

## COARSE INDUSTRIAL

Use on rough, unfinished surfaces

These brooms work on uneven/unfinished floors or uniform outdoor surfaces.

### 67 SERIES | SYNTHETIC COMBO

The 67 Series features a centre filled with coarse synthetic bristles encased by a row of soft, flagged, synthetic bristles for a broom that will sweep up fine dust and move debris at the same time.

item	size [in.]	pack
6718	18	
6724	24	6
6736	36	

### 62 SERIES | NATURAL COMBO

An all-natural push broom combining a stiff palmyra centre surrounded by an outer row of medium natural fibre. These two fibres are plant based, heat resistant, aggressive sweepers that move large debris over rough surfaces.

item	size [in.]	pack
6218	18	
6224	24	6
6236	36	

### 83 SERIES | SYNTHETIC

Synthetic fibre fills the block of this outdoor broom. The coarse bristles are oil and solvent resistant; the broom can be used in wet or dry conditions wherever heavy debris needs to be moved.

## X-COARSE INDUSTRIAL

These brooms work outside to push heavy debris

Use these brooms streetside on rough uneven surfaces for jobs such as road construction and landscaping.

### 73 SERIES | NATURAL

Traditionally called a **stable broom**, this is an extra-coarse palmyra-filled broom that is heat resistant. It is ideal for working with asphalt in road construction, or where coarse debris needs to be swept.

item	size [in.]	pack
7314	14	10
7316	16	

### 74 SERIES | SYNTHETIC

This broom is filled with coarse synthetic fibre and is ideal for street sweeping and the construction industry.

**Warning:** The fibres are chemical resistant, but will warp or melt if exposed to heat. Use the 73 Series when high heat is expected.
