

FIREFLY™

Safety Orange™ assembled push broom

Use this broom around moving equipment or when high visibility is an important safety issue for your employees and work crews.

The Firefly multi-surface broom can make the transition from indoors to outdoors with grace, style, and ease.

The safety orange fibre offers high visibility around construction equipment and forklifts. Road crews demand the assembled bolt-on style connector and the steel brace for extra protection against shearing stresses to eliminate handle breakage.

- The broom has two different fibre diameters making it an ideal multi-surface broom for general indoor and outdoor sweeping. Flagged ends control dust indoors or when sweeping a garage.

item	size [in.]	application	pack

77724	24	multi-surface	4

Ice, snow, rain or mud: the Sweep-n-scrape™ broom with a steel blade makes quick work of any debris, even when the weather isn't on your side.

This two-in-one tool has all the benefits of a tough coarse broom plus the added bonus of a scraper to remove stubborn debris from driveways. Now you no longer have to use the wood block to remove caked-on debris before sweeping. That's what we call brilliant.

SAFETY ORANGE™

Bolt-on handle system

Configure your broom the way you want it. The block comes with pre-drilled holes and all the hardware to customize your broom.

Order a steel brace when a broom is 24 inches or wider to increase structural integrity and prevent handle breakage.

Order a broom head, steel brace (2533), and bolt-on handle (2532) to complete your unassembled push broom.
