

UPRIGHT INDUSTRIAL

Upright brooms

Fused bristles are welded to lock the fibres into the block for less fibre fallout. Use where oil, solvent or water is present. The non-porous block and fibres can be paired with an aluminum acme-threaded handle to comply with wood-free regulations.

TRAILBLAZER & WAREHOUSE

The Trailblazer has flagged ends for trapping dust. The Warehouse is good for sweeping out corners in an industrial environment.

- Upright brooms have the perfect profile for sweeping smaller areas and getting into corners and around equipment.
- These brooms offer an alternative to traditional corn brooms and are better suited for high-humidity environments.

For food service, we recommend an aluminum or fiberglass handle. For colour-coded brooms, refer to the Food Hygiene section.

item	colour	size [in.]	fibre	pack
771	Warehouse, brown	9½	coarse	10
772	Trailblazer, grey	9½	medium	

DUAL ANGLE PRO

This professional grade dual angle upright has two holes for flexibility. The detachable broom heads are synthetic and resist moisture and chemicals. Choose the flagged heads (blue) for dust control. The black heads have a larger diameter fibre (non-flagged) for general sweeping.

Use the centre hole for a vertically straight handle. The offset hole pitches the handle 15° from centre allowing the user to reach underneath equipment without bending over. Replacement handle is the 2501.

comes complete with head and 48-inch ECM handle

item	colour	fibre	size [in.]	pack
78307	blue	fine	6	12
78310	blue	fine	9

2501		48-in ECM handle		24

These brooms partner well with upright lobby dust pans.

UPRIGHT COMMERCIAL

An upright for every budget

Upright brooms have the perfect profile for sweeping smaller areas, getting into corners and moving around and between equipment.

SWEEP-EZY™ UPRIGHTS

These sturdy plastic block uprights are filled with soft synthetic fibres suitable for the smoothest hardwood floors. Traditionally, these brooms have been called "magnetic," referring to the static charge they build up as they work across the surface to remove dust.

head and 48-inch handle			replacement head

781	small	10	780	small	24
796	large	12	784	large	12

LIGHTWEIGHT UPRIGHT

This lightweight upright has soft synthetic fibres suitable for smooth floors. It works like a "magnet" towards dust by building up a static charge as it sweeps.

RITE-ANGLE™

One of our best-selling, economy, synthetic fibre upright brooms. The 790 has an extra short handle suitable for use with an upright dust pan (10182).
