Greenlee Replaceable Tip Nail Eater... The NAIL EATER® R/T (Patent Pending)

Greenlee is proud to introduce the new Nail Eater® R/T. The new Replaceable Tip Nail Eater cuts **more than 175 holes** in wood with nails. That's **up to 9 times the life** of some traditional auger bits. Not only does the New Replaceable Tip Nail Eater last longer, it provides the convenience of just changing the tip instead of switching to a new bit after it's worn. This not only saves room in the tool bag, but money and time too.

The cutting edge is made from high quality tool steel, so it performs better than traditional auger bits when drilling in wood with nails.

REPLACE THE TIP NOT THE BIT!

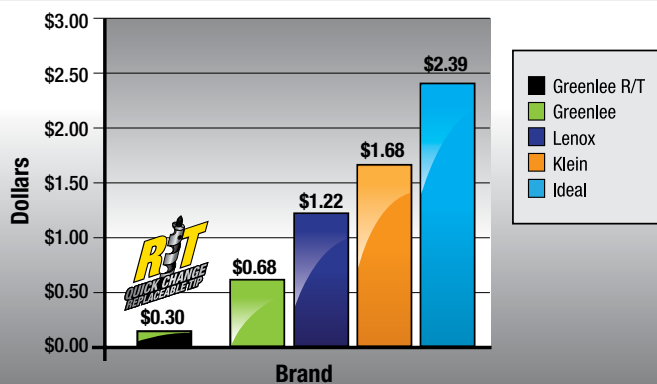

The new Nail Eater® R/T can be used in various woods including pine, green treated wood and telephone poles, providing maximum versatility. Just another way Greenlee makes the job faster, safer, and easier.

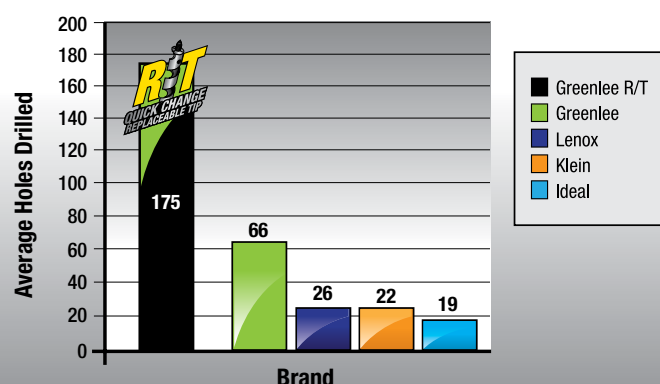

The patented tip pulls through the wood without pushing to finish the hole. The tool steel cutting edge prevents splintering for less mess and better results.

One Nail Eater® R/T = Up To 9 Traditional Auger Bits

Cost Per Hole Compared to Purchasing 3 Traditional Auger Bits*

Life of Nail Eater R/T vs. Traditional Auger Bits*

Based on 3rd party testing comparison to traditional auger bits when cutting in wood with nails.

Up To **9X** MORE LIFE
