## **CES and CESD Arktite Receptacles**

## **Delayed Action Circuit Breaking CPH Plugs**

CESD - Cl. I, Div. 1 & 2, Group D\* CES - Cl. I, Div. 1 & 2, Groups C, D **Explosionproof** Wet Locations **Factory Sealed** 

### **Applications:**

CES and CESD receptacles with CPH plugs are used:

- · With portable electrically operated devices such as motor-generator sets, compressors, conveyors, portable tools, lighting systems and similar equipment
- In locations which are hazardous due to the presence of flammable vapors or aases
- In damp or corrosive locations
- At petroleum refineries, chemical and petrochemical plants, and other process industry facilities where similar hazards exist

### Features:

- CES and CESD receptacles are equipped with a delayed action rotating sleeve which prevents complete withdrawal of the CPH plug in one continuous movement
- The delayed action feature permits the plug to be used as an emergency pushpull switch
- · Details of operation are illustrated and described to the right:
- · Receptacles are factory sealed to simplify installation and wiring. External seals are not required.
- The 30 ampere receptacles are provided with pressure terminals for field connection. The 60 ampere receptacles have flexible leads. Plugs are equipped with solder terminals.
- Two arrangements are provided for the 3/4" and 11/4" conduit hubs, as shown in the listings and dimensions see page 1362.

## **Certifications and Compliances:**

• NEC/CEC:

CES - Class I, Division 1 and 2, Groups C. D: CESD - Class I. Division 1 and 2. Group D\*

ANSI/UL Standard: 1010

• CSA Standard: C22.2 No. 182.1

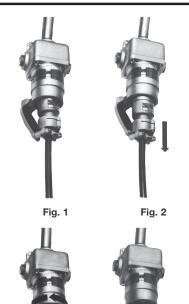

Fig. 4 Figure 1 above shows a CES receptacle assembly with CPH plug fully engaged.

Fig. 3

**Options:** 

Figure 2 shows the plug withdrawn until it is stopped by the delayed action sleeve. In this position the circuit has been broken and the arc has been snuffed in the contact chambers.

Figure 3 shows the delayed action receptacle sleeve rotated approximately 45° to allow withdrawal of plug from receptacle.

Figure 4 shows the plug completely withdrawn. To accomplish this, the delayed action sleeve must be rotated counterclockwise. The time required to actuate the mechanism permits dissipation of the arc-generated heat before contacts and arcing chambers are opened to the atmosphere. When inserting the plug, the reverse procedure is followed.

### Standard Materials:

- Back boxes Feraloy® iron alloy
- Receptacle housings 30 ampere copper-free aluminum; 60 ampere -Feraloy® iron alloy
- Plug bodies copper-free aluminum
- Insulation Krydon® fiberglassreinforced polyester
- Contacts brass or hard-drawn copper

### Standard Finishes:

- Feraloy electrogalvanized and aluminum acrylic paint
- Copper-free aluminum natural
- Krvdon material red
- Brass and copper natural

## **Grounding:**

- NEC article 501 and CEC Part 1 Section 18 require that metal frames or exposed non-current-carrying metal parts of portable devices used in hazardous locations be grounded through an extra conductor in the portable cord.
- CES and CESD receptacles and CPH plugs are provided with an extra grounding pole for attachment of the grounding wire. In the plugs, provision is made for attachment of the grounding wire to the grounding pole. In addition, direct connection is provided between plug and receptacle housings and the ground pole. In the receptacles, grounding is accomplished through the conduit system.

## Interchangeability of Plugs with Non-hazardous **Location Receptacles:**

- CPH plugs can also be used with standard AR and NR receptacles of the same ampere rating, style and number of poles, thus permitting portable devices which are suitable for use in hazardous locations to be connected to receptacles in both hazardous and nonhazardous areas
- Portable devices for non-hazardous areas equipped with APJ and NPJ Arktite plugs cannot be used with CES and CESD receptacles

## **Electrical Rating Ranges:**

30 and 60 amperes

The following special options are available from the factory by adding the suffix to the Cat. #: Description

• Special polarity - for use where two or more receptacles of the same ampere rating, style and number of poles are to be installed in the same area for use on different voltages. Receptacle interior rotated 221/2° clockwise when viewed from face and plug changed to match .....

# **Delayed Action Circuit Breaking CPH Plugs**

CESD - Cl. I, Div. 1 & 2, Group D\* CES - Cl. I, Div. 1 & 2, Groups C, D Explosionproof Wet Locations Factory Sealed

CES Receptacles with three hubs – one on each side and one at top – and two pipe plugs with CPH plug fully engaged.

CESD Receptacles with vertical through feed hubs and one pipe plug. Removable threaded cover at top to facilitate pulling wires.
