

AG PROFESSIONAL™

The strongest braced broom built

These fully assembled, braced push brooms are ready to work in Canada's toughest workplace environments. The bolt-on handle and brace eliminate broken hardware and worn threads. Every professional deserves this broom in his or her truck.

Full range of sweeping for indoor and outdoor performance.

Steel brace
bolt-on reversible handle

TIP: Typically, x-coarse and coarse brooms are used outdoors. The fine broom has flagged fibres for dust control when sweeping indoors.

WHY IS THIS THE TOUGHEST BROOM IN CANADA?

The long and short of it is – quality. Every component is made with the highest quality possible for the best performing, longest wearing broom Atlas Graham builds.

- Handle is 60 x 1 1/8 inches in diameter with a metal brace and bolt-on connector for maximum ergonomic comfort, strength and durability. The handle can be reversed for even wear to extend the life of the fibres.
- Kiln-dried hardwood with quality staple-set fibres means the block resists warping. Fibres remain secure within the block.
- Quality components improve durability and service life over value-conscious models.

AG PROFESSIONAL™

Get outdoors and work; this is one tough broom.

Bolt-on handle is reversible to encourage even wear on the fibres. When properly maintained, this doubles the service life of a professional broom. The brace provides protection against shearing stress, so handle breakage and damaged threads will never wear you down.
