### G34... ROUND HOLE STRAINER (PLATED STEEL)

G34 strainers are made from zinc plated steel. The open area of 50% allows removal of damaging debris while still maintaining adequate flow.

### G34L... LONG STRAINER (PLATED STEEL)

G34L strainers are long and slim for use in narrow or confined openings. The design is generally no wider than the hose itself. G34L are popular when pumping from ice covered water supplies.

### G34F... SMALL HOLE STRAINER FOR FISH HABITAT

The Department of Fisheries and Oceans recommends that where water is being withdrawn from fish habitat, the maximum screen hole size on a strainer should be 1/10". In addition, to prevent juvenile fin fish from being dragged onto the screen, the fluid velocity must be limited to less than 4.33"/second by providing adequate screen area. Based on this data, we have increased our offering of strainers to suit various pumping rates. Note, these strainers are designed with common fin fish in mind. For eel, burbot, and other slow swimming species, flow rates should be 1/3 of the amounts shown.

### G34P... POLYETHYLENE BASKET STRAINER

Polyethylene strainers are used where weight or corrosion resistance are important. They are particularly popular in marine applications.
