CW1000

ARCHITECTURAL CABINET

THE CABINET CONVECTOR POWERHOUSE

The CW1000 is a great option for heating large areas requiring higher than normal heat-loss recovery. With its high-density output of 1000 W per linear foot, engineers, architects and designers will no doubt appreciate this heater. It can heat large spaces that have little room to install heaters. Its versatile configuration options allow for front air entry and exit for recessed installation, or front entry and top exit for surface installation.
