IPS06-1LW

Occupancy/Motion detector, 180 Degree PIR Wall Box Sensor, 150W LED 600W Incandescent/Halogen, Single Pole and 3-Way, White, Wallplate/Faceplate not included.

Leviton's IPS06 Occupancy Sensor combines state-of-the-art technology with new aesthetics to provide optimal management of lighting loads. These energy-saving sensors are engineered to control current LED and Incandescent/Halogen loads and ensure that lights will turn ON automatically and turn OFF automatically when motion is no longer detected within the covered range. Designed to fit in a standard wallbox, the device offers 180° Field of View and 900 sq. ft. of coverage.

The IPS06 has screw terminals for easy installation and does not require a neutral wire for connection. The devices feature a time delay setting which allows users the option to delay the light load from switching off for 30 seconds, 5 minutes, 15 minutes or 30 minutes. For example, closet lighting would ideally be set to turn OFF 30 seconds after the space is vacated.

The IPS06 is single pole or 3-way, and is compatible with screw-based LED, Incandescent and Halogen loads.

Technical Information

Product Features

Auto-ON/Auto-OFF: Auto ON

California Title 24: No

Color: White

Coverage (Sq.Ft.): 180°, 900 Sq. Ft.

Ground Connection: No

LED Color: Green

Neutral: No

Ordering Notes: Included White, Ivory and Light Almond Color Kit

Pole: 1

Sensor Technology: Passive Infrared

Sensor Type: Occupancy

Standards and Certifications: UL, FCC

Style Name: Decora

Time Delay: 30S, 5M, 15M, 30M

Voltage: 120 VAC

Wallplate: Order Separately

Warranty: 5-Year Limited

Features and Benefits

- Automatic-ON/Automatic OFF operation for seamless energy management
- Low-Profile design eliminates an obtrusive "scanning device" look. Elegant styling compliments any interior and coordinates with Leviton's popular line of Decora® wiring devices
- 180 degree field-of-view provides approximately 900 square feet of coverage suitable for bathrooms, basements, garages, utility rooms and a variety of other residential areas
- Convenient push-button provides Manual OFF light switching at any time
- Segmented lens provides optimum sensitivity and performance. It is designed with an extensive "minor motion" area where even slight body movements will be detected
- Four optional manual adjustments for delayed-OFF time settings maximize energy savings: 30 seconds (for walking test), 5 minutes, 15 minutes and 30 minutes
- LED Indicator Light flashes when sensor detects motion to verify detection is active
- Fits in standard wallbox and replaces single-pole wall switch
- Neutral wire not required, suitable for retrofit and new construction applications
- Five-Year Limited warranty
