# **Electrical Accessories**

A complete system of top quality, time saving products, designed for surface metal raceways, lighting and cable supports. Innovative designs offer many installation advantages. The surface raceways are U.L. listed and meet the requirements of the National Electrical Code, Article 384.

#### Surface Raceways

Our channel provides structural support in addition to a raceway system.

For U.L. wire fill see chart on page 231-232.

#### **Cable Supports**

A full range of clamps and saddles are offered in porcelain, thermoplastic elastomer and maple. Our maple clamps, Insulclamp<sup>™</sup> cable clamps and porcelain saddles are furnished complete with steel clamps (electro-plated) and Everdur hardware where required.

#### Materials & Finishes\*

Steel products are made from low carbon steel strips or plates. Porcelain saddles and clamps are made by dry process and white glazed (porcelain dielectric strength is 50 volts per mil). Maple clamps are made from kiln-dried maple wood, paraffin impregnated.

# Design Load

**Electrical Accessories** 

Design load data published includes a Safety Factor of 3.0 (Safety Factor = Ratio of ultimate load to the design load).
