| | | | | | |
| Drill a hole of the recommended size in each of the parts to be riveted and select correct nose-piece. | Fully open handles. Insert rivet until head touches nose-piece. | Insert rivet in the hole. | For soft materials or oversize holes use back-up plates to eliminate rivet pull-through. | Squeeze handles together. If mandrel does not break, open handles, push rivet head back to nose-piece and repeat until mandrel breaks. | Hold riveter with nose-piece up. Fully open handles and snapped off stem will fall out. |

No. 239-500 MEDIUM DUTY BLIND RIVETER
