

ACCESSORIES

These products make sweeping easy

Use the metal dust pan in an industrial environment or where heat is expected.
Use the plastic dust pan in a high-humidity environment.

The jumbo dust pan is a match for push brooms.

99980 180 181

All of Atlas Graham's dust pans have a defined leading edge to ensure debris goes in the pan, not under it.

77115

SWEEPING COMPOUND | DUST CONTROL

The perfect mate for cleaning hard floors in warehouses, shops, garages, basements and construction sites. Non-petroleum-based sweeping compound picks up surface dirt and dust without leaving an oily residue. Environmentally safe material includes special detergents for maximum cleaning power. Safe for all hard floors including concrete, wood, tile and vinyl. Non-combustible.

Note: compound is not oil absorbent.

item	description	pack
99980	jumbo aluminum 17-in. dust pan	12
180	steel 12-in. dust pan	12
181	high-impact plastic 12-in. dust pan	12
77115	10-lb. dust control, sweeping compound	1
77150	50-lb. box dust control, sweeping compound (not shown)	1

When dust control is a concern, use sweeping compound.

ACCESSORIES

Taking out the trash

These tools offer a **no-touch** strategy for cleaning up debris. The tools also make the final job of getting the trash into a refuse bin more ergonomically correct.

GRIP'N GRAB™

The multi-purpose pickup tool saves your back, and can be used indoors and outdoors. Comfortable, ergonomically designed handle and rubberized jaws allow easy retrieval of objects without bending.

- Comfortable handle and 36-inch arm with rubberized jaws reach objects high and low. Often more convenient and safer than climbing a ladder.
- Sleek profile with articulating head that turns 90° to get behind equipment and other tight spaces such as stoves.
- Rust-proof for outdoor use, including ponds and in all weather conditions.
- All cleaning carts should have this tool.

grip'n grab, trigger tool

item	size [in.]	pack
37150	36	6

Head rotates to get behind tight squeezes.

Industrial Litter-sweep™ also adapts to standard trash bags. Extra-heavy weight poly/fabric bags won't rip.

Lobby dust pans have integrated broom holder.

item	description	pack
10182	lobby dust pan	6
10281	broom and lobby dust pan	6
185	Litter-sweep with reusable bag	6
190	Litter-sweep replacement bags	12

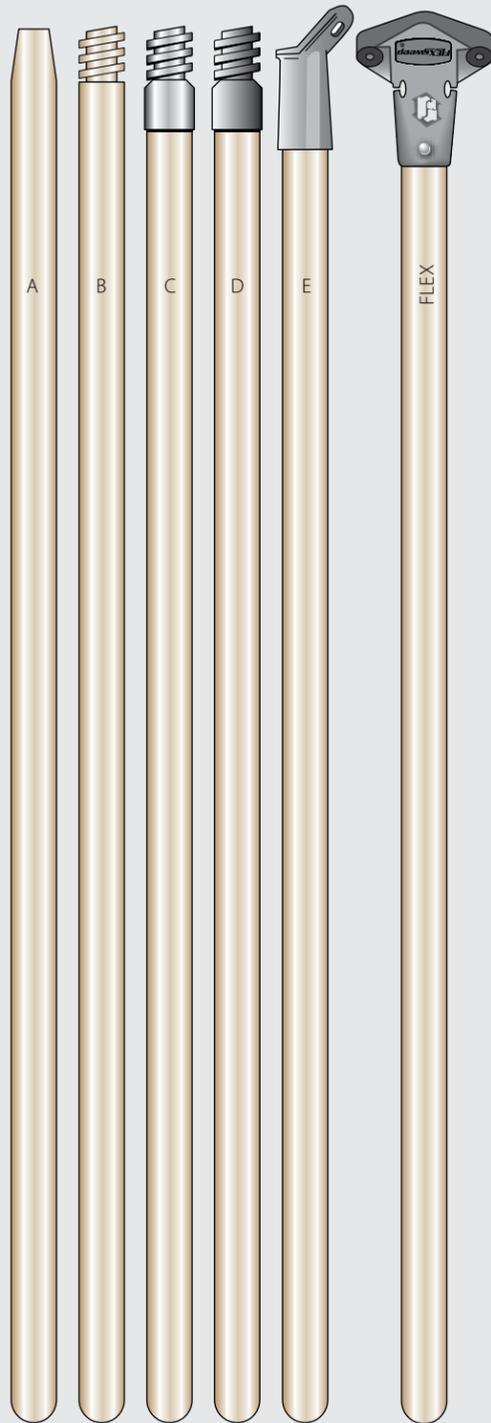

The 760 Mink with a short 30 x 13/16-inch lacquered handle is the perfect match for the lobby dust pan. Pack: 12.

HANDLES

Select wood for the natural choice

Each style of broom may require a specific handle in order for it to function well. Select a handle length that comes to the user's chin. The thicker the handle, the stronger and more comfortable it is.

All threaded handles in this section are standard North American acme thread.

WOODEN HANDLES

Wood handles offer great value, and they don't conduct electricity or cold. Many professionals find that wood is the most comfortable and tactile of all the handle materials. Wood can also be cut for a custom fit.

Note: The Flexsweep [FLEX] and [E] are replacement handles. For a detailed account of these handles, please see the Professional, Firefly, Safety Orange™, and Flexsweep™ stories at the beginning of this section.

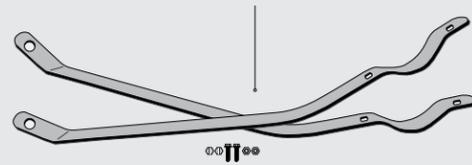

#	item	size [in.]	tip	material	pack
A	52506	54 x 1 1/8	taper	wood	25
	52513	60 x 1 1/8			25
	2500	48 x 15/16			10

E	2532	60 x 1	bolt-on	wood	10
FLEX	2538	60 x 1 1/8	flexsweep handle/connector		6

ERGONOMIC COMFORT

The key to proper ergonomic comfort is to match the handle to the individual. The handle should reach just below the chin [L2] on men and women.

BROOM BRACE

If any broom (excluding the Flexsweep) measures 24 inches wide or greater, Atlas Graham recommends a reinforcing brace: part number 2533.

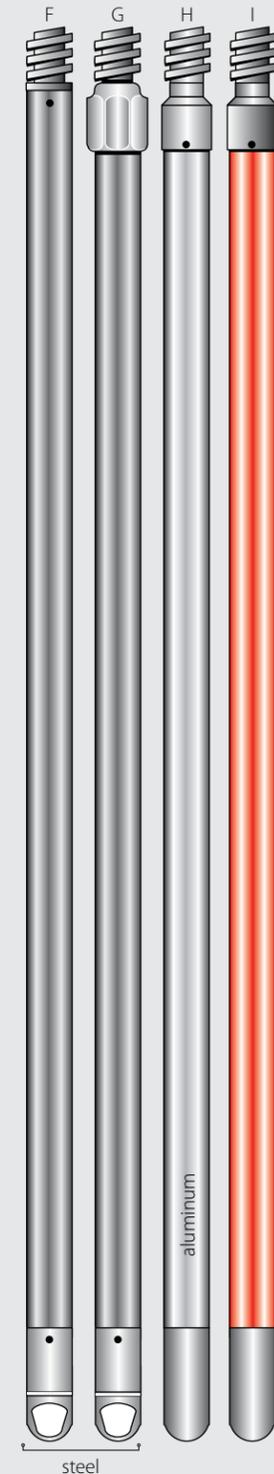

HANDLES

The right handle is a mix of technology and ergonomics

Metal and fibreglass have properties that can improve performance when used for the right application.

All threaded handles in this section are standard North American acme thread.

STEEL & EPOXY

Our steel metal handles are epoxy coated and are a good, lightweight and economical alternative to wood. The added benefit is that epoxy coated handles have resistance to chemicals and are considered non-porous.

ALUMINUM

Aluminum handles offer excellent strength in a lightweight design. In addition, they have great resistance to chemicals. The fit and finish on aluminum handles give the tool a very clean appearance and is recommended when using in full view of the public.

FIBREGLASS

Fibreglass handles provide a strong lightweight design in a very durable colour-coded finish that will not chip or peel. We recommend colour-coding when you want to deploy cleaning zones. These handles are non-porous and can be used in areas classified as **wood free** such as the food service industry. The materials will not rust and the fibreglass does not conduct electricity or cold. They make an ideal match for cold storage facilities.

DECK BRUSHES

Deck brushes clean a smaller area

Use these brushes to scrub and sweep uneven wood and grouted surfaces such as decks and patios.

WOOD BLOCK DECK SCRUB

These all-purpose wooden deck brushes are filled with a blend of natural tampico and palmyra fibres (called **union fibre**) in an 11-inch wooden block drilled to accept a tapered handle.

The 336 brush is edged with a handy rubber squeegee so that it can be flipped over and used to move standing water.

The 322 deck brush has synthetic fibres with good chemical and moisture resistance. This brush has short, very stiff fibres for aggressive scrubbing.

322		coarse	synthetic	

SLIM LINE SCRUB BRUSHES

These deck scrubs feature a low-profile plastic block with grooved edges to provide an easier grip for handheld use. They will also accept any Acme-threaded handle including our metal, flow-through handles.

Natural tampico fibres absorb more water and offer a gentle scrubbing action suitable for pool side cleaning.

MASONRY | KALSOMINE

Use these brushes for stucco, concrete or applying finishes

Kalsomine (also known as whitewash) brushes can be used to clean up during masonry work, to give a rustic texture to jointing in brickwork or as applicators for a variety of substances.

253

256

257

275

For the application of thick industrial coatings such as stucco, tar or paint.

These brushes are also used to scrub concrete and brick finishes. The masonry block brushes need a tapered handle and are used like a deck brush for increased reach.

The brushes with handles can be used as applicators to apply wallpaper paste, whitewash, liquid waterproofing of cement. They can also be used to create a textured finish in wet paint or cement.

275	6 x 2¼	5					

order tapered handle on 250 & 253

Tampico fibres are a good choice when you need absorbency and releasing properties such as applying industrial coatings.

WIRE SCRATCH

Metal fibres for the coarsest scrubbing

These small brushes are used in a variety of industrial applications such as welding or removing rust and paint from metal or wood.

WIRE SCRATCH BRUSHES

These brushes are offered in tempered steel for use in dry applications, stainless steel for more humid conditions and soft brass for cleaning polished surfaces such as enamel BBQ finishes.

item	rows	handle	material	pack

99023	3	long		

WHISKS

Keep workstations clean and safe

Use to clean work benches. Corn whisks remove dry industrial grit and the synthetic whisks remove dirt where high humidity is present.

WHISKS

Whisks are useful in many places to sweep dirt from chairs, upholstery, window sills and small spaces found in vehicle cabs. The all-synthetic whisk can be used in food service applications.

item	material	pack

17522	corn with plastic cap	

FLOOR & TILE SCRUBS

When you need to get into corners or grout lines

Nothing works better than these synthetic brushes to remove dirt, grease, oil and mould from surfaces that are damp or wet.

DUAL LEVEL

This dual-level brush features coarse, crimped polypropylene trim in a 10-inch polymer block. The "V" shape of the block means the bristles get into corners. Use a non-wood handle for food service.

description	item	pack
dual angle brush	5317	6

SWIVEL SCRUB

Universal locking collar accepts any handle. Aggressive, synthetic, short-trim bristles take the hard work out of scrubbing grime and grease from floors, walls, ledges, and baseboards. The swivel connector keeps the tool positioned correctly even on awkward angles.

description	item	pack
general purpose, coarse	5300	
power scrub, x-coarse	5310	5

GROUT & CREVICE

Extra-coarse, 7/8-inch trim fibres offer the strength required to power through mould and dirt found on grout. Effective when used with cleaning chemicals.
