

Walker<sup>®</sup> Infloor Systems

## Walkerbox® Floor Box Covers

## 895/896 Series

## INSTALLATION INSTRUCTIONS

Walker<sup>®</sup> electrical systems conform to and should be properly grounded in compliance with requirements of the current National Electrical Code or codes administered by local authorities.

All electrical products may present a possible shock or fire hazard if improperly installed or used. Walker electrical products may bear the mark as UL Listed and/or Classified and should be installed in conformance with current local and/or the National Electrical Code.

- 1. Locate the outlet box and remove the top protector cap.
- 2. Pull necessary wires, following the National Electrical Code and/or local codes.
- **3.** If using a box with adjusting screws, adjust the floor plate to the proper height.
- 4. Apply a bead of acrylic latex around the box, sealing the opening between the box and the adjacent concrete.
- 5. Install a listed wiring device (not supplied by Walker), the fill-in plate (if required) and gasket.
- 6. Attach the floor cover (895 or 896) using the brass screws provided. Fasten securely.
- 7. Install the screw plugs or close covers when receptacle is not in use.
