Broan QSE Series Save a little every day

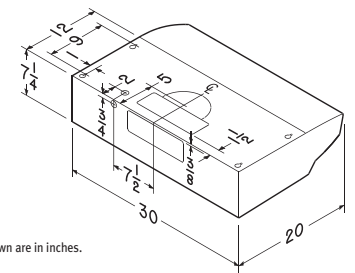

At Broan, we care about the environment. So we are proud to pursue our “going green” initiative with the launch of the QSE130 Series. This Broan Allure Series has received the HVI (*Home Ventilating Institute*) certification and is ENERGY STAR® certified. The QSE130 Series offers a **total energy savings of 564 kWh**.

Take home one of Broan’s QSE130 Series range hoods and do your part for the environment.

Compact fluorescent lighting

Our range hoods offer the best of both worlds: Cooking on a uniformly lit surface and energy savings, thanks to one compact fluorescent bulb (42-watt bulb that lasts 10,000 hours – five times longer than regular light bulb) and one night light 4-watt bulb.

Dimensions shown are in inches.

QSE130 Series

- **210 CFM*** at maximum speed
- **1.5 sones** at normal speed (110 CFM)
- Compact fluorescent lighting**
- Aluminum filters
- 120 V, 1.8 A

* Cubic feet per minute

** 1 compact fluorescent 42-watt bulb and
1 convenient 4-watt night light bulb (included)
