#### 2P

# **ENR Value Series Dead Front Interlocked Circuit Breaking Receptacles**

Cl. I, Div. 1 & 2, Groups B†, C, D Cl. II, Div. 1 & 2, Groups F, G Cl. III NEMA 3, 7BCD, 9FG, 12

Explosionproof
Dust-Ignitionproof
Raintight
Wet Locations

## **ENP Plugs**

## **Applications:**

ENR receptacles and ENP plugs are used:

- With portable electrical equipment such as compressors, tools, lighting systems, and similar devices
- In areas made hazardous by the presence of flammable vapors and gases or combustible dusts
- Wherever portable electrical equipment is likely to be transferred from hazardous to non-hazardous areas
- In damp and corrosive areas
- When power requirements do not exceed 20 amperes
- Where general purpose application is required

#### **Features:**

- Ark•Gard 2 receptacle incorporates
  three spring-loaded slide keys that
  prevent the receptacle face plate from
  being rotated until the ENP plug is fully
  inserted into the receptacle. To make
  the connection, the ENP plug is fully
  inserted, and the receptacle face moved
  inward by pushing the plug forward. The
  plug is then rotated, closing the circuit.
  As rotation begins, the plug becomes
  locked in the receptacle and cannot be
  accidentally disengaged. In making or
  breaking the circuit, any resulting
  electrical arc is confined in the factorysealed chamber.
- Factory-sealed chamber encloses the potential arcing components between two explosionproof threaded joints.
   These threads are specially coated to guarantee freedom of movement, which ensures on-off action. No additional seals are required.
- One piece molded gasket seals cover plate and ENP plug when plug is inserted, providing full environmental protection at the receptacle face.
- Top-hinged cover design with 45° downward angle provides superior protection in damp, wet, and dirty locations.
- Field assembly is accomplished with standard tools.
- Use standard EDS back boxes.

# Certifications and Compliances:

• NEC:

Class II, Division 1 and 2, Groups B†, C, D Class III, Division 1 and 2, Groups F, G Class III

- ANSI/UL Standard 1010
- NEMA/EEMAC 3, 7BCD, 9FG
- CFC:

Class II, Division 1 and 2, Groups B, C, D Class III, Division 1 and 2, Group G Class III

#### **Standard Materials:**

- Receptacle housing and spring door die cast copper-free aluminum
- Interior Krydon® fiberglass-reinforced polyester material
- Contacts: receptacle blade brass; receptacle switch – silver
- Receptacle cover hinge pin and spring stainless steel
- Receptacle gasket neoprene

#### Standard Finishes:

- Copper-free aluminum aluminum acrylic paint
- Brass natural

#### **Electrical Rating Ranges:**

· Receptacles:

15 amperes; 125 VAC and 250 VAC, 50–400 hertz

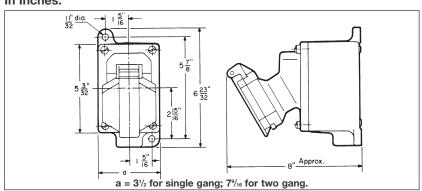

20 amperes; 125 VAC and 250 VAC, 50-400 hertz

#### **Grounding:**

 NEC Article 501 and CEC Section 18 requires that metal frames or exposed non-current-carrying metal parts of portable devices used in hazardous locations be grounded through an extra conductor in the portable cord. ENR Receptacles and ENP Plugs are provided with an extra grounding pole.

**CAUTION:** To reduce the risk of ignition of hazardous atmospheres, do not use plugs or receptacles in Class II, Group F locations that contain electrically conductive dusts.

# Dimensions In Inches:

†Receptacle units alone (i.e. ENR5201) are not suitable for Class I, Group B.

Note: 15A with copper-free aluminum EDS, EDSC back boxes. 20A with Feraloy® iron alloy EDS, EDSC back boxes.

<sup>†</sup>Receptacle units alone (i.e. ENR5201) are not suitable for Class I, Group B.
\*Single gang assemblies purchased with an EDS back box are suitable for Class I, Group B.
\*Dual gang assemblies purchased with an EDS back box are suitable for Class I, Group C, D only. For Class I, Group B rating, add the letter B to the Cat. No. Example: ENRB22201. Seals must be installed within 1½" of each conduit opening.
‡ENP Plugs use #12 or #14 AWG type S, SO, ST or STO cord with range of .540 to .635 inches diameter.
