

CORN BROOMS

Going natural never goes out of style

Atlas Graham corn brooms are sized according to the blend of fibres, weight and construction of materials. The heavier duty, outdoor brooms have more fibre and a thicker, stronger handle.

CORN BROOMS

On the lighter side

These corn brooms have all the quality you have come to expect from Atlas Graham. The difference is size; the smaller the animal it's named after, the lighter and easier the broom is to use.

Atlas Graham corn brooms are sized according to how much fibre (corn, cane or grass) is in each broom. The heavier duty brooms have more fibre.

The 760 Mink is the little specialist with a short 30 x 13/16-inch lacquered handle and narrow sweeping path. This 100% corn broom is perfect for use with our lobby dust pan to remove debris from foyers. Pack: 12.
