

Improving lockout efficiency

Panel Lockout

Need to lock out a panel? Get a more efficient lockout process with the **Panel Lockout**. **Instead of locking out individual breakers, this device effectively locks out all circuit breakers — at once.** That's because it attaches to closed panel doors. It offers easy installation with its one-piece design, and features an adjustable cable to fit a wide range of panel doors. For extra security, this device accommodates up to four padlocks, and works well with hasps. When you need to stay safe and improve lockout efficiency, get the Panel Lockout from Brady.

- **Attaches externally** — easy to install and remove with a one-piece design
- **Ultra-adaptable** — offers multiple attachment options for electrical panel doors
- **Travels light** — compact and lightweight; fits easily in a lockout bag or toolbox
