Electrastat is designed for durability and launderability.

electrastat™ dust mop

tie-on and slip-on

Electrastat is made from a heavy nylon yarn that attracts dust without mop treatment and is exceptionally durable. Electrastat is offered in four bright colours for use in institutions where colour-coding is used. The mops feature double boot construction at the ends for increased durability.

Electrastat is perfect for hospitals, schools, long term care facilities or where dust mop treatment is prohibited.

features and benefits

- Nylon yarn creates an electrostatic charge to trap and hold dust, no treatment required.
- Colour options for implementing colour-coding strategies.
- Heavy duty double booted backing for durability.
- Great for hospitals, schools, and commercial buildings.
