

AG SOLSTICE™

Squeegees

A contoured, ergonomic handle is designed to fit the form of the human hand.

The channel provides quick blade change-outs on the fly.

The rubber blade creates the streak-free window.

This clip-free, ergonomic handle and squeegee are designed for building service staff who want quality and functionality.

commercial grade

SOLSTICE SQUEEGEE HANDLE AND CHANNELS

Polypropylene squeegee handles are paired with stainless steel channels and high-quality, extruded-rubber blades for a consistently clean, dry surface. Stainless steel channels make for a lighter squeegee, which reduces the chance of repetitive-strain injuries.

description	item	pack
ergo-grip handle	46100	10

Handle glides and clicks along the grooved channel by a quick-release button so the blade can be repositioned as needed.

AG SOLSTICE™

T-bars & scrubbers

A dedicated t-bar and scrubber for cleaning windows is a good start to achieving quick professional results, every time.

commercial grade

SOLSTICE T-BAR & SCRUBBER

Step One in getting a streak-free, clean window is a good scrubbing with soap and water. The Solstice t-bar and scrubber make short work of the job. The deep channels on the t-bar hold water and release it as the scrubber moves over the window, so less bucket-dipping is needed. The scrubber itself is made of cut-pile microfibre to maximize cleaning efficiency, and its Velcro® fastener makes for easy installation and removal. Sold complete or purchased separately in 10-inch and 14-inch sizes.
