a soft padded headband mounted on individual stainless spring steel headband wires. NRR 25 dB. **H9P3E** mounts on slotted hard hats. It can be set in three positions: in use, at rest (flipped up away from ears) and storage (snapped up against top of safety cap). NRR 22 dB.

Item No	Description	Unit
PLTH9A	Headband Earmuffs	Each
PLTH9P3E	Cap-Mounted Earmuffs	Each

Optime™ 101 Earmuffs

Optime 101 Earmuffs are designed for maximum attenuation in severe noise environments which have assessed levels of up to 101 dBA.

Broad ear cushions with combined liquid and foam filling provide an excellent seal and low surface pressure. Model **H7A** has a soft padded headband and an NRR of 27 dB. **H7B** is a behind-the-head style with an NRR of 26 dB. The cap-mounted **H7P3E** can be set in three positions: in use, at rest (flipped up away from ears) and storage (snapped against top of safety cap). It has an NRR of 24 dB.

Worktunes® AM/FM Radio Headset

Workers are more motivated to wear hearing protection when they can listen to AM radio sports and talk shows or their favorite FM music stations while they work. The

HRX79A GU

HTRX57A2

HRX52A 343-SV-GV

Worktunes Headset combines clear, glitch-free radio reception with superior hearing protection. The short, flexible, highly sensitive antenna provides stable radio reception, even in difficult areas. In areas with weak signals, Worktunes automatically switches from stereo to mono for interference-free reception. Tuning and volume controls located in one earcup are easy to adjust, even while wearing gloves. Wide, soft padded headband with individually sprung stainless steel headband wires evenly distributes pressure around the ears for exceptional comfort. The earcups' sturdy, two-point attachment features stepless height adjustment that conforms to a wide variety of head sizes and shapes. Soft, wide ear cushions provide excellent sealing while exerting low pressure for added comfort. Radio frequency range: FM 88-108 MHz; AM 540-1700 kHz.
