

P&S Screwless Wall Plates

Unbreakable, flexible polycarbonate construction.

Two-piece, non-conductive polycarbonate subplate speeds installation.

Automatic alignment pins ensure that devices are properly positioned so that wall plates fit perfectly.

Available in a full range of colors — from single- to four-gang.

| P&S Screwless Wall Plates (Subplate included) | | | | |
|---|--------|---------|---------|---------|
| Gangs | One | Two | Three | Four |
| Cat. No. | SWP26* | SWP262* | SWP263* | SWP264* |
| All plates are cULus compliant. | | | | |

*** Color Designation**

| | | | |
|----|--------------|-----|-------|
| I | Ivory | GRY | Gray |
| LA | Light Almond | BK | Black |
| W | White | — | Brown |

INSTALLATION'S THIS SIMPLE!

Because the subplate secures with the wiring device mounting screws, no additional fasteners are necessary — and there's no need to remove devices. Simply loosen the device mounting screws and snap the two-piece subplate in place behind the device straps. Then retighten the screws.

The wall plate simply snaps in place over the subplate. The plate can be easily released from the subplate with a screwdriver.
