# SITEMANAGER 15xx/35xx SERIES

Secure Remote Access and Data Collection in One Device

SiteManager is a security certified IIoT Edge Gateway in the Secomea Industrial Communications Solution programme that ensures unified, uninterrupted and secure access to remote industrial equipment.

The SiteManager 15xx/35xx series is a robust, DIN mountable industrial gateway that you install in machine control panels to provide remote access for on-demand, real-time servicing of industrial equipment.
As an additional feature, the SiteManager is capable of data collection, which allows service engineers to perform detailed cloud analysis for predictive and preventive maintenance of connected equipment.

- Single click configuration
- DHCP-enabled
- Alert capabilities between Devices and servers
- Security certified and built-In firewall
- Unique built-in troubleshooting functionality
- Intuitive user experiencee

Architecture & Key Features

Connect multiple devices simultaneously
Connect up to 100 devices of all types of industrial equipment via Ethernet, Serial or USB ports, using the equipment's native protocols (e.g. Modbus, PROFINET, EtherCAT; EtherNet/IP etc.).

Intelligent Data Collection Module
Collects data from field devices via e.g. Modbus OPC UA, CIP or S7, and pushes relevant data to popular clouds such as Azure, AWS, EcoStruxure Machine Advisor, Secomea DCC etc.

Easy & firewall friendly Internet access
Establishes access to the Internet through the firewall of the existing wired network infrastructure, and wirelessly by 4G/ LTE Global modem, or via WiFi.

Persistent store-and-forward database
Integrated Flash memory extends the RAM based store-and-forward database to ensure data integrity for not only loss of Internet access, but also power-loss. The offline period can be further extended by inserting a SD-Flash card.

Drag & drop SCADA tunnelling setup
LogTunnel support provides static tunnel connections to a central SCADA system, which operates concurrently with other services, such as on-demand access and data collection module.

3 port integrated managed switch
3 DEV/LAN ports configurable as bridged (normal switch) or individually managed ports with separate DHCP servers.
