E50 Heavy-Duty Plug-In Switches

## E50 Heavy-Duty Plug-In Switches

## Product Description

E50 Modular Plug-In Limit Switch Components from Eaton's electrical sector are the industry standard with versatility of design and high reliability for low maintenance, installation and inventory costs. Standard Viton gaskets, seals and boots and a zinc die cast enclosure provide exceptional chemical resistance to the common coolants, cleansing agents, and hydraulic fluids found in machine tool, automotive, waste water treatment and other heavyduty industrial applications. Mounting dimensions accommodate both U.S. and DIN standards for easy retrofit installations. Super bright 24-120 Vac/dc LED indicating light versions simplify setup and troubleshooting operations.

## Features

- Modular, plug-in components (head, body and receptacle) provide application flexibility, reduced inventory and less downtime
- Manufactured to take the physical and environmental abuse (including cutting fluids and chemicals) of harsh industrial environments
- Chemical resistant Viton gaskets, seals and boots are standard, and so are captive, posi-drive screws
- The switches have terminal identification on the nameplate for a visual wiring checkout without guesswork. Heads and switch bodies can be replaced without rewiring

- E50 devices can be ordered in separate components or as complete assembled switches
- 600V rating, ridge-topped contacts and wiping action assure continuity even to logic level circuits
- Keyed, four direction head positioning
- Standard $5^{\circ}$ pre-travel and $90^{\circ}$ total travel
- 24-120 Vac/dc LED and 120 Vac neon indicating lights available
- Rotary heads are field convertible CW, CCW, or both, without special tools
- Epoxy filled, pin connector or pigtail pin connector receptacles available

## Standards and Certifications

- UL Listed
- CSA Certified
- IEC.947.5.1
- TUV—E9271605E02
- CE (where shown)

E50 Heavy-Duty Plug-In Switches, Operating Heads

|  | Description | Travel to Operate Contacts | Travel to <br> Reset <br> Contacts | Total Travel | Force to Operate Contacts | Minimum Return Force | Operating Temperature ${ }^{(1)}$ |  |  |

[^1]:    Notes
    (1) Temperature ranges below $32^{\circ} \mathrm{F}\left(0^{\circ} \mathrm{C}\right)$ are based on absence of freezing moisture or water.
    (2) CW (clockwise) and CCW (counterclockwise) operation, easily convertible to CW only or CCW only operation.
    (3) For CW and CCW operation. For CW only or CCW only operation, high temperature limit increases to $250^{\circ} \mathrm{F}\left(121^{\circ} \mathrm{C}\right)$ without cable, and $221^{\circ} \mathrm{F}\left(105^{\circ} \mathrm{C}\right)$ with pre-wired cable.
    (4) Roller can be converted in the field between horizontal and vertical.
    (5) Roller shaft is 0.38 in ( 9.5 mm ) Ionger on E50DS4, see Dimensions on Page V8-T2-66.
