

COMPLEMENTARY PRODUCTS

CONTINUITY TESTER

Lind's continuity tester allows you to test whether your equipment has been properly bonded or grounded. Once the bonding or grounding assembly has been attached between two objects, you need only attach the alligator clip from continuity tester to a metal surface at one end of the connection (e.g. safety can) and then touch the probe from continuity tester to clean metal surface at the other end of the connection (e.g. storage drum). The light will come on if there is good continuity between the two objects, indicating that bonding or grounding has been established. Light will not come on if there is over 10 ohms resistance.

F10XCT-5P

- + Continuity Tester, requires 2 "D" cells.
- + Comes with 5' of heavy rubber insulated black and red test leads (10' total spread).

WATER & GASOLINE PASTE

Water level indicating paste shows exactly how much water is present in your fuel storage tank, enabling you to pump out the precise amount from the tank. If the paste colour does not change, you can feel confident that no water is present in your tank.

Modified water paste has been designed for use in methanol and ethanol enriched fuels, including those with DEGMME fuel system icing inhibitors (FSII). Alcohols are soluble in fuels in all proportions when they are water free but relatively small amounts of water can cause separation of alcohol from the fuel. The mixture settling to the bottom of the storage tank is predominately alcohol and cannot be detected by normal water detection paste.

Gasoline level indicator paste ensures a highly accurate reading when gauging gasoline storage tanks. Simply spread a thin coating on a tape or gauge rod where liquid is likely to appear before lowering it into a tank. A sharp line of demarcation at the product interface is instantly shown. Works with gasoline, diesel, naphtho, kerosene, gas oil, crude oil, jet fuels, and other hydrocarbons.

PART NO.	DESCRIPTION	COLOUR CHANGE	PACKAGE
LEMW	McCabe Water Paste	Green to Red	3 oz. jar
LEKW	Kolor Kut Water Paste	Golden Brown to Red	3 oz. tube
LEKMW	Kolor Kut Modified Water Paste for regular and oxygenated fuels (Methanol, Ethanol, MTBE, Ether, etc.)	Varies depending upon fuel; see literature enclosed with product	2.5 oz. tube
LEKG	Kolor Kut Gas Paste	Light Pink to Red	2.25 oz. jar
