MULTI-SENSOR SNOW MELTING CONTROLS

MSC1 – The MSC1 controller is a commercial grade unit suitable for controlling snow and ice melting of sidewalks, driveways, gutters, and downspouts. This control panel is capable of monitoring snow/ice accumulation in three separate snow melting application zones and issuing separate control signals for each zone. The MSC1 is housed in a suitable enclosure for commercial/industrial indoor applications (NEMA 4, 4X) and features an LCD display, programming and associated indicator lights for operation of each zone. The control signal relays operate external contactors. The MSC1 controller is UL Listed to US and Canadian Safety Standards.
