## Industrial Cabling Technology

## A fault-free connection on-site in 60 seconds with FastConnect

Problems often occur on-site when laying the cabling for industrial plants: When stripping the cable, assembling the plug-in connector, or if cables are connected incorrectly.

The quick-assembly system FastConnect from Siemens is the right system:

- For the installation of industry-standard network structures within the shortest possible time, without specialist knowledge, with perfectly matched components
- · Minimal time spent connecting terminals
- To avoid installation errors
- For easy assembly on-site and reduced overall costsduring the lifespan of the system

FastConnect consists of a cable, connector and tool and can be used for Industrial Ethernet/PROFINET and PROFIBUS.

## The advantages add up with FastConnect

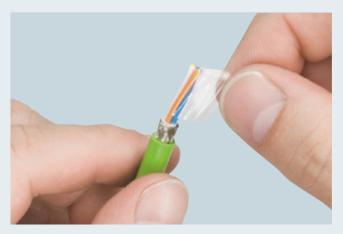

With the FastConnect (FC) system for Industrial Ethernet, structured cabling from the office environment becomes industry-standard for installation in production halls:

- An integrated system of FC plug-in connectors and an extensive range of FC cables with appropriate UL approvals for Industrial Ethernet/PROFINET and PROFIBUS
- Error avoidance through the use of color coding, preset tools, and clearly specified materials
- Dependable screen contacts and strain relief as well as good EMC shielding for copper cabling
- The use of standard-compliant connection technology for Industrial Ethernet/PROFINET and PROFIBUS
- Complies with environmental conditions according to IEC 61850-3

With optimally matched components, SIMATIC NET cables enable the installation of high-performance industrial network structures.

- Minimal installation time
- Easy stripping of outer sheath and braided shield in one step
- Simple connection method for Industrial Ethernet FastConnect cables
- Easy assembly thanks to preset FastConnect stripping tool
- · Reliable shield contacting and strain relief
- M12 and RJ45 connection method for Industrial Ethernet/PROFINET and PROFIBUS
