# CONTROLS AND ACCESSORIES

## FLOOR WARMING CONTROLS

Get the best results from any Warm Tiles electric floor warming system with programmable FGS and non-programmable FG thermostats with built-in GFCI protection. These attractive dual-voltage thermostats can be used with floor-warming systems at either 120 or 240 Vac and loads up to 15 Amps total system current. The sensor wire monitors actual floor temperature for accurate comfort control. Each model includes an on-off switch in addition to comfort level settings, and a large blue backlit LCD display. The FGS programmable thermostat cycles on and off automatically to suit 5/2 or full 7 day schedules, or choose the non-programmable FG thermostat for manual operation with a simple temperature adjustment and on/off switch. Floor warming controls are CSA Certified to US and Canadian Standards.

**DT1 Detecto™** – The Detecto Electric Fault Indicator is designed to monitor EasyHeat cable or mat systems at every step during installation, immediately sounding an alarm in the event of an open or shorted connection in the cable. The Detecto Electric Fault Indicator conforms to European Directives.

## THERMOSTATS

| CATALOG NUMBER | DESCRIPTION | CTN QTY | CTN WGT | UPC | CERTIFICATIONS |
|---|---|---|---|---|---|
| FG | 120/240 Vac dual-voltage 15A non-programmable thermostat | 5 | 3.6kg (8lb) | 0-13627-16585-4 | |
| FGS | 120/240 Vac dual-voltage 15A programmable thermostat | 5 | 3.6kg (8lb) | 0-13627-16584-7 | |
