contents

This generation of panelboards from Siemens offers the high level of engineering and innovation you've come to expect from the leader in power distribution technology. The "P Series" line of panelboards offers a stepped approach to power distribution.

Additional strength has been added to an already rugged and durable panelboard family. Engineered specifically to provide maximum flexibility, the new designs simplify wiring and reduce material requirements making them easier to install and less costly than competitive products. At the heart of the product line is the extensive research and technology found among Siemens circuit protection devices – both fusible switches and molded case circuit breakers.

The line is anchored by the innovative P1. Featuring the industry's most flexible designs, the P1 virtually eliminates common errors, such as feed direction, and main lug versus main breaker. Increasing distribution is simplified by the ability to add feed-thru lugs. The Revised P1 design introduced in January 2015 has added Extended Circuits up to 66 and has available smaller Enclosures with no Subfeed option for added flexibility

Subsequent steps in the P Series offer increased capacity and more design options:

- The highly flexible P2 provides options to fit the most demanding specifications.
- Sized more like a lighting panel, the P3 packs the power of a distribution panel in a space-saving, highly flexible design.
- The P4 is a mid-sized distribution panel that allows both fusible and circuit breaker branch and main devices.
- The powerful P5 anchors the high end of the series. With larger fusible and circuit breaker branch and main devices, the venerable P5 delivers maximum power and flexibility to larger distribution systems.

Siemens also offers a number of specialty panels, like column panels, SEM3 (Embedded Micro Metering Module™), Disaggregation Panels (which are California Title-24 compliant), and others. Don't see a panel to meet your requirements? Ask your Siemens representative about our custom capabilities.

Features Overview

P Series lighting panel features include Fas-Latch trim, which is popular among installers; the jacking screw system, that permits adjustments even after wiring has been installed; our exclusive split neutral, and more. Many panelboards have the capability of mixing and matching breakers of different sizes and ratings – or changing from main lug to main breaker, or adding subfeed breakers without changing the box size. Other models accept a wide range of fuse types, including Siemens exclusive Vacu-Break® technology.

Key Panelboard Features

	P1	P2	P3	P4	P5
Power Panelboard Applications	—	•	•	•	•
Convertible From Top Feed To Bottom Feed Or Vice Versa	•	—	—	—	—
Change From Main Lug To Main Breaker Or Add Subfeed Without Changing Enclosure Size②	•	—	—	—	—
Space-Saving, Horizontally Mounted Main Breaker	Up To 250 Amps	Up To 250 Amps	Up To 600 Amps	•	•
Short-Circuit Rating Label Giving Performance Level	•	•	•	•	•
Standard Aluminum Ground Assembly	•	•	•	•	•
Blank End-Walls Standard①	•	•	•	•	•
Bolted Current-Carrying Parts	•	•	•	•	•
Split Neutral	•	—	•	—	—
Connection Accessible From Front	•	•	•	•	•
Screw-Type Mechanical Lugs	•	•	•	•	•
Time-Reducing Wing Nuts To Secure Interior Without Tools	•	•	•	—	—
Flush Lock, Concealed Door Hinges/Trim Screws	•	•	•	—	—
Symmetrical Interior Mounting Studs To Eliminate Upside-Down Mounting of Box	•	•	•	•	•
Interior Height Adjustment For Flush Applications	•	•	•	—	—
Mix and Match Fusible Switch Circuit Breaker Capability	—	—	—	•	•
Standard Depth and Width of Enclosure	5.75" x 20"	5.75" x 20"	7.75" x 24" (or 30")	10.00" x 32"	12.75" x 38"
Accepts Vacu-Break Fusible Switch with Wide Range of Fuse Types	—	—	—	•	•
Optional Compression Lugs	•	•	•	•	•

• Standard

① KO's available on P1 and P2 – 5.75" Deep x 20" Wide boxes and P3 7.75" deep X 24" wide boxes.

② For Revised P1, only when Subfeed Space is selected, Interior Part Number ends with "T". When "N" is at end there is no Subfeed Space available

Service Entrance Equipment

When a panelboard is used as service entrance equipment, it must be located near the point of entrance of building supply conductors. The National Electrical Code prior to 2020 allowed a maximum of six service disconnects in the same panelboard. The 2020 NEC now restricts panelboards to one service disconnect in a panelboard enclosure. Adoption of this code vary by a state or local jurisdiction. Consult the local code authorities to determine if this has been adopted in the area where the panel is to be installed and configure the panel accordingly. Also, panels must include a connector for bonding and grounding the neutral conductor.

UL67 requires barriers on single service disconnects to prevent inadvertent contact with uninsulated live parts. Siemens includes these barriers in all Factory assembled panels, marked as Service Entrance, and also has available Field Installable kits when needed.

Integrated Equipment Short Circuit Rating

The term "Integrated Equipment Short Circuit Rating" refers to the application of series connected circuit breakers in a combination that allows some breakers to have lower individual interrupting ratings than the available fault current. This is permitted as long as the series combination has been tested and certified by UL.

Standards

NEC: 2020 (where accepted)
NEMA: PB1.1
UL: 67, 50 and 50E. Listed by Underwriter's Laboratories, Inc., under "Panelboards" File #E2269, and #E4016. Meets Federal Specification W-P-115c.

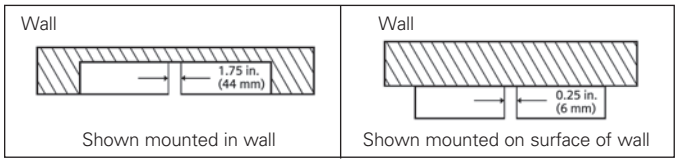
Wire Connectors③

Standard wire connectors in Siemens panels are suitable for copper or aluminum cables rated 60/75 degree. Copper main lugs are a price-added option for most panel types and some Circuit Breakers (check with Siemens sales for availability). It should be noted that most copper lugs will only accept copper cables. Some applications, 100% rated devices in particular, require that the cable and connectors be rated 90 degree but are sized to the 75 degree tables.

Standard ground connectors are also suitable for copper or aluminum wire. Ground connector assemblies (EGK, IGK) have (6) 1/0 max. and (15) #6 max. connections. The 1/0 holes are capable of connecting up (3) #10 max. wires. The #6 holes can accept up to (2) #12 max. wires. Copper ground assemblies (ECGK, ICGK) are rated for copper wire only and have the same wiring capacity as the Al/Cu connectors.

Standard neutrals③, like standard main lugs, are also rated for copper or aluminum wire. The neutral cross bar material follows the selection bus. Copper neutral lugs are rated for copper cable only and available as a price added option.

Lug Data
Space Required for Mounting of Double Panels

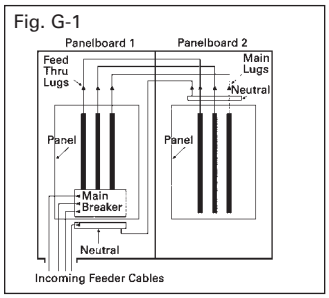


Use two or more panelboards with feed-thru or subfeed lugs when:

1. More circuit mounting space is required than is provided in the largest box size

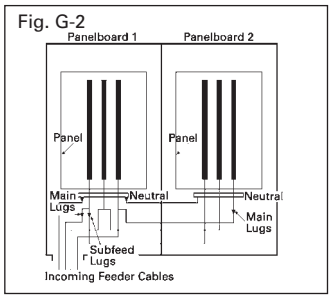
Feed-Thru Lugs

Fig. G-1



Subfeed Lugs or Double Lug

Fig. G-2



Feed-thru lugs are mounted at the opposite end of the main bus from the main lugs or main breaker and are used to connect two or more panelboards to the incoming feeder. The feeder cables are brought into Panelboard 1 and connected to the main lugs or main breaker. Cables interconnecting the two panelboards are connected to the feed-thru lugs in Panelboard 1 and are carried over the main lugs in Panelboard 2. This arrangement could be reversed with the main lugs located at the top and the feed-thru lugs at the bottom of the panel.

Subfeed lugs are mounted directly beside the main incoming lugs and are used to connect two or more panelboards to the incoming feeder. The feeder cables are brought into Panelboard 1 and connected to the main lugs. Another set of cables that are the same size are connected to the subfeed lugs of Panelboard 1 and are carried over the main lugs of Panelboard 2.

Note: P1 panelboards do not have subfeed lugs available. If this configuration is needed, move to a P2 or P3 panelboard.

Note: For Panelboards, Siemens uses this Document for the Operations and Maintenance manual: ANSI/NEMA PB 1.1-2013 [General Instructions for Proper Installation, Operation, and Maintenance of Panelboards Rated 600 Volts and Less (O&M Manual)]

** The PDF of this document can be downloaded (at no cost) for printing at this location:
https://www.nema.org/standards/view/Panelboards (ref. Material # 11-1056-01)

③ Reference info: Neutral Lugs are rated for 75°C cable. When running a circuit to a load, the same type of wire should be used on the phase (breaker) and neutral connections in the panel.
a) Cables should be sized per NEC Table 310.16 (formerly Table 310.15(B)(16)) and the 75°C column.
b) Customer can choose to use 90C cable if sized as if it is 75°C.
c) Some 100% rated circuit breakers require the use of 90°C cable sized per the 75°C column. Refer to the Markings on the breaker and use the appropriate cable.
d) Some Circuit breakers 100A or less are marked as being suitable for 60°C, 75°C or 60/75°C cable. Refer to the Markings on the breaker and use the appropriate cable.

Bussing Sequence

Interiors are designed to accommodate top or bottom feed. Regardless of which is specified, the uppermost pole is always on "A" phase; the second pole down is always on "B" phase, and the third pole down is always on "C" phase (assuming 3Ø panel).

As standard, branch breakers shall be mounted at the top of the panel with "spaces" at the bottom, regardless of the direction panel is fed.

All breakers have bolted connections except plug-in type. The panel design provides bracing up to 200,000A IR UL short circuit rating.

① Functional pricing is based on circuits shown. However, the panel can be figured with less circuits.
② P1 can have max. 1 subfeed breaker when Subfeed Space is available. P2 and P3 can have up to (2) FD subfeed breakers.
③ JD and FD breakers are mounted vertical. Limitations apply.
④ Trim ring provided for flush applications.
⑤ A maximum of (4) QR/3VA52/3VA62/61 breakers may be mounted in a P2 Panel and are single mounted.
⑥ A maximum of (6) QR/3VA52/3VA62/61 breakers may be mounted in a P3 panel in 24" wide enclosure. Up to 12 can be installed with 30" wide enclosure.
⑦ P1 panels with xGB/3VA41 are limited to interiors for xGB/3VA41 breakers only.
⑧ Factory assembled P1 has capability of 600Y/347V AC system when the proper breakers are selected.
⑨ BQD6 is not UL Listed. Only for CUL and CSA panels.
⑩ MCS can be used as a Main but not as a service disconnect or a branch.

① P3, P4, P5 enclosure height tables found on page 11-61, 11-97 and 11-112. These show the amount of unit space available.
② P1 Bus is either 250A max or 400A max.
③ Standard bussing in P1, P2 and P3 panels is tin-plated for aluminum and copper. Standard bus is temperature rated to the maximum amperage in the panel.
④ Not available for Revised P1 xGB interiors.
⑤ BQD6 is not UL Listed. Only for CUL and CSA panels

Type P1 unassembled panelboards are completely convertible from main lug to main breaker and vice-versa. Additionally, feed-thru lugs up to 400 ampere or subfeed circuit breakers up to 250 ampere can be added without increasing the box height for Revised P1 with "T" suffix, see the chart.

1. When BL/BQD or 3VA41/xGB Main Breaker is chosen as back-fed in unit space, the Main Breaker will use 2 or 3 positions of unit space and will reduce usable branch circuit space.
2. List catalog number and price of interior, box and front.
3. Select main lug kit or main breaker kit from appropriate tables.

Note: Main/Subfeed Breaker mounting kits may be ordered with or without breakers included, see page 11-13 and 11-14 for selection.

4. List required branch circuit breakers and filler plates to cover any unused positions.
5. Select any modifications or accessories.

Note: Revised P1 was introduced in 2015. All original P1 devices do not include the "Subfeed Space" Indicator. All original P1 included the Subfeed Space as standard.

P1 X 18 MC 250 A T

Type of Panel
P1

Voltage and System
X = 208Y/120, 3-Phase 4-Wire (C for Factory Assembled)
A = 120/240V, 1-Phase 3-Wire
E = 480Y/277V, 3-Phase 4-Wire
8 = xGB (or) 3VA41, 480Y/277V, 3-Phase 4-Wire (After 4/1/2020)
7① = xGB interior, 480Y/277V, 3-Phase 4-Wire (prior to 2020 cannot use 3VA41)

Circuits
18, 30, 42, 54* (*Revised P1 only)

Mains MC = Convertible mains
Select Main Lug Kit or Breaker Mounting Kit from pages 11-13 or 11-14

Amperage
250A max or 400A max only (typically 250A max Bus (or) 400A max Bus)②

Main Bus Material
A = Aluminum
C = Copper

Subfeed Space Indicator (for Revised P1 only) T = Subfeed Space Included

Note: Standard bussing in P1 panels is tin plated for aluminum and copper. Standard bus is temperature rated to the maximum amperage in the panel.

Revised P1 Branch Breaker reference

Revised P1 Branch Breakers in unit Space have a full range of capabilities.③ Only P18… series can accept both xGB and 3VA41 mixed in unit space. See Branch Breaker charts for more info.	Voltage reference	Breaker frame series (kA range)			
		BL	BQD	xGB	3VA41
	120/240V	10-65k	65k	100k	65-150k
	240V	10-65k	65k	100k	65-150k
	480Y/277V	—	14k	25-65k	25-65k
	480V	—	—	—	25-65k
	600Y/347V④	—	—	14k	14-25k
P1, Revised P1 interior type					
P1X = 208Y/120, 3-Phase 4-Wire		x	x	na	na
P1A = 120/240V, 1-Phase 3-Wire		x	x	na	na
P1E = 480Y/277V, 3-Phase 4-Wire (BL/BQD only)⑤		x	x	na	na
P18 = 480Y/277V, 3-Phase 4-Wire (xGB/3VA41 only)⑥		na	na	x	x

① xGB interiors changed to "8" code when 3VA41 capability was added in 2020. Main breaker code "7" will no longer be available.
② P1 panels use either 250A rated bus or 400A rated bus, regardless of the Main Breaker installed (or) MLO Amp rating chosen. Panels with 250A bus can have up to 250A Main Breaker or Main Lugs. Panels with 400A bus can have up to 400A Main Breaker or Main Lugs.
③ Consult sales office for availability of CSA.
④ 600V options are not available in a UPB panel – see factory assembled section. Factory assembled RP1 with 3VA41 is limited to 14KA at 600V and 42 ckts max. and must use with only screw to box trim.
⑤ See Speedfax for additional information.
⑥ Previous P17… series only accepted xGB series Branch Breakers – you cannot add 3VA41.

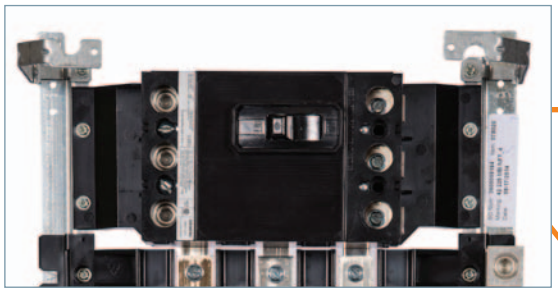
The standard Siemens P1 panelboard has some unique features that make it easier to design for an engineer, easier to reconfigure in the field for a contractor, and easier to upgrade and maintain for the Owner.

- The P1 is the smallest panel in the Siemens lineup, with bus sizes up to 400A.
- What makes it different is the split neutral design and the open ended bus. In the Siemens panel, instead of the common single neutral bus on one end, we have a neutral bus on both sides that is cross-bussed.
- This makes branch wiring simpler and cleaner – the lead lengths for line and neutral can now be made nearly the same, creating more room and a neater installation.
- It also allows access to both ends of the bus as a standard feature – this provides the flexibility to make changes in the field, even if it wasn't part of the original configuration.

New Revised P1 introduced in 2015 has extended circuits up to 66 available and also non-feed thru versions are available, without the Subfeed Space, in a 6'' smaller enclosure.

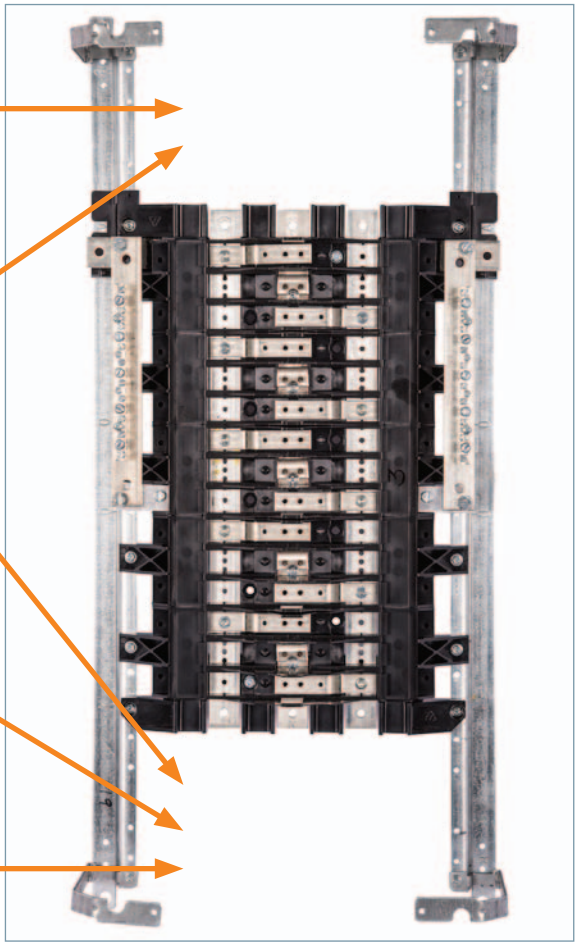
- In 2020 we introduced 3VA Main and Branch breakers as well as BT twin and BSPD Surge Products.

MAIN BREAKER or SUB-FEED BREAKER



MAIN LUGS or FEED-THROUGH LUGS

INTEGRAL BUS MOUNTED SPD



The following can be done to a standard P1 panelboard **in the field** with no modifications:

- Change from top fed to bottom fed
- Add feed-through lugs①
- Add an Integral bus-mounted SPD① (or new Branch Mounted BSPD)
- Add a sub feed breaker up to 250 amps①
- Change from Main Lugs to Main Breaker
- Change from Main Breaker to Main Lugs
- Panel may have up to two ground assemblies. Options are: (a) standard aluminum, (b) optional copper, or (c) optional insulated/isolated aluminum or copper. Mounting provisions in opposing corners of the box are standard. Any of these options may be added after installation.

① Only when Subfeed Space is selected/available.

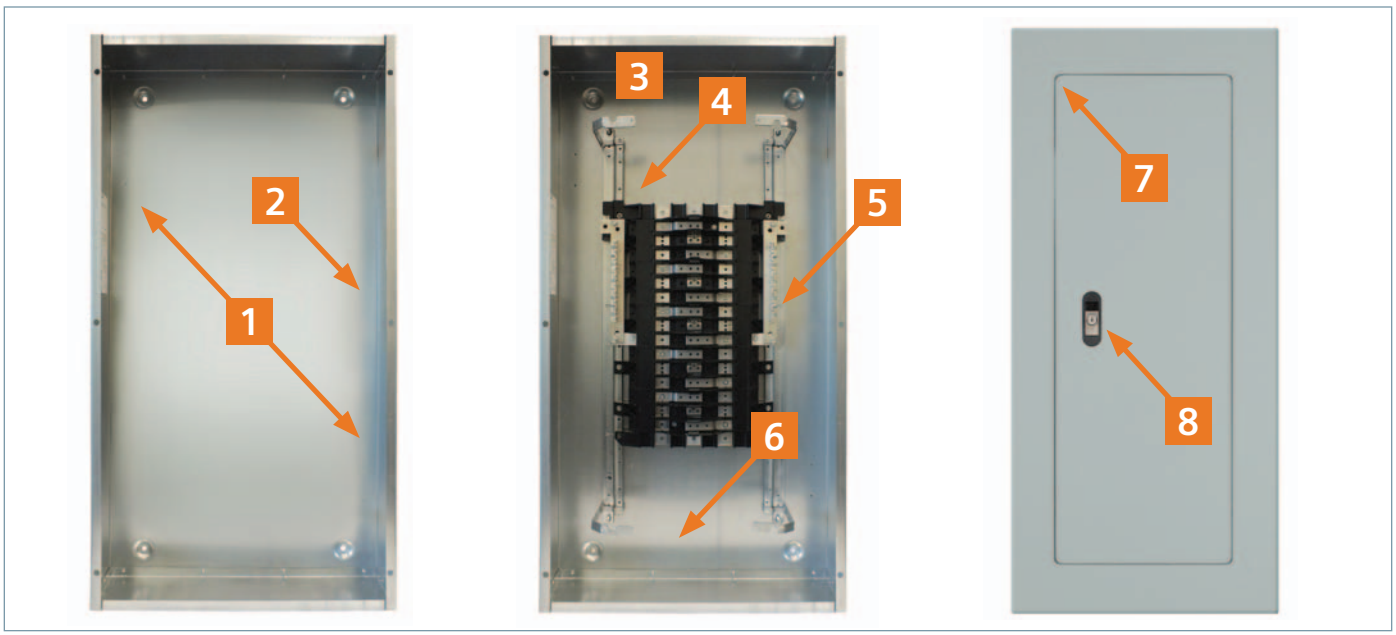
To better serve the needs of customers, Authorized Siemens Unassembled Panelboard Distributors offer product flexibility, quicker job turn-around, and affordable pricing. All Siemens unassembled panelboards are fully backed for high quality, trouble-free operation and are labeled as Suitable for use as Service Entrance Equipment.

Flexibility and ease of assembly:

Customer oriented design creates installation convenience. For all of its one-of-a-kind features, the P1 panelboard is also designed to be extremely user friendly. For instance, field convertible main breaker and main lug kits, (through 400 amps), will allow you to switch from main lug to main breaker, and vice versa with no change in box size or additional cabling. Plus, lay-in construction (for 250 A CU) and/or removable lugs make wiring the main and neutral lugs easier and faster.

To further speed wiring, as well as reduce clutter, the P1 panel also features a split neutral design and branch neutral connections which are closer to the breakers than competitors. Additionally, field addable sub-fed breakers (up to 250 amps) or feed through lug kits can be field installed without utilizing any of your feeder breaker positions or increasing your box height. Furthermore, the unique design allows the panel to be inverted in the field and keep its labeling legible.

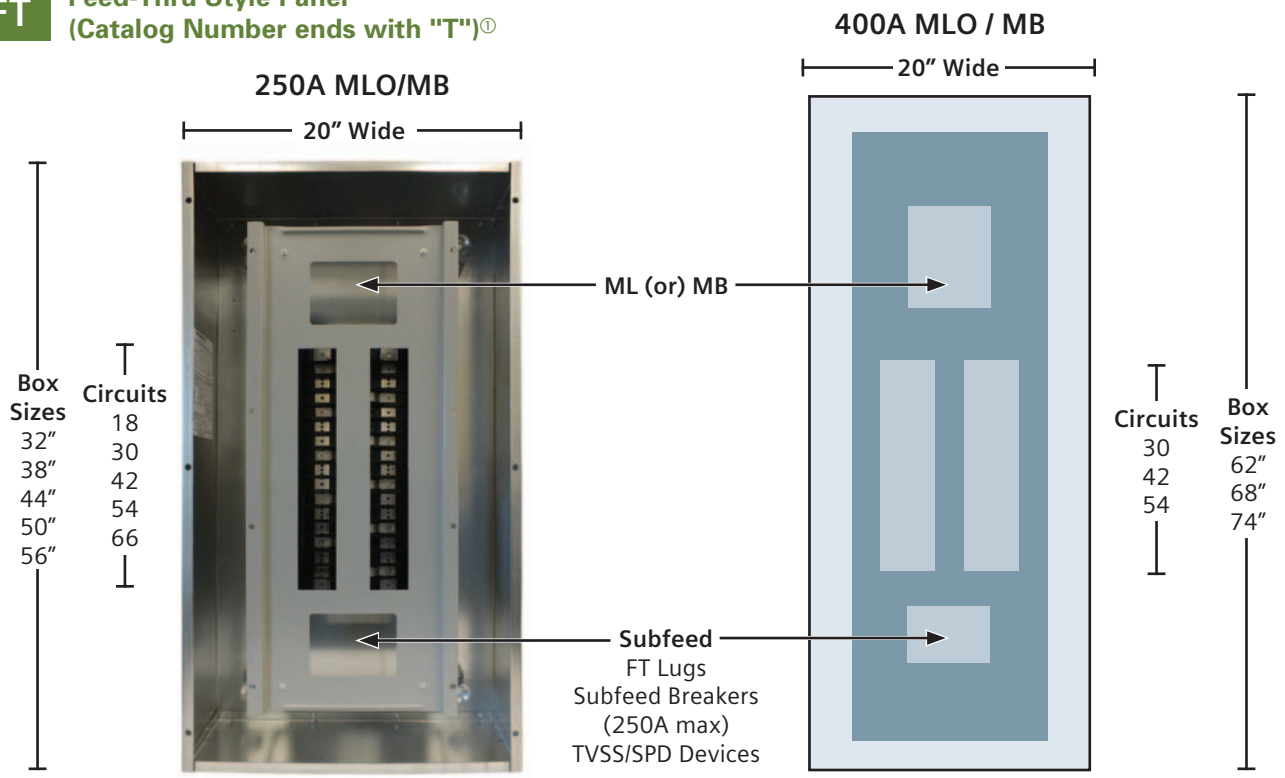
1) Completely symmetrical Type 1 boxes may be mounted with either end up. There are two pre-punched equipment ground connector locations for contractor friendly installation.
2) Box comes pre-punched for optional, field installable door-in-door or hinged style trims. There are also two or more pre-punched ground connector locations. The panel box will accept both standard ground connector (EGK and ECGK) assemblies and insulated ground connector kits (IGK and ICGK).
3) Interior mounting is completely symmetrical allowing it to be changed from top to bottom feed by simply rotating the interior.
4) Choose either a Main Breaker kit or Main Lug kit with which to terminate your incoming cables. Main lug kits are contractor friendly lugs through 350 kcmil (250 amp panel), (1) 600 kcmil or (2) 250 kcmil connectors for 400 amp panels. No line connectors in the P1 panel require multiple wires under one screw. Main Breaker kits (250 amps and below) are horizontally mounted allowing field convertible top or bottom feeds to be performed easily. MLO kits and Main Breaker Kits are interchangeable and can be changed/added in the field without making changes to the enclosure or interior.
5) Branch neutral connections are near the breaker connections to speed wiring and reduce clutter. The standard P1 neutral is rated for 100% of the panel's ampacity and will accept copper or aluminum wire. Optional 200% and 2/0 neutral kits are also available. (2/0 max. Neutral strips are now standard on all xGB/3VA41 Interiors.)
6) The panel includes space to add (1) sub-feed breaker (max 250 amps), feed-thru lugs or one TPS3 or TPS4 (SPD) kit. (Branch mounted BSPDs are also available for Surge Protection Flexibility.)
7) Siemens standard trim has hidden hinges and mounting hardware for added safety. The rounded door corners not only enhance the panel's appearance but also help to eliminate injuries caused from sharp corners.
8) Semi-flush lock comes standard. Easily identified locked position denoted by keyway being horizontal when door has been locked.



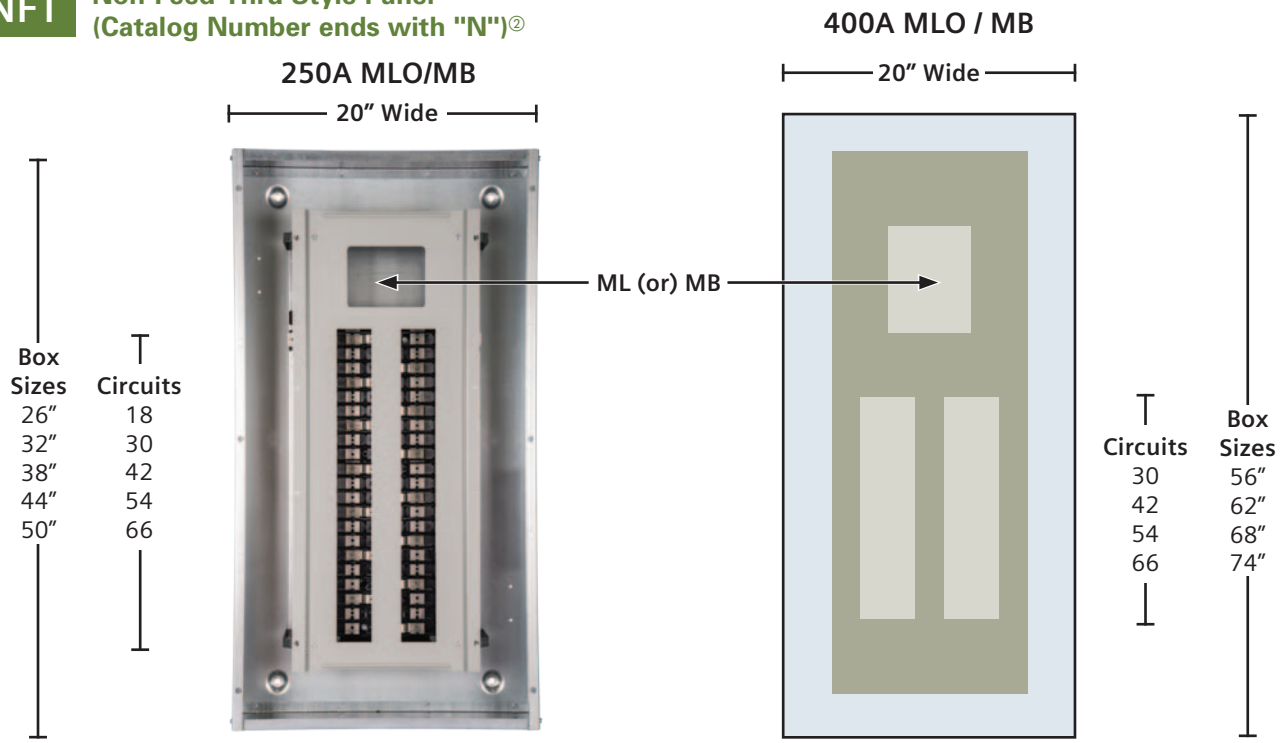
Invertablity and Flexability!

All FT and NFT are invertable in field – Top-feed or Bottom-feed

FT Feed-Thru Style Panel (Catalog Number ends with "T")①



NFT Non-Feed-Thru Style Panel (Catalog Number ends with "N")②

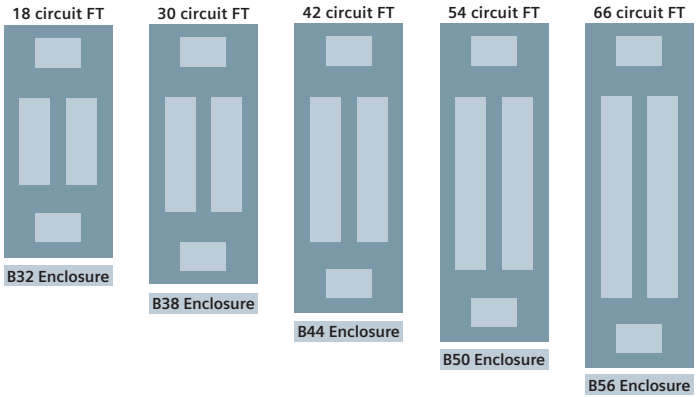


① 66 circuits only for Factory Assembly.

② Not available for UPB.

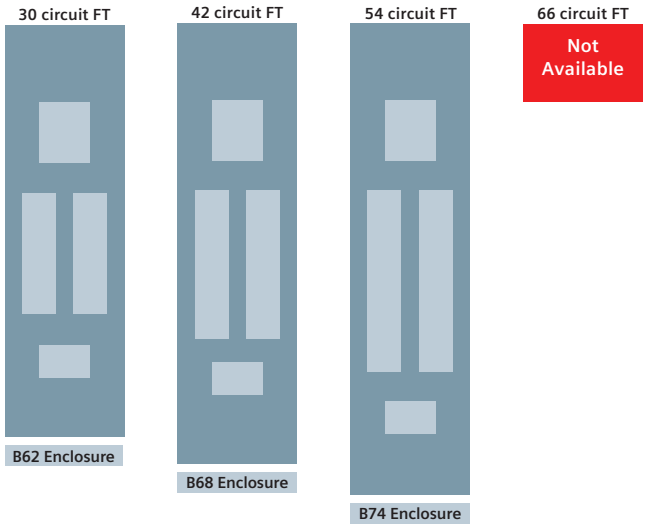
Revised P1 Panelboard 250A and 400A

FT 250A Configurations Feed-Thru Style Panel

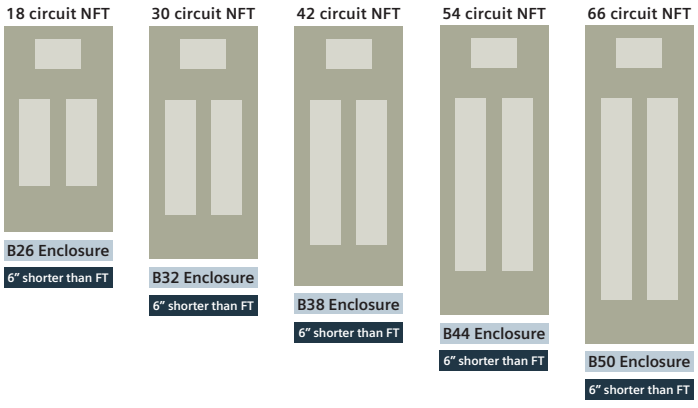


NFT configurations below are 6" shorter than FT with same circuit count

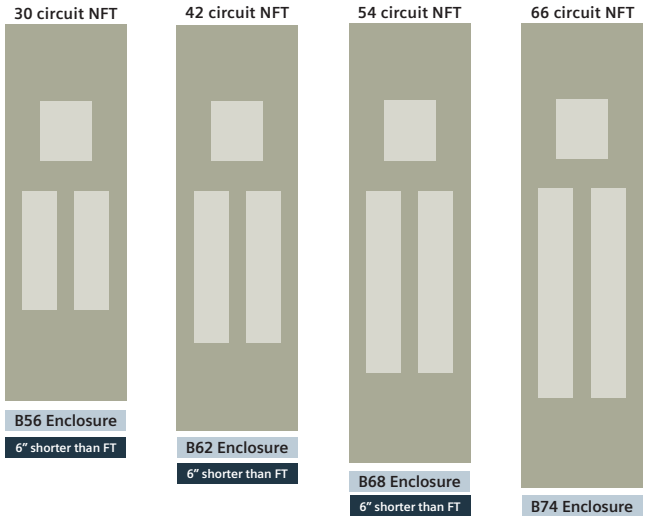
FT 400A Configurations Feed-Thru Style Panel



NFT 250A Configurations Non-Feed-Thru Style Panel



NFT 400A Configurations Non-Feed-Thru Style Panel



Configuring An Unassembled Panel

400A Max. — 20" Wide x 5.75" Deep

1. Choose the appropriate Interior from the table below.
2. Choose the Main Device: Main Lugs from page 11-13, Main Breaker Kit from pages 11-13 to 11-14 and Main Breakers needed for strap kits separately from Section 7.
3. Choose Branch Breakers: BL, BQD, xGB, 3VA41 (or) AFCI/GFCI from tables on pages 11-16 thru 11-19 or Section 7.
4. Choose Feed-Thru Lugs or Subfeed Breaker Kit from pages 11-13 to 11-14 and Subfeed Breaker for Strap kits from Section 7 (250A max.).

① These Main Breaker Kits are Make to Order only – expect extended lead-times.

Branch Breakers Selection for P1

Selection Guide

1. Select breaker type.
2. Select required amperage.
3. Select number of poles.
4. Select branch breaker catalog numbers.
5. Select ground bar and filler plates. (See replacement parts & accessories on Page 11-13.)

300A Main installed. These Revised P1 kits can now be used as top or bottom feed.

S1/S2 Panels—All the original P1 panel kits for 250 amp and below panels will work for 250 amp maximum S1/S2 panels (will not work for S1/S2 400A and above).

Note: Revised P1 kits will not work with S1/S2 or SE Panels.

Original P1 Kits

Original P1 Main or Subfeed Strap Kits without Breakers and MLO kits

S1/S2 Panels—All the original P1 panel kits for 250 amp and below panels will work for 250 amp maximum S1/S2 panels (will not work for S1/S2 400A and above).
Note: Revised P1 kits will not work with S1/S2 or SE Panels.

Strap kits for Original P1 product only - Breaker kits not available

Other applications:
For P4/S4 and 10" deep SPP panels see page 11-104 for branch breaker mounting kits.
For P5/S5 and 12.75" deep SPP panels see page 11-119 for branch breaker mounting kits.
For P4/F1 and 10" deep FPP panels see page 11-104 for branch fusible switch mounting kits.
For P5/F2 and 12.75" deep FPP panels see page 11-119 for branch fusible switch mounting kits.
For Series 5, Series 6, CDP6 and VB 6 panels as well as FC20, FCI, FCII, SB1, SB2 and SB3 distribution switchboards, see page 12-32 for branch device mounting kits.

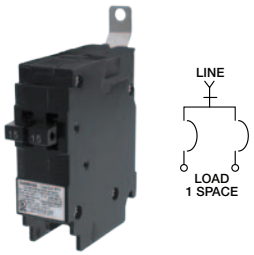
BT Twin Family Circuit Breakers

The Space saver duplex breakers combine two independent 1/2" breaker poles in a common unit. This unit bolts into any location that would typically fit a 1-pole BL breaker and requires only 1" of panel space.



Replacement for 1-pole BL series (15A & 20A only)

Amp Ratings	Width	Circuits	BT (10k AIC)	BTH (22k AIC)	Details

Spare Parts Kits for Revised P1 Panels

Kit Number	Current Product: P1 Revised	P2	P3	C1	C2	Old Product is no longer Manufactured, some kits are available: P1 Original	S1, S2, SE	qty/ kit	Product Description Note: Some kits apply to only specific enclosures used or configurations of the product listed	Drawing # ref for part or kit
Deadfront Parts										
NBK01A	X					X		1	Number Strips 1–60. Stick-on type; Use w/ P1 series Panels – includes 1/2" spacing numbers for BT twins	replaces NBK03
NBK02A	X					X		1	Number Strips 61-120. Stick-on type; Use w/ P1 series Panels – includes 1/2" spacing numbers for BT twins	replaces NBK04-05
NBK03A	X					X		1	Number Strips 121-240. Stick-on type; Use w/ P1 series Panels – includes 1/2" spacing numbers for BT twins	replaces NBK06-08
P1DFS250AFT	X							1	P1 250A Deadfront Support - for Feed-thru interiors only (4 per interior) Part # 11-D-3323-01 (replaces # 11-D-3212-01)	11-D-3323
P1DFS250ANFT	X							1	P1 250A Deadfront Support - for Non Feed-thru interiors only (4 per interior) Part # 11-D-3323-02 (replaces # 11-D-3212-02)	11-D-3323
P1DFS400A	X							1	P1 400A Deadfront Support (new for 3VA) - for both FT and NFT interiors. (#11-D-3315-01 replaces # 11-D-3004-01) (4 per interior)	11-D-3315
Filler Plates										
DFFP1A	X	X	X	X	X	X	X	1	DFFP1A Blank filler , 1 inch snap-in, replaced old QF3 and DFFP1 in Systems Products. Ref. old #12-1800-01 and 11-D-4554-01	11-D-4613-01
DFFP01B	X			X		X		1	P1 Main or Subfeed 250A Blank Filler Plate (use for Original or Revised P1 - also replaces DFFP01A/11-D-4560-01/12-A-1801-01) (Installs Vertical for 400A Main w/small DF opening)	11-D-4612-01
DFFP01C	X							1	P1 Main 400A Blank Filler Plate (use for Revised P1 400A with Large MB opening only)	11-D-4600-01
DFFPVA41A	X							1	RP1 Main/Sub-feed, 3VA4/BL/BQD/ED/xGB filler (replaces DFFPED01 / 12-A-1802-01)	11-D-4604-01
DFFPVA5262A	X							1	RP1 Main or Subfeed Filler 3VA52/61/62 – new filler for P1 150A-250A 3VA frame breakers	11-D-4617-01
DFFPVA5363A	X	X	X					1	RP1 400A Main Filler 3VA53/63 (also used in P2/P3 applications) – for RP1 Deadfronts with Large MB opening only	11-D-4599-01
MBKVA5363JD	X							1	RP1 400A Main only Filler 3VA53/63 – for Deadfronts with Small MB opening only (replacing a JD Main)	tbd - being developed
DFFPED01 (replaced by DFFPVA41A)	X					X		1	P1 Main Filler 100-125A frames ED, BL/BQD or xGB (old filler used for Original or Revised P1 and other applications)	12-A-1802-61
DFFPFD01	X	X	X			X	X	1	FD Main Filler Plate for 1-Ph and 3-Ph P1 Panels (use for Original or Revised P1 and other applications)(P2/P3 and S1/S2/SE)	12-A-1803-61
DFFPJD01	X	X	X			X	X	1	JD Main Filler Plate for 1-Ph and 3-Ph P1 Panels – Small MB opening (use for Original or Revised P1 & other applications)(P2/P3 & S1/S2)	11-D-4522-61
DFFPJD02	X					X		1	JD Main Filler Plate for 1-Ph and 3-Ph – for P1 Panels with Large MB Opening only.	11-D-4598-01
DFFPQJ01	X					X		1	QJ Main Filler Plate for 3-Phase (3-pole) P1 Panels (use for Original or Revised P1 and other applications)	12-A-1804-61
DFFPQJ02	X					X		1	QJ Main Filler Plate for 1-Phase (2-pole) P1 Panels (use for Original or Revised P1 and other applications)	12-A-1804-62
MBKQRFK	X					X		1	P1/Revised P1 Filler for 1PH/3PH QR. Horizontal Mount only.	11-D-4563-01
Service Entrance Barriers Kits (SEB)										
SEBKRP1V1	X							1	SEB Kit for RP1 with FD, QJ or QR Horizontal Main	11-A-1148-01
SEBKRP1V2	X							1	SEB Kit for RP1 with ED Horizontal Main	11-A-1148-01
SEBKRP1V3	X							1	SEB Kit for RP1 with back-fed BL/BQD Main in Unit Space	11-A-1149-01
SEBKRP1V4	X							1	SEB Kit for RP1 with back-fed xGB Main in Unit Space	11-A-1149-01
SEBKRP1V5	X							1	SEB Kit for RP1 with BL/BQD/xGB Main - with steel breaker brackets	11-A-1165-01
SEBKRP1V6	X							1	SEB Kit for RP1 with BL/BQD/GB/3VA41 Main - with all plastic strap kit	11-A-1194-01
SEBKRP1V7	X							1	SEB Kit for RP1 with 3VA52/61/62 Horizontal Main	11-B-1060-01
SEBKP1P2P3V1	X	X	X					1	SEB Kit for RP1 with RP1/P2/P3 with JD/LD or 3VA53/63 Vertical Main	11-A-1157-01
Ground Bar & Bond Kits										
BK1A	X							1	Revised P1 Bonding Kit including Service Disconnect Label	11-A-2024-01
ECGK	X	X	X			X		1	ECGK Copper Ground Bus Kit, Connection count: (6) of #14-1/0 and (15) of #14-6 Connections (21 Holes total). Some connections allow multiple wires.	11-A-2024-01
EGK	X	X	X			X		1	ECGK Al/Cu Ground Bus Kit, Connection count: (6) of #14-1/0 and (15) of #14-6 Connections (21 Holes total). Some connections allow multiple wires.	11-A-2024-01
ICGK	X	X	X			X		1	ICGK Insulated Copper Ground Bus Kit, Connection count: (6) of #14-1/0 and (15) of #14-6 Connections (21 Holes total). Some connections allow multiple wires.	11-A-2024-01
IGK	X	X	X			X		1	IGK Insulated Al/Cu Ground Bus Kit, Connection count: (6) of #14-1/0 and (15) of #14-6 Connections (21 Holes total). Some connections allow multiple wires.	11-A-2024-01

Lighting panel ground bus information: P1-P2-P3

Catalog Number	Description	Comments
EGK	Al Ground Bus 44 Connections	Type 1, 3R, 3R/12
ECGK	Cu Ground Bus 44 Connections	Type 1, 3R, 3R/12
IGK	Insulated Al Ground Bus	Type 1, 3R, 3R/12
ICGK	Insulated Cu Ground Bus	Type 1, 3R, 3R/12

EGK / ECGK / IGK / ICGK Installation Instructions:

Ground bus to be mounted in either left or right gutter with hardware provided. Applied torque ratings shall be 45-lbs-inch for three No. 10 AWG solid copper conductors in the large holes. For all other combinations of conductors, refer to the torque rating label on the panelboard.

Note: For IGK / ICGK, insure ground bar is attached to Glastic insulator with two screws before mounting insulator to enclosure. Ground Bar mounts thru side holes oriented as shown on picture below.

Construction notes:
a) AL Ground bus kits can be used with either AL or CU Cable.
b) CU Ground bus kits only accept CU Cable.

Wire size range of the EGK/ECGK/IGK/ICGK lug connections/holes:

(Note: The multiple combinations typically only apply when used as an equipment ground. If similar bar is used as a neutral bar, only one wire can be used in each hole.)

1. Connection count: (6) of #14-1/0 and (15) of #14-6 Connections (21 Holes total). (note: one Connection may be needed for incoming Ground Connection)
2. The Maximum wire size the standard ground accepts is: 1/0 in the Large Holes and #6 in the Smaller Holes.
3. Small Hole can accept: (1-2 wires) #14-12; (1 wire) #10; (1 wire) #8-#6.
4. The Large Hole can accept: (1-3 wires) #14-#10; (1 wire) #8; (1 wire) #6 - #4; (1 wire) #3-1/0.
5. Max. connections if largest wire size is used: (6 x 1) + (15 x 1) = 21
6. Max. connections if smallest wire size is used: (6 x 3) + (15 x 2) = 48
7. Request for Ground Lug greater than 1/0 in Size requires a Special Modification in COMPAS when Line Item is entered (specify number of connections needed greater than 1/0) or Manual Line for Custom Ground (specify number of connections needed greater than 1/0).

This chart is on labels for P1, P2 and P3 enclosures.

Note: Ground bus mounting locations may be available in alternate corners from shown below, or all 4 corners in some enclosures.

USE SIEMENS EQUIPMENT GROUND BUS
TYPES EGK, IGK, ECGK, ICGK

Torque required to secure wire sizes listed below:

Small Terminal	
(1-2 Wires)-#14-#12	20 lb-in
(1 Wire)-#10	20 lb-in
(1 Wire)-#8-#6	30 lb-in

Large Terminal	
(1-3 Wires)-#14-#10	35 lb-in
(1 Wire)-#8	40 lb-in
(1 Wire)-#6-#16	45 lb-in
(1 Wire)-#3-1/0	50 lb-in

G1	P3	Branch	NEB/HEB	Horiz.	**EBF1**	EB Filler Plate	11-D-4529-01	EB Deadfront Filler
G2	P3	Branch	BL, BQD, ED, xGB or 3VA41	Horiz.	**DFP3AP01**	Used for filling space in a P3 dead-front when a BL, BQD, ED, xGB or 3VA41 branch breaker is installed. Can be replaced in field if lost or damaged.	11-D-3033-01	P3 BL/BQD/ED/xGB/3VA41 adaptor plate 3" - 1 Piece per pack

① 1" Branch circuit filler plate (used for BL/BQD/xGB/xGB2/ED/3VA41 blank positions. Suiteable for replacing QF3 and DFFP1 in P1-P5 Panelboards and Switchboards). Also used to fill void where a 2-pole breaker is installed in a 3-pole position in various applications.
② QF3/DFFP1 compatability
a) DFFP1 fits tighter in the opening than the QF3 (small spring tabs are stronger on the sides, but otherwise almost identical). thus DFFP1 will not slide out of place without some force being applied).
b) In a P1-P2-P3 deadfront, a QF3 will slide out of position when the deadfront is removed from the panel. This makes it difficult to put the deadfront back on the panel.
c) Both the QF3 and DFFP1 are approved for use in all panelboards and switchboards. However, only QF3 is approved for use in residential products (load centers, meter combos, etc.

Revised Type P1 - General Specifications

480V AC Maximum
600Y/347V AC Maximum (limited applications)
400 Ampere Max. Mains
250 Ampere Maximum Branch
UL Short Circuit Rating — 200,000 A. @ 240 Vac / 100,000 A. @ 480/277 Vac. IR Maximum

Branch Breaker Symmetrical Interrupting Capacity

Based on Underwriters' Test Procedure

Feed thru and subfeed lugs may result in lower interrupting ratings if not protected by a main device. Consult sales office.

Standards

NEC: 2020 (where accepted)
NEMA: PB1.1
UL: 67, 50 and 50E. Listed by Underwriter's Laboratories, Inc., under "Panelboards"
File #E2269, and #E4016.
Meets Federal Specification W-P-115c.

Service

1-phase 2-wire - 120 Vac, 240 Vac

1-phase 3-wire - 120/240 Vac

3-phase 3-wire - 480Y/277 (when derived from 3-phase 4-wire system), 480 Vac, 347 Vac, 240 Vac, 120 Vac

3-phase 4-wire - 208Y/120 Vac, 480Y/277 Vac, 600Y/347 Vac, 380/220 Vac (see complete list in table on page 11-6)

Panelboard Fronts and Doors

Standard panelboards are furnished with trim featuring concealed fasteners and hinges with a flush door lock. All are factory-assembled for ease of installation. Fronts are fabricated from code gauge steel and finished ANSI-61. See page 11-37 for optional fronts.

Main Breakers

BL, BLH, HBL, NGB, HGB, LGB, BQD, ED4, ED6, HED4, QR2, QRH2,HQR2, HQR2H, FXD6, FD6, HFD6, HFXD6, JXD6, JD6, HJXD6, HJD6, 3VA41/52/61/62/53/63. (All main breakers except 400 amp frame are mounted horizontal.)

Note: Revised P1 interiors with BL, BQD, GB or 3VA41 Type Mains can be Back-fed in unit space. See special Notes for unit space reduction.

Main Breaker Panel Connectors⑦

Ampere Rating	Connectors Suitable for Cu or Al
100	(1)—#14 1/0 AWG
125	(1)—#4 1/0 AWG
225	(1)—#4 AWG–300 kcmil
250	(1)—#4/0 AWG–350 kcmil Al (1)—#6/0 AWG–350 kcmil Cu
400①	(2)—#3/0 AWG–250 kcmil Al or (1)—#3/0 AWG–500 kcmil Al

Connector ranges indicated do not apply to all main breaker types. Refer to molded case circuit breaker standard pressure wire connector chart (Section 7) for the connector range of a specific frame.

Main Lug Connectors⑥

125	(1)—#6 AWG–350 kcmil
250	(1)—#6 AWG–350 kcmil
400 std.	AL (2) 1/0-250 kcmil or (1) #2 AWG–600 kcmil
400 opt.	CU (2) 1/0–4/0 or (1) 110–600 kcmil
400 opt.	AL (1) AL 1/0–750 kcmil (2) AL/CU 250 kcmil max. [max. (1) 600 kcmil (1) wire]

Boxes

20" wide, 5.75" deep

- End walls are blank as standard.
- End walls with knockouts are available for 5.75" deep enclosures, if requested at time of order, and are available as a field installable kit.

Weight — Approximate

Total panelboard weight when filled with a normal quantity of breakers and accessories is:

- About 3 lbs. per inch of box height

Gauge Steel Boxes (Type 1)

Width	Height	Gauge Steel
20"	All	#16

Fronts — Surface, Flush (Type 1)

20"	All	#14

Series Connected Short Circuit Ratings

The term "Series Connected Short Circuit Rating" refers to the application of series connected circuit breakers in a combination that allows some breakers to have lower individual interrupting ratings than the available fault current. This is permitted as long as the series combination has been tested and certified by UL.

See Circuit Breaker Section of this book. Series ratings must be specified on order at time of entry.

① P1 400 amp main breaker panels have wire bending space available for 600 kcmil.
② 400A main breaker is vertical mounted.
③ Feed-thru lug wire bending space is 15.000" and neutral wire bending space is 15.880" on 400A panel.
④ P1 panel limited to (1) subfeed 250 amperes max.
⑤ See Branch Breaker Side Gutter Chart for Revised P1 Backfed Options.
⑥ See complete list of MLO connectors on page 11-27.
⑦ Reference info: Neutral Lugs are rated for 75°C cable. When running a circuit to a load, the same type of wire should be used on the phase (breaker) and neutral connections in the panel.
a) Cables should be sized per NEC Table 310.16 (formerly Table 310.15(B)(16)) and the 75°C column.
b) Customer can choose to use 90C cable if sized as if it is 75°C.
c) Some 100% rated circuit breakers require the use of 90°C cable sized per the 75°C column. Refer to the Markings on the breaker and use the appropriate cable.
d) Some Circuit breakers 100A or less are marked as being suitable for 60°C, 75°C or 60/75°C cable. Refer to the Markings on the breaker and use the appropriate cable.

For inches / millimeters conversion, see Application Data section.

Shown with Standard Mains, Top Fed and Surface Trim
Catalog number is for aluminum main bus. For optional copper main bus change "A" in position 11 to "C".

Panels are top feed, surface mounted. For bottom feed, change "T" in position 12 to "B". For flush mounting, change "S" in position 13 to "F".

Replace fifth and sixth position in panelboard catalog number, with alternate main breaker code.

Note: Original P1 was produced until 2015 and in January the revised P1 was introduced. All interior numbers that end with "T" or "N" are the new Revised interiors. "T" at end of catalog number indicates there is a Subfeed area available. "N" at end of catalog number indicates there is no Subfeed area available.

① For all products without subfeed space - change "T" at end to "N" and reduce box size by 6".

② No sub-feed space only for 400A 66 circuit.
③ BL/BQD/GB Type Mains are only available as Back-Fed. No kits are available for use in Main or Sub-feedspace. (GB Type includes NGB, HGB and LGB Breakers). These breakers take up branch circuit space.
④ xGB interiors are not available as Non-Feed-Thru, without Subfeed Space.
⑤ 16 GA std., Optional 14 GA & 12 GA Enclosures only.
⑥ 14 Gauge Steel only.
⑦ 16 Gauge Can w/ 14 Gauge Front.
⑧ The Revised P1 (18 circuit 250A only) is limited to 100A per connection (200A per pair) when installing BL/BQD or xGB Branch Breakers across from one another. 3VA41 does not have this restriction. All other configurations allow 125A per connection max. (250A per pair max.)

① Estimated weights are for Aluminum bus MLO panels and vary by MB and installed Branches
② BT - twin style breakers are available in 15A and 20A only and provide two 1-pole circuits in 1" of unit space. The maximum Qty. of BT twins allowed in a panel is restricted to the max. number of neutral positions and/or physical space available, whichever is lower. Values shown are recommended maximums.
③ BT twins can only be used in BL/BQD RP1 panels. The xGB series of interiors do not accept BL/BQD or BT style of breakers.

Note: Main breakers use breaker connectors. For sizes, see breaker connector chart. 400A MLO Panels have wire bend space for 600kcmil CU & AL wire when using standard lugs. With optional 750kcmil AL/CU connectors, wire bend space is available for up to 750kcmil AL wire, but is still limited to 600kcmil CU wire.

① Unit space is 1 inch per pole, except for Special Application with accessory included.
- No branch kits available, unit space for all branch positions is twin mount.
- Branch space is either for BL/BQD only (or) for xGB/3VA41 only. (after 3VA41 is made availabe).

② BLG: Two-pole breaker is one phase and neutral. Three pole is two phases and neutral
- See SpeedFax Page 7-31 for additional info. Some are Built to order. Allow 2-3 weeks delivery.

③ DC Voltage Systems are not approved for use in P1 panels. Refer to P2/P3 panels if DC Voltage Systems are needed.

④ 110A-125A BL/BLH (2-pole only) available as Main or Subfeed only in Revised P1 panels.

⑤ Approved for CSA and UL Listed.

⑥ Approved for CSA but not UL Listed.

⑦ BT and BTH are only available in 15A and 20A with two 1-pole circuits in one inch of unit space.

Table P1-13 – Main Breaker Gutter Dimensions Inches (mm)

Main Breaker	Gutter Space inches (mm)		Neutral Location to Endwall
	20" wide box	24" wide box	20" wide box
BL, BLH, HBL②	8.500 (215)③	10.500 (267)③	10.000 (254)
BQD②	7.750 (196)③	9.750 (248)③	10.000 (254)
NGB, HGB, LGB②	7.500 (190)③	9.500 (241)③	10.000 (254)
ED4, ED6, HED4	6.125 (156)	8.125 (206)	10.000 (254)
QR2, QRH2, HQR2, HQR2H	6.500 (165)	8.500 (216)	10.000 (254)
3VA41	7.250 (184)	9.250 (235)	10.000 (254)
3VA52	6.750 (171)	8.750 (222)	10.000 (254)
3VA61/62	6.250 (159)	8.250 (210)	10.000 (254)
3VA53/63① Double / Single Port	7.500 (190) / 12.250 (305)	14.750 (375) / 12.250 (305)	24.500 (622)
FD6, FXD6, HFD6, HFXD6	5.250 (133)	7.250 (184)	10.500 (267)
JD6, JXD6①	15.000 (381)	15.000 (381)	26.500 (674)

① 3VA53/63 or JD frame mounted vertically.

② For Revised P1 with Back-fed Main option, use Side Gutter Wiring Spec Table P1-15.

③ These dimensions are for Revised P1 only. See Original P1 cut sheets for valid dimensions if needed (P1 production prior to January 2015).

Feed-Thru (FT)

Table P1-14 – Main Lug End Gutter Dimensions Inches (mm)

Amp Rating	End Gutter		Neutral Location - to Endwall	
	20" wide box	24" wide box	20" wide box	24" wide box
125	9.500 (242)	9.500 (242)	10.500 (267)	10.500 (267)
250	9.500 (242)	9.500 (242)	10.500 (267)	10.500 (267)
400	25.500 (648)	25.500 (648)	26.750 (680)	26.750 (680)

NOTE: Feed-thru lug and neutral wire bending space is 15.000" and 16.250" respectively on 400A panel.

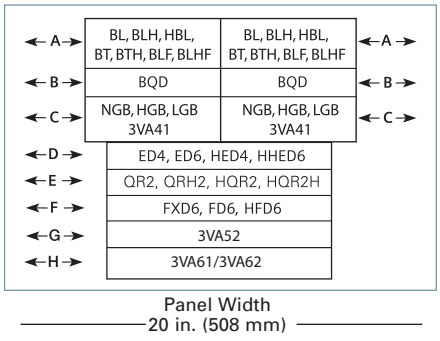
Non-Feed-Thru (NFT)

Table P1-15 – Side Gutter Wiring Space Inches (mm) (Fig P1-1)

Reference Letter	Panel Width 20"	Panel Width 24" Optional
A②	6.375 (167)	8.375 (213)
B②	5.500 (140)	7.500 (191)
C②	5.000 (127)	7.000 (178)
D	6.125 (156)	8.125 (206)
E	6.500 (165)	8.500 (216)
F	5.250 (133)	7.250 (184)
G	6.750 (171)	8.750 (222)
H	6.250 (159)	8.250 (210)

① Subfeed mounting limit 1 per panel.

Fig P1-1



② For all Revised P1 panels using BL/BQD or xGB breakers as mains in back-fed position, use this chart for wiring space.

NOTE: See page 11-32 for Main Breaker trip handle height reference chart.

Example of Back-fed xGB Main breaker installed

Panel Options

Enclosures

- Extra gutter to sides or ends of the can
- 24" wide boxes
- Hinged to box trim
- Door-in-door trims
- Screw to box trims
- Piano hinge trims
- Painted boxes (ANSI 61 Light Gray is standard color)
- Custom colors
- Increase gauge trims and boxes (See pages 12-13)
- Stainless steel trims (304 SS only) for Type 1 enclosures
- Type 1 enclosures (Std 16 Gage / Optional 14 or 12 Gage)
- Type 1 Standard are A60 Galvanealed non painted (Painted Type 1 use HRPO material)
- NEMA 3R/12 enclosures 16 Gauge Can w/ 14 Gauge front)
- NEMA 4 enclosures (14 Gauge only)
- NEMA 4X enclosures (14 Gauge only - 304SS Std, 316SS Optional)
- Special Keyed Locks (Keys are not supplied)
- Panel skirts
- Gaskets between trim and box

TEY TEU1 Cat 60 LL803 LL806	All fit FAS-Latch Front*
Yale 47 (NYC) National C413A Beck Lock 7-pin tumbler Southco 1 4 Fastener Corbin 1001 FAB7	Special non-FAS-Latch*

*See page 11-40 for more information.

Panel Modifications

- Main Bus
  Standard main bus is tin-plated aluminum. For copper main bus, add from the table for each panel. Includes copper neutral cross bar. For copper neutral branch lugs, see miscellaneous.
- Compression lug for MLO①
- Contactor mains - Mount in 23" enclosure ahead of panel.
  – Asco 920 through 225 amps③
  – Asco 911 through 150 amps③
  – Siemens LEN through 30 amps③
- Branch and main breaker accessories
  – Handle blocks
  – Handle locks
- Feed-thru lugs①
  Cannot be used in conjunction with SPD/TVSS or subfeed breakers. Do not add height to the panel.

Feed-thru Lugs Amp Rating	Type	Connector CU/AL Range
250	AL/CU Mechanical	(1)–#6 AWG-350 kcmil
	CU Mechanical	(1)–#6 AWG-350 kcmil
	AL/CU Compression	(1)–#6 AWG-350 kcmil
400	AL/CU AWG Mechanical	(2)–#1/0 - 250 kcmil or
		(1)–#2 AWG-600 kcmil
	CU	(1)–1/0-600 kcmil (2)-1/0-4/0
	AL/CU Compression	(1) 400-600 kcmil AL (1) 400-500 kcmil CU

- 200% neutral①

Note: Specify copper or aluminum cable.

① Do not increase panel or enclosure size.
② Accessories on 1" pole breakers (BL, BQD, xGB, ED) will take 1" unit space.
③ External to the panel, supplied in a separate enclosure.

- Copper lugs, mechanical line and branch neutral①
- Bus mounted SPD/TVSS and unit space mounted BSPD①
- Service entrance labeling
- Factory installed and Field installable Service Entrance Barrier kits are now available as required by UL67
- Grounding of Panelboards
  Ground Bars except for brazed to box are shipped with the panel interior.
  – Non-Insulated Equipment Ground Bar – standard
  – Copper Non-Insulated Ground Bar – optional
  – AL Insulated Equipment Ground Bar – optional
  – CU Insulated Equipment Ground Bar – optional
  – Ground Bar Brazed to Box (recommended for painted boxes)
- Shunt Trip on Main or Branch②
  BL, BLH, HBL, BQD, xGB as branch use 1" unit space for shunt trip.

QR2, QRH2, HQR2, HQR2H, ED2, ED4, ED6, HED4, HED6, HHED6, FD6, FXD6, HFD6
HFXD6, JXD6, JD6, HJD6, HJXD6

- Remote control switches – 480V AC max. mounted in a 23" enclosure to be cable connected to the panel.
- Time Clocks – mounted in a 23" enclosure to be cable connected to the panel. Tork time clock can be supplied and mounted in panelboard cabinet.

Time Clock Information and Options
Time Clock (1- or 2-Pole, Single or Double Throw Contacts, 3-Pole Single Throw) 277V Maximum with Plain Dial
Options:
Astronomical Dial
An Omitting Device
Reserve Power or Carryover
Space and Mounting Provisions Only

Compression Lugs

Table P1-19 – Lugs

Style	Amp Rating	Breaker Type	Compression Connectors	Box Height Addition
MLO	125	N/A	(1) #6 AWG - 350 kcmil	None
	250			
	400	N/A	(1) 400 - 600 kcmil AL (1) 400 - 500 kcmil CU	None
Main Breaker	125	ED4, ED6, HED4	(1) #14 AWG - 2/0	Box must go to 24" wide
	225	QR2, QRH2, HQR2, HQR2H	(1) #6 AWG - 350 kcmil CU or AL	Box must go to 24" wide
	250	FXD6, HFD6	(1) #6 AWG - 350 kcmil CU or AL	Box must go to 24" wide

Note: Standard compression lugs used for P1 panels are range taking lugs and require a particular crimping tool (tool is Hubbell/Anderson Versa Crimp VC6 -for 250A) to accommodate the range. Consult factory for information. 200% neutral not available with compression lugs. xGB breakers cannot accommodate compression lugs. (For 400A tool use Hubbell/Anderson Versa Crimp VC6FT/VC7FT - see instruction sheet for details.)

Enclosure Modifications

NEMA-4–Water Tight, Dust Tight, Steel Enclosure

(Actual NEMA-4 enclosure is larger than standard Type 1 enclosure. See chart below for reference to approximate actual size.)

Table P1-20

Standard Box Height (in inches)	Actual NEMA 4 Enclosure Size		
	H	W	D
32	32	20	8
38	42	30	8
44	48	36	8
56	60	36	10

Note: Larger NEMA 4 enclosures are not available.

Table P1-21 – NEMA Type 4X (Water Tight, Dust Tight and Corrosion Resistant)

Enclosure – Stainless Steel (304SS is standard)

Note: 316SS is optional - must be specified

Catalog Number	Size (inches)			Catalog Number	Size (inches)		
	H	W	D		H	W	D

LEN	30A mounts in 23" relay cabinet as a main only

Gauge Steel of Boxes/Fronts, Surface and Flush (see pgs. 11-6 & 11-7)

Dimensions in Inches (mm)		Gauge Steel		
H	W	Box	Front/Door	Type
26-74 (660-1880)	20 (508)	16①	14⑥	Type 1
26-74 (660-1880)	20 (508)	16②	16/14②	Type 3R/12
32-60 (813-1524)	20-36 (508-914)	14③	14③	Type 4
26-74 (660-1879)	20 (508)	14④	14④	Type 4X
36-60 (914-1524)	30-36 (762-914)	N/A⑤	N/A⑤	Type 4X Non-Metallic

① 16 Gauge is Standard (14 Gauge & 12 Gauge are optional)
② 15 Gauge Steel Can with 14 Gauge Door or Similar Approved Construction
③ No Optional Gauge available
④ 304SS 14 Gauge Std., 316SS 14 Gauge optional
⑤ Sizes do not match Standard Enclosure Sizes - See Table P1-21 - material is non-metallic - No Gauge Specified.
⑥ FAS-Latch is 14 GA only. Screw-to-Box, Hinge-to-Box, Door-in-Door (14 GA Std./12 GA Std. or 10 GA Optional) STB/HTB/DND with Piano Hinge (14 GA Std./12 GA Optional) (14 GA Stainless 304 Optional)

Siemens TPS Surge Protection

The new TPS4 01/L1 series has been added to our internal mount SPD family for Lighting panels. This series provides many additional benefits and features not available with TPS3 01/L1 series or the TPS3 02/L2 series (for RP1 only). TPS4 series uses different MOV technology than the Mersen TPMOV used in TPS3 series. The TPS4 product leverages a MOV 'pill stack' design that also includes thermal protection, that is proven in the telecomm and other industries for many years. Look for comparisons for these products online for more information.

Wired versions of the TPS4 01/L1 series allow for connection to bus by cabling to a branch breaker in the panel when specs require a disconnect for the installation.

This TPS4 01/L1 series is designed for form/fit/function to replace both the TPS3 01/02 or TPS3 02/L2 series in most applications, but some differences must be considered - see important notes below:

1) TPS4 01/L1 series is designed to directly bolt to the bus of Revised P1 product (RP1). There are no adapters needed which makes installation easier. For field replacement of TPS3 02/L2, the entire TPS3 kit must be removed and the new TPS4 kit can be installed.
2) The TPS4 01/L1 series is NOT compatible with Original P1 series so TPS3 01/L1 must be used for Original P1 as either initial installation or as replacement.
3) TPS4 01/L1 can be used to replace TPS3 01/L1 in most RP1/P2/P3 applications where specs will allow. P2/P3 will need an additional kit ordered to adapt to the interior properly. Order Kit # TPS4P2P3K - SPD KIT P2 P3 TPS4.
4) For Busway and MCC kits - Please consult the factory regarding field replacement of TPS3 series.

Customer Support should be contacted if there are any questions regarding field replacement of SPD profucts. COMPAS will allow either TPS4 or TPS3 to be selected in applications that allow either.

TPS4 01 and TPS4 L1 Key Features
(see SpeedFax section 10 for a complete list)

- UL 1449-5 Type 2 SPD and UL 1283 Listed
  – Optional UL 1449 5th Edition Listed Type 1
- Type 1 / Type 2 SPD
- 100 - 500 kA Per Phase Surge Current
- UL 96A Lightning Protection Master Labeling compliant (@ 20 kA)
- Modes of Protection: L-N, L-G, N-G, and L-L
- Dimensions: 9.25" x 4.5" x 4.29"
  (235 mm x 114.3 mm x 109 mm)
- Weight: 4.55 lb. (2.06 kg)

TPS4 01

Ordering Information

Catalog # TPS4 □ 01 □□ □□□□

Voltage Code
- **A** = 240/120 V, 1Ø, 3W①
- **B** = 240/120 V, 3Ø, 4W
- **C** = 208/120 V, 3Ø, 4W
- **W**= 220/127 V, 3Ø, 4W
- **D** = 240 V, 3Ø, 3W
- **E** = 480/277 V, 3Ø, 4W
- **F** = 480 V, 3Ø, 3W
- **G** = 600 V, 3Ø, 3W②
- **K** = 380/220 V, 3Ø, 4W
- **L** = 600/347 V, 3Ø, 4W
- **S** = 400/230 V, 3Ø, 4W
- **T** = 415/240 V, 3Ø, 4W

Surge Current (kA)
- **10** = 100 kA per phase
- **15** = 150 kA per phase
- **20** = 200 kA per phase
- **25** = 250 kA per phase
- **30** = 300 kA per phase
- **40** = 400 kA per phase
- **50** = 500 kA per phase

Options

X = Surge counter (Standard)

0 = Std config (default)
W= Terminal lug

0 = Std config (default)
B = Busway application
M = MCC application

2 = Type 2 SPD (Default) Includes UL 1283 EMI/ RFI Filters
0 = Type 1 SPD (Consult Factory Prior to Ordering)

Example: **TPS4C0120X000** = SPD for a 208/120V panelboard with a surge current capacity of 200 kA per phase and a surge counter option.

When an option is not selected, include a **zero** (**0**) in the field.

① Can also be used on 208Y/120V, 1Ø, 3W System
② Not available in 300, 400 or 500 kA versions

Please note: The TPS4 01 series is not suitable for use in the Original P1 Lighting Panels - Only Revised P1 Lighting Panels.

TPS4 L1

Common TPS4 01 SPD Catalog Reference
(see SPD section 8 for complete list including L1)

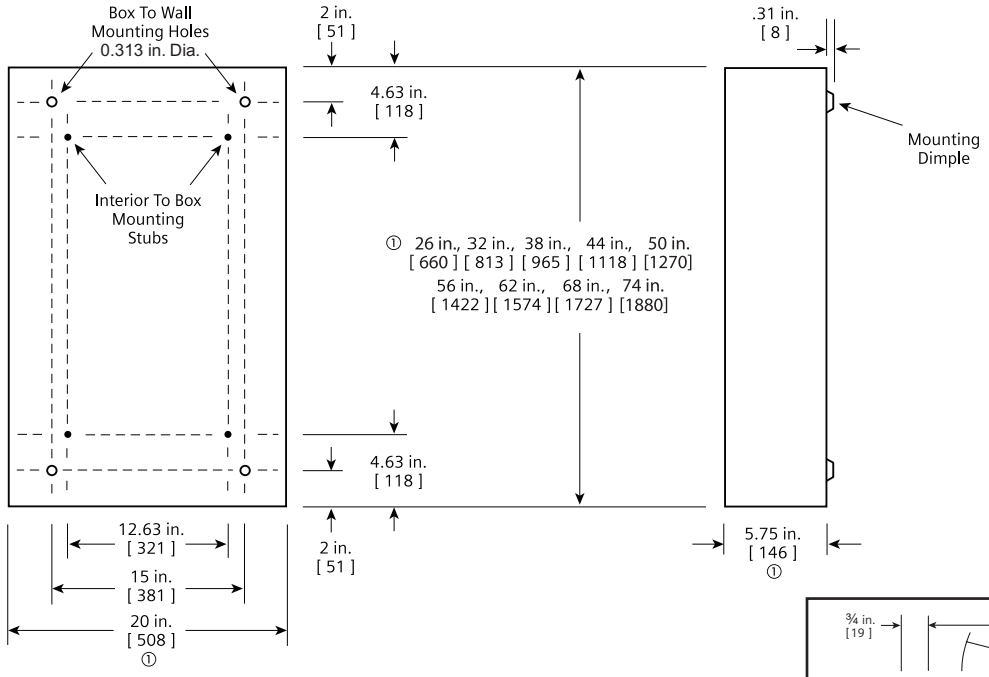
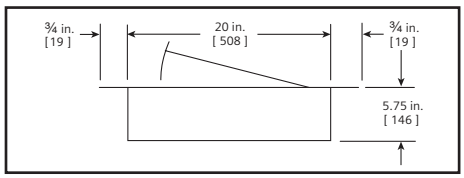
① These values are for typical configuration, they may not apply for special conditions and features..
② Subfeed Space in P2 panels is no longer available for any breakers. Only Feed-thru Lugs and SPD can be configured.
③ Extended Circuit P2 panel configurations are only available in 56" thru 74" High Enclosures.
④ Dimensions for all 250A and larger are for 3VA series of breakers only.

Type 1 Box

Box is symmetrical



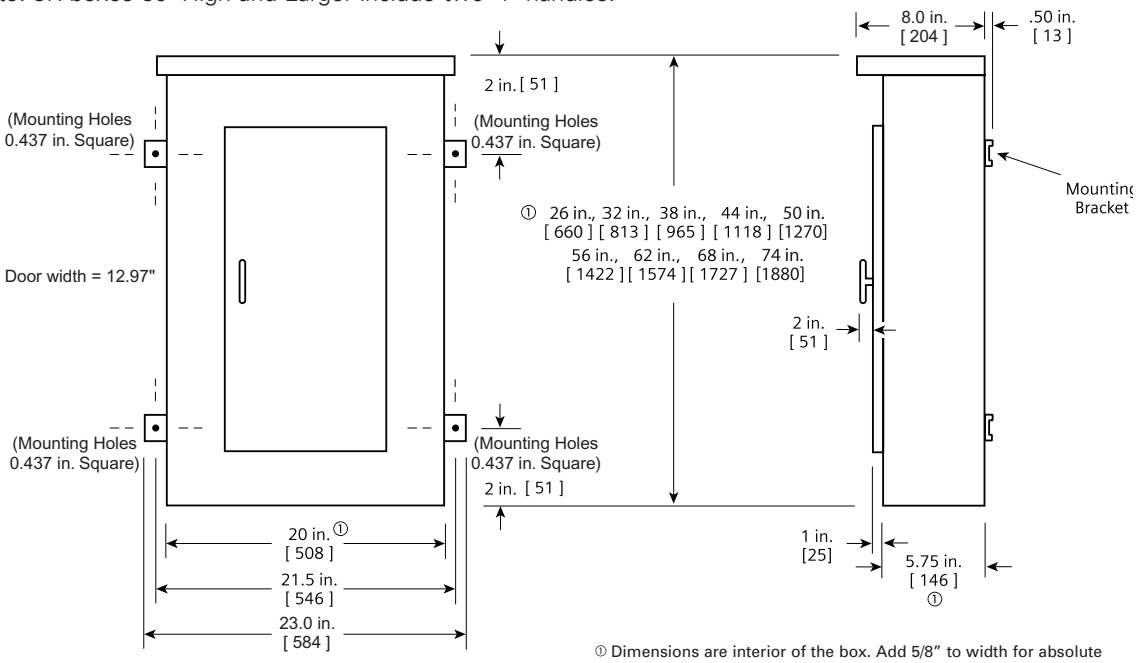
(UL approved construction. 16 Gage Steel or equivalent alternate Construction.
14 or 12 Gage is available as an optional special order.)
G60 Galvanized is standard without paint.



Flush Mounting

Type 3R and 3R/12 Box

Note: 3R boxes 50" High and Larger include two "T" handles.



(UL approved construction. 16 Gage Steel Can with
14 Gage front or similar approved construction.)
A60 Galvannealed with ANSI 61 light gray paint is standard.

① Dimensions are interior of the box. Add 5/8" to width for absolute dimension. Add 1/8" to height for absolute dimension.

Dimensions shown in inches and millimeters [ ].

Enclosures

NEMA Type 1

Primarily indoor use: Box and front needed for complete enclosure.

NEMA Type 3R

Outdoor use primarily to provide a degree of protection against rain, sleet, and damage from external ice formation.

NEMA Type 12 (Siemens 3R/12)

These enclosures for Lighting Panels are useable as Type 12 or Type 3R by adding the gasket shown around the door.

(Siemens 3R/12 panelboard products meet this requirement)

NEMA Type 4 or 4X

Indoor or outdoor use primarily to provide a degree of protection against splashing water, corrosion, windblown dust and rain, hose-directed water, and damage from external ice formation.

Note: NEMA Type 4 is painted steel. NEMA Type 4X is typically stainless or non-metallic.

P1, P2, P3 panelboard standard Type 1 enclosure

Features:	Typical Standard P1 and P2 Type 1 enclosures are 20"W and 5.75"D - 16 GA A60 Galvanized steel or equivalent UL approved construction - Endwalls are blank as standard - Endwalls with Knockouts are available	Options - Painted enclosures [ANSI 61 gray] - 24" wide enclosures - 7.75" deep enclosure - 24" wide and 7.75" deep
	Typical Standard P3 Type 1 enclosures are 24"W and 7.75"D	Options - Painted enclosures [ANSI 61 gray]

Note: Contact customer support for special colors (RAL # required.)

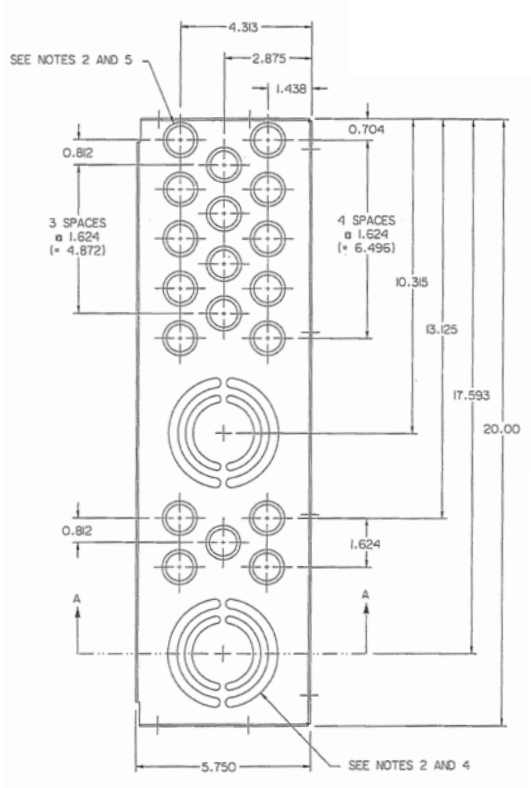
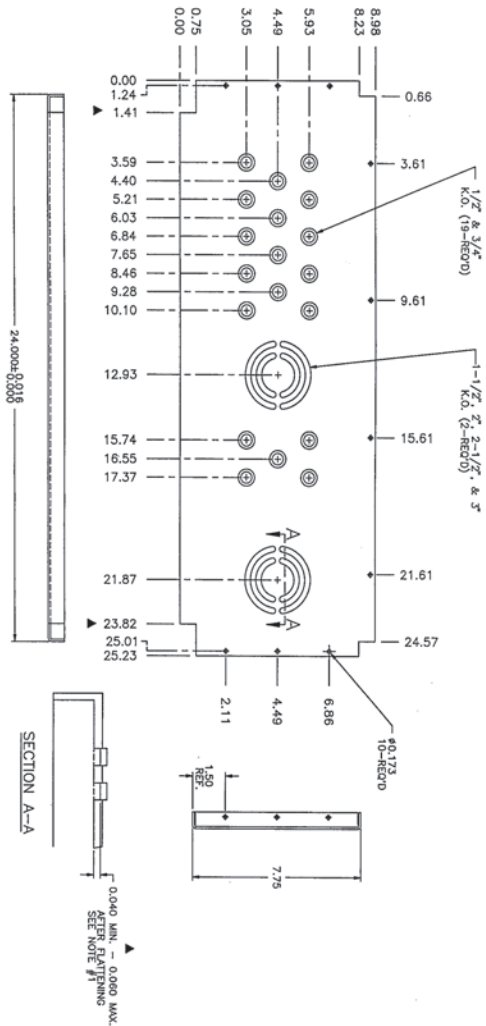
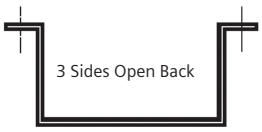
EWK1 End Wall w/KOs (20"W X 5.75"D)



EWK2 End Wall w/KOs (20"W X 5.75"D)



Panel Skirts Standard Length



8, 9, 10, 11, 12, 14, 17, 18, 23, 24, 25, 25, 27, 28, 29, 30, 31, 32, 33, 34, 35, 36, 37, 38, 39, 40, 41, 42, 43, 44

Notes:
A) 4-sided skirts have standard Part Numbers (not catalog numbers).
B) 3-sided skirts are ordered as Custom in COMPAS
C) Order in COMPAS with interior when possible.
D) If ordered separate from interior, use a manual line in COMPAS.
E) Must note if Top Entry or Bottom Entry required.

P1, P2 FAS-Latch standard fronts: Type 1

Standard Trim (FAS-Latch) Typical Dimensions. Hinges available as shown on right side only.
Typical 14 Gage Steel construction or UL approved equivalent. Stainless steel is not available.

Optional Fronts for FAS-Latch Series – see examples below for Suffix adders:

Suffix	Description	Example
M	Metal Card Holder	F44BM
WM	Welded-on Metal Card Holder	F44BWM

Options for FAS-Latch Series:

Metal Card Holder – Add "M" suffix on all fronts

Welded Metal Card Holder – Contact Customer Support for availability

Standard Trim (FAS-Latch)

(14 Gage Standard – no options)
(UPB includes surface or flush versions of this style. Other special fronts below are note part of the UPB program).

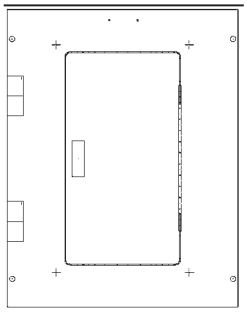

Figure 4: Screw to Box w/ Piano Hinge Door 1)

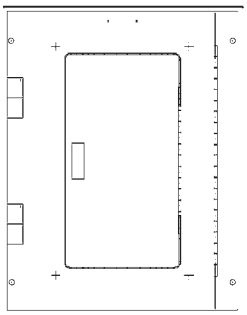

Figure 5: Hinge in Box w/ Piano Hinge and Piano Hinge Door

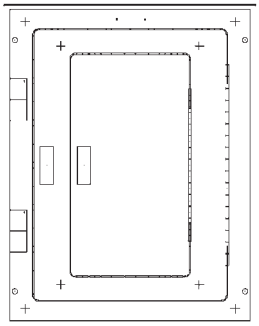

Figure 6: Door in Door w/ Piano Hinge both Doors

① Custom order in COMPAS.

② Stainless 304 is available as a special order for 20" W and 24" W only. Stainless 316 is not available. Flush stainless fronts are typically 1/2" wider and taller than standard flush fronts.

P3 series fronts (will not work with P1/P2 interiors)

Note: The P3 Dead Front size is larger than P1/P2, so any fronts or Dead Front interfaces for P3 interiors have to be larger than those for P1/P2. If a P3 Front is used with a P1/P2 interior there is a gap that allows access to live parts, so this is not allowed or UL approved.

Replacement Parts

Catalog No.	Market Facing Description	Pack Quantity
LPKEY01A	Key #B363A for Panel Trim Lock (FAS-Latch)	4
LPKEY01B	Key #B363A for Panel Trim Lock (FAS-Latch)	25

Contacts for Special Keys

National C413A	Go to this website: http://compx.com/dist-csp.html ==> then lookup a distributor in your area to get keys. Or call 864-297-6655
Corbin TEU1 or CAT 60	Contact your local distributor for special keys
Yale LL803 / GE 75 (Corbin TEY)	Contact your local distributor for special keys

Locks not listed may require special door cutouts and are not field replaceable in standard fronts included in this table.

① Lock kits include one replacement lock with 2 keys #B363A
② Contact Customer Support for re-ordering special keyed locks as needed.
③ The lock options for Yale 511, BEST, Corbin 15751 and Corbin 15757 CANNOT be used in 12GA and 10GA fronts, or with any 304 stainless steel fronts.
④ Factory has final determination on whether combinations of non-standard features are available. Contact customer support for complex front configurations.
⑤ The factory does not stock keys for these locks. It's the customer's responsibility to obtain it from outside sources.
⑥ NEMA 3R/12, NEMA 4, NEMA 4X SS, NEMA 4X non-metallic enclosures cannot be used with the fas-latch lock assembly.
⑦ Consult Factory or Customer Support for any special lock requirements.

P1, P2, P3 panelboard standard Type 3R and 3R/12 enclosures

Type 3R/12 enclosures meet both NEMA 3R and NEMA 12 requirements

Features:	Typical Standard NEMA Type 3R and 3R/12 Enclosure – P1 and P2 are 20"W x 5.75"D (min interior dimensions) – P3 is 24"W x 7.75"D (min. interior dimensions) – 16 GA Steel can with 14 GA steel door or similar UL approved construction – Standard is A60 galvannealed ANSI 61 gray paint	Options – Custom paint available Note 3R and 3R/12 are same steel enclosure. 3R/12 has gasketing added at factory. Note Siemens 3R/12 meets NEMA Type 12 specifications

Note: Contact customer support for special colors (RAL # required.)

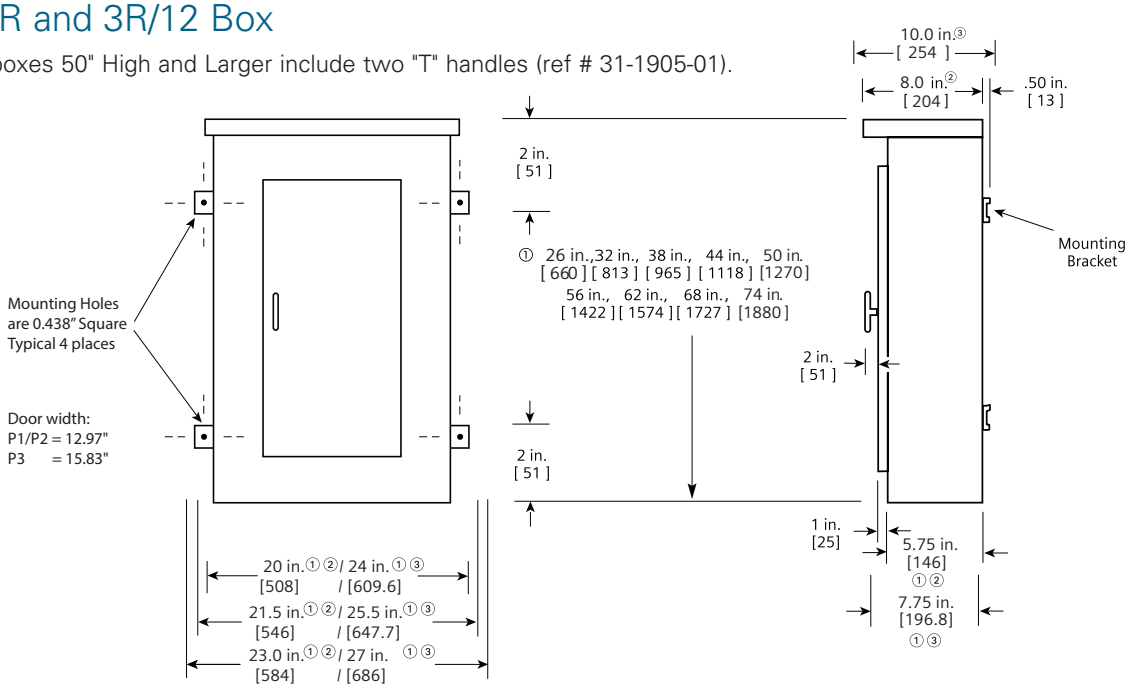
① Custom order in COMPAS

Type 3R and 3R/12 Box

Note: 3R boxes 50" High and Larger include two "T" handles (ref # 31-1905-01).



(UL approved construction. 16 Gage Steel Can with 14 Gage front or similar approved construction.)
A60 Galvannealed is standard without paint.

Dimensions shown in inches and millimeters [ ].

① Dimensions are interior of the box. Add 5/8" to width for absolute dimension. Add 1/8" to height for absolute dimension.

② Dimensions are for P1 and P2. (P1/P2 24" W x 7.75" D is special - contact factory)

③ Dimensions are for P3.

P1/P2 NEMA 4 and NEMA 4X non-metallic enclosures

NEMA Type 4 enclosures below are special order and are larger than typical enclosure size needed. NEMA 4X enclosures are more appropriately sized.

NEMA 4

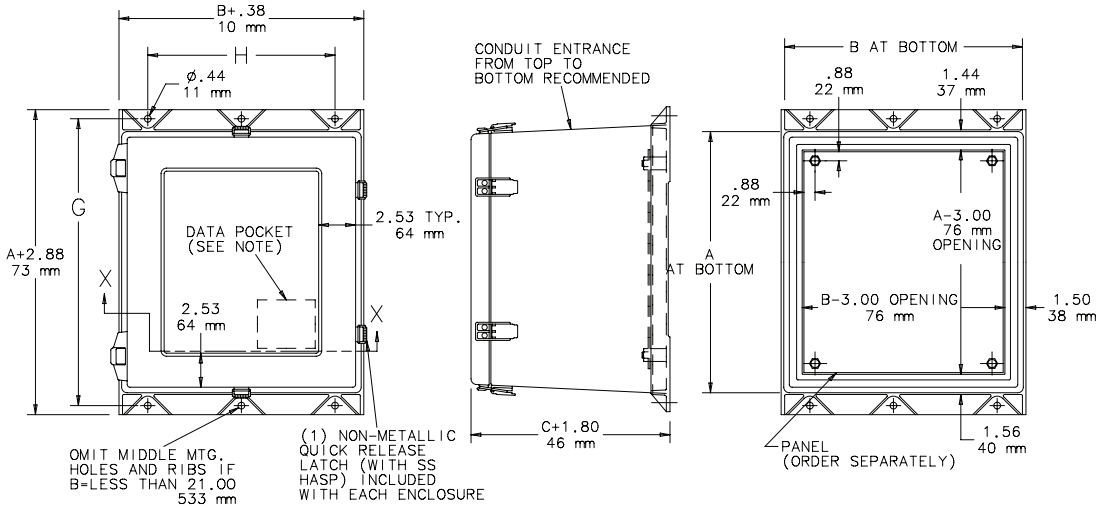
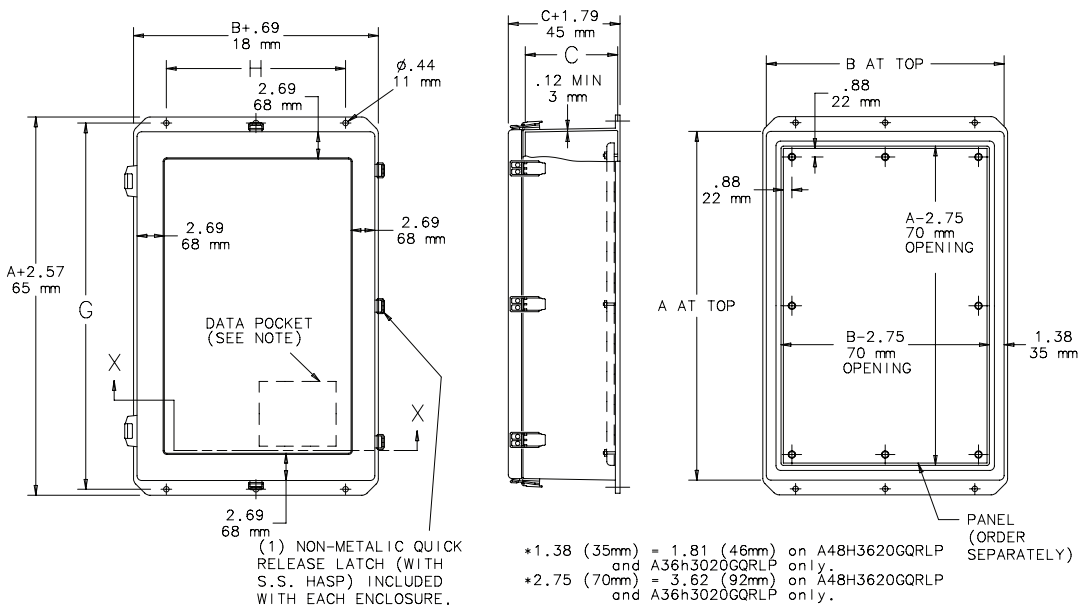
Hinged with Quick-Release Latches, Type 4X
NEMA 4X Non-Metallic Enclosures

Dimensions below for reference only - actual sizes vary by enclosure

Hinged with Quick-Release Latch Enclosures 36 X 30 or Smaller Drawing③



Hinged with Quick-Release Latch Enclosures 36 X 36 or Larger Drawing④



① Custom order in COMPAS

② 60" enclosure can fit 56" P3 interior due to custom fit at plant.

③ ??There is a footnote# by the drawing but no actual footnote on the page 12 in the guide.

Features

Flexibility is the hallmark of the P2 panel and with the addition of the 3VA family of breakers in 2021 it is more capable than ever.

This panel offers a wide array of factory assembled options to meet almost all panel board applications up to 600A Maximum Bus ratings. With this design, the ability to mix breaker frames in unit space up to 250 amps will also meet many distribution panel requirements in a much smaller package.

Integrated time clocks, bus mounted contactors (as mains or sub mains), split bus, and subfeed lugs (up to 400 amp) are just a few of the options of this flexible panel.

Similar to Siemens P1 Panel board, P2 is set up around 18, 30, 42, 54, 66, 78, and 90 circuit configurations in 6" increments of Box size. It will also allow the user to configure the panel to the smallest possible size. Enclosures are shared with the P1 series as well and are from 26" to 74" high (in 6" increments to match interiors).

The P2 panel starts with 9" of unit space (18 circuits of 1" pole breakers). Breaker strap kits mounted in unit space can be mixed and matched to meet customer requirements for many types of breakers. All 1" pole breakers (BL, BQD, xGB, xGB2, ED & 3VA41 frames) are mounted in 3" or 6-pole increments. Breaker frames, above 125 amps, are mounted in 6" single breaker mounting kits (Sentron QR, FD and new 3VA series 3VA52/61/62 cover all requirements up to 250A).

- 3VA52/61/62 can single mount in 6" of unit space so FD is no longer needed in Subfeed Space.
- JD 400 amp will no longer be needed as main or Subfeed. 3VA53/63 Mains are now available.

Main Breakers from 100A frame to 600A frame can be configured as needed. 3VA mains are generally the preferred Main choice for most applications.

As an example of a minimum panel, (6) 20 amp 1-pole BL breakers (3" of unit space) and a 3-pole 225 amp QR breaker (6" of unit space) equaling 9" of unit space can be configured in a P2 panel without any extra provisions or space required.

Another unique feature of the P2 panel is that blank unit space can be added to allow for future expansions or modifications. - Any expansions or modifications must be in 3"or 6" increments for these kits and they can be mixed in unit space as needed.

Small frame breakers of the same frame can cross from one mounting kit to another if needed.

- BL/BQD 100A max. has 3" kits - 6-poles max.
- xGB/3VA41 125A max. has 3" kits - 6-poles max.
- xGB2 and ED 125A max. each have 3" kits also, but are no longer needed with the introduction of 3VA.

Larger frame breaker kits are single mount in 6" of unit space:

- QR 225A max. 2-pole or 3-pole have 6" kits.
- 3VA61 150A ETU only and 3VA52/62 250A max. 2-pole or 3-pole share the same 6" kit.
- Changes in the field for unit space length for any 3" kit may require an addition deadfront center strip kit. Check with sales or the factory for field installable unit space strap kits.

Enclosures for P1 and P2

- Standard Type 1 enclosures are 20" wide x 5.75" deep. Box Height is determined by main device and unit space. See charts for box height.
- Height: 26", 32", 38", 44", 50", 56", 62", 68" and 74" are standard sizes used for both P1 and P2
- NEMA 3R, 3R/12, 4X are typical examples of product available in 20" wide x 5.75" deep enclosures.
- For most applications, 24" wide and 7.75" deep variations are also available. (see end of P1 section for more details)

Main Lug / Main Breaker for P2

Voltage – 600V AC max./250V DC max.

Amperage

- Main Lug: 125 to 600 amp max.
- Main Breaker: 100 to 600 amp max.
- Molded Case Switch: 100 to 600 amp max. (MCS)

Short circuit rating

- 200 KAIC max. symmetrical or equal to the lowest rated device installed unless a series rating is indicated.
- Panels with subfeed or feed-thru lugs without a main device*, circuit breaker or fusible unit, are limited to a three-cycle rating. The three-cycle rating for the P2 panel is limited to 22 KAIC.

*Note: The main device may be mounted remote from the panel.

Bussing – The P2 panel has more options than P1 to meet market requirements. The standard bussing is temperature rated aluminum. The rating is per the requirements of UL 67 – the standard for panelboards.

- All aluminum bussing is tin-plated.
- Optional bussing for the P2 panel is: 750 A/Si aluminum, temperature rated copper, and 1000 A/Si copper.
- Copper bus is tin-plated as standard, but silver plating is an additional option.

Weight – Approximate

Total panelboard weight when filled with a normal quantity of breakers and accessories is about 3 lbs. (1.4 kg) per inch (55g per mm) of box height.

Gauge Steel of Boxes/Fronts, Surface and Flush (see pgs. 11-6 & 11-7)

Dimensions in Inches (mm)		Gauge Steel		
H	W	Box	Front/Door	Type
26-74 (660-1880)	20 (508)	16①	14⑥	Type 1
26-74 (660-1880)	20 (508)	16②	16/14②	Type 3R/12

① 16 Gauge is Standard (14 Gauge & 12 Gauge are optional)
② 15 Gauge Steel Can with 14 Gauge Door or Similar Approved Construction
③ No Optional Gauge available
④ 304SS 14 Gauge Std., 316SS 14 Gauge optional
⑤ Sizes do not match Standard Enclosure Sizes - See Table P1-21 - material is non-metallic - No Gauge Specified.
⑥ FAS-Latch is 14 GA only.
Screw-to-Box, Hinge-to-Box, Door-in-Door (14 GA Std./12 GA Std. or 10 GA Optional)
STB/HTB/DND with Piano Hinge (14 GA Std./12 GA Optional)

Standard Circuit P2 Panels (Neutral Configurations for up to 54 circuits max.)

Table below shows minimum Box Size required for the Unit Space indicated with the Main Option at the top of each Column.

- Adding other options generally will add to the box Height when configured in COMPAS. Also, there may be cost adders with each option.
- The maximum number of 1" circuits supported is shown at the bottom of each column in brackets. [54p] = max 54 poles of 1" circuits supported (BL, BT, BQD, ED, xGB, xGB2, 3VA41).
- Unit space is available in 9", 15", 21", 27", 33", 39", and 45" sizes.
- Within unit space listed, the neutral will support up to 54 circuits.
- When more then 54 circuits are required, COMPAS will configure with larger Extended Circuit Neutral - see Extended Circuit chart below for minimum box sizes.
- Box sizes available: 26", 32", 38", 44", 50", 62", 68", 74"

Extended Circuit P2 Panels (Neutral Configurations for more than 54 circuits)

When COMPAS configuration has more than 54 circuits, the large neutral configuration is needed. Box size shown is the minimum available without any options.

- Unit space of 33", 39", and 45" are available.
- Unit space will be reduced by selecting some options such as Feed-thru lugs, Surge Protection Devices, and the other Subfeed options.
- In general, vertically mounted mains require 6" more box space than equivalent horizontally mounted mains.
- Neutral Configurations typically support a max of 90 1-pole breakers, or as noted in tables on page 11-47.

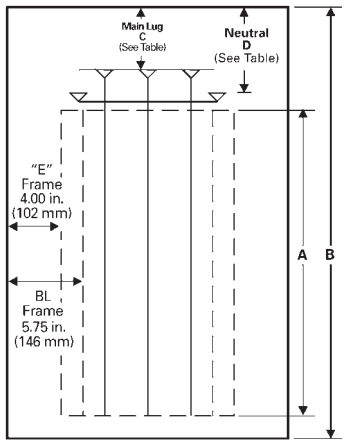
① The vertical main breaker application for ED, QJ, QR, FD and 3VA52/61/62 adds 6" of box height.

② Generally the count varies depending on neutral connections available and configuration of the panel. Use this value as general rule. Also, see tables on page 11-47.

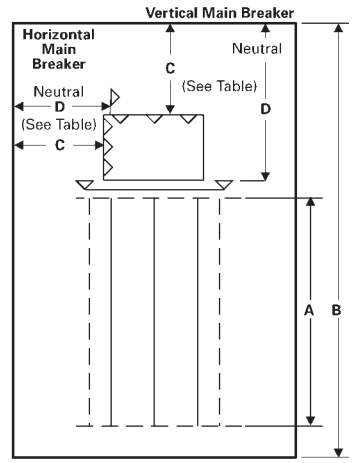
Main lug wire bending space diagram

Box depth = 5.75 in. (146 mm)
Box width = 20 in. (508 mm) for 100-600A



Main breaker wire bending space diagram

Box depth = 5.75 in. (146 mm)
Box width = 20 in. (508 mm) for 100-600A



NOTE: See page 11-32 for Main Breaker trip handle height reference chart.

① For 400A and 600A designs, branch neutral step lugs need to be removed in some cases for the large branch 350 kcmil lugs mounted on the neutral cross bus to have wiring access to the side gutters of the enclosure. The default 400A assembly has gutter access to one side for 2 lg branch loads min. The 600A neutral provides no gutter access for large branch lugs when the maximum (2) step lugs per side are installed.

② The branch neutral can already use 75C, but when running a circuit to a load, the same type of wire should be used on the phase (breaker) and neutral connections in the panel. All of our breakers are rated for 75C (smaller dia per amp rating than 60C wire).
– UL assumes 75C or higher rating for wires at or above 1/0 size.

③ Reference info: Neutral Lugs are rated for 75°C cable. When running a circuit to a load, the same type of wire should be used on the phase (breaker) and neutral connections in the panel.
a) Cables should be sized per NEC Table 310.16 (formerly Table 310.15(B)(16)) and the 75°C column.
b) Customer can choose to use 90C cable if sized as if it is 75°C.
c) Some 100% rated circuit breakers require the use of 90°C cable sized per the 75°C column. Refer to the Markings on the breaker and use the appropriate cable.
d) Some Circuit breakers 100A or less are marked as being suitable for 60°C, 75°C or 60/75°C cable. Refer to the Markings on the breaker and use the appropriate cable.

① 250VDC ratings are for 2-pole only (or for 2-poles of a 3-pole breaker)
② Approved for CSA and UL Listed.
③ ED6 2-pole only available in 20A, 25A and 30A. See SpeedFAX section 7 for more details.
④ Interchangeable Trip Main Breakers are mounted at top of panel only.
⑤ Horiz: Single +12". Vertical: Twin +24".
⑥ Vert: Single only with MLO Panel +24".

① BLG two-pole breaker is one phase and neutral. Three pole is two phases and neutral - See SpeedFax page 7-31
② 1-pole HED4 15-30A rated 65kA; 35-100A rated 25kA: 3-pole HED4 rated 42kA
③ 2-pole only or two outer poles of 3-pole breaker
④ Approved for CSA and UL Listed.
⑤ Approved for CSA but not UL Listed.
⑥ ED6 2-pole only available in 20A, 25A and 30A. ED6 1-pole not UL listed - See SpeedFAX section 7 for more details.
⑦ BT and BTH are only available in 15A and 20A with two 1-pole circuits in one inch of unit space."

Main Lugs Only — Examples of basic P2 Panel numbers w/o devices that add to box height.

General Note: Panel numbers and box sizes are for reference only - COMPAS will configure proper box size needed based on all options.

① 125A: for vert ED & horiz. CED add 6" of box height for both Standard and Extended Circuit.
② 225A: for vert QR & FD add 6" of box height for Standard Circuit. Add 12" of box height for Extended Circuit FD Horizontal.
③ 250A: for vert FD and 3VA52/61/62, add 6" of box height; for vert CFD add 12" of box height. (Standard Circuit- see chart for Extended Circuit)
④ 400A: for CJD add 12" of box height for Standard Circuit.
⑤ 600A: for CLD add 6" of box height for Standard Circuit.

Enclosures

Extra Gutter to Sides or Ends of the Can (Type 1 Only)

Description
6" end gutter 2" side gutter Barrier in gutter (add to extra gutter price – min 4" required) 24" wide

See Section 10

Service Entrance Label

Type P2 Panelboards are factory labeled suitable for use as service entrance equipment when NEC requirements are met. A panelboard cannot have more than six main disconnects, unless it is a lighting and appliance branch panelboard. Lighting and appliance branch panelboards are limited to two main disconnects. Factory installed and Field installable Service Entrance Barrier kits are now available as required by UL67 (In COMPAS, you must select Service Entrance Required).

Grounding of Panelboards

Ground Bars except for brazed to box are shipped with the panel interior not factory mounted.
- Non-Insulated Equipment Ground Bar
- Copper Non-Insulated Ground Bar
- Al Insulated Equipment Ground Bar
- Cu Insulated Equipment Ground Bar
- Ground Bar Brazed to Box (Not recommended for painted or NEMA 3R enclosures)

Shunt Trip on Main or Branch

BL, BLH, HBL, NGB, HGB, LGB, NGB2, HGB2, LGB2, ED4, HED4, HHED6 uses 1" unit space for shunt trip. All others may be used on mains or subfeeds. See breaker section for list price adders.

Time Clocks

Time clocks may be mounted in a 23" enclosure to be cable connected to the panel. Sangamo, Tork or Paragon time clock can be supplied and mounted in panelboard cabinet. Adds 12" to panel height. Mounts in Sub-area.

Description
Time Clock (1 or 2-pole, single or double throw contacts; 3-pole, single throw) 277V maximum with plain dial
Astronomical dial
An omitting device
Reserve power or carryover
Space and mounting provisions only

DFFPVA5262P2A		X	X					1	3VA52/61/62 Filler, used for P2 and P3 single mount horizontal and vertical applications, 1 piece per kit. Included in all appropriate Strap kits.	11-D-4610-01
DFFPVA5262P2B		X	X					1	3VA52/61/62 Provision kit, Blank Deadfront Plate and barrier included for when there is no breaker installed in a strap kit. Used for P2 and P3 single mount horizontal applications.	11-D-3340-01 11-D-4614-01
DFFPVA5363A	X	X	X					1	3VA53/63 Filler for P2/P3 Main/Subfeed (also used in RP1 main applications with Large MB Deadfront opening only)	11-D-4617-01
DFFPFD01	X	X	X			X	X	1	FD Main Filler Plate (plastic) for 1-Ph and 3-Ph P1 Panels (use for Original or Revised P1 and other applications)(P2/P3 and S1/S2/SE)	11-D-4617-01
DFFPJD01	X	X	X			X	X	1	JD Main Filler Plate (plastic) for 1-Ph and 3-Ph P1 Panels (Small RP1 opening) (use for Original or Revised P1 and other applications)(P2/P3 and S1/S2) [for JD in large RP1 Main opening use DFFPJD02, ref # 11-D-4598-02]	11-D-4522-61
P2QRFP01		X						1	P2 QR Deadfront Filler, Plastic snap-in for P2, Vertical mount Main position, one filler per package.	11-D-4564-01
EBF1		X	X					1	NEB/HEB Filler Plates (replacement parts)	11-D-4529-01
DFP3AP01		X	X					1	Adapter Kit for P2/P3 BL/BQD/ED/xGB/etc. breakers. This adapter plate fills 3 inches of unit space on one side of the Deadfront to allow the smaller breakers and DFFP1A filler to fit correctly.	11-D-3033-61
DFK1		X	X					1	P2/P3 kit to replace center strips in the deadfront when breaker strap kits are changed or modified. Kit includes mounting hardware, seven different lengths of center strip for 3" thru 21". (for BL/BQD/xGB/3VA4/etc. sizes of breakers)	11-D-2273-01
DFK07		X	X					1	P2/P3 kit to replace center strips in the deadfront when breaker strap kits are changed or modified. Kit includes mounting hardware and center strip for 21" of unit space. (for BL/BQD/xGB/etc. sizes of breakers)	11-D-3018-67
DFK08		X	X					1	P2/P3 kit to replace center strips in the deadfront when breaker strap kits are changed or modified. Kit includes mounting hardware and center strip for 24" of unit space. (for BL/BQD/xGB/etc. sizes of breakers)	11-D-3018-68
DFK09 thru DFK21		X	X					1	Individual lengths from 27" thru 63" are available as needed, in 3" increments.	11-D-3018-xx

① These Strap kits may only be available as field replacement. COMPAS may configure all future 125A frame and larger requirements with 3VA Strap kits and associated breakers.

Spare Parts and Field installable Kits for P2/P3 Panels (cont.)

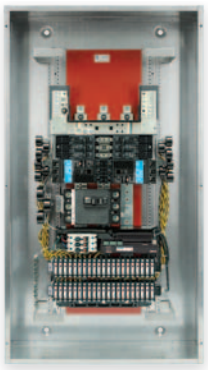
SEM3™ System configured in Panelboards

The Siemens SEM3 system can be configured for factory installation in branch circuit monitoring applications using the Siemens COMPAS configuration tool. This option can lower the installation time of the system for the installer while providing a factory warrantied solution.

The SEM3 system can be factory installed in unit space in type P2, P4, & P5 Siemens panel boards and SB1, SB2, & SB3 type Siemens switchboards. Please note P1 and P3 configurations are not available at this time and the amount of unit space needed varies depending upon the application. Please note that lead time adders will apply and may vary depending upon the configuration of the system.

SEM3 for use in Siemens Panelboards



Type P2: Enclosure

- Available in a NEMA 1, 3R, or 12 rated enclosure.
- Minimum width & depth: 24" width x 5.75" depth
- Height: Up to 74" depending on branch breaker selection
  - – Addition of monitoring on some mains (primary and subfeed) may require additional box length. In these cases the box will be increased to the next size available as a standard design.
  - – In cases where enclosure size is increased all multi-section panels will be increased to match the largest section.

Controller

SEM3 controller is mounted in unit space opposite of the feed location specified in COMPAS (i.e., bottom mount for top feed) and will require 3" of unit space. Each controller will be powered by direct tap connection to the panel section bus. Each controller can monitor up to 45 circuits. Applications that require monitoring more than 45 circuits will require additional controllers.

Current Transformers (CTs)

Five sizes of CTs are available for use in the P2 panel: 50, 125, 250, 400 & 600 amp. All CTs are pre-mounted to a support bracket that attaches to the base rail of the interior of the panel board. Each bracket supports a maximum of 3 CTs and is designed for the breaker selected (brackets are not interchangeable between breaker frames). Each CT will be attached to a data module that is placed in the meter racks.

Meter Racks

Each meter rack requires 3" of unit space. All meter racks will be installed next to the SEM3 controller in unit space. The COMPAS configuration tool will select the appropriate meter rack configuration according to the user's application and will use the 21 space meter rack as a default option where possible. Only one meter rack (regardless of number of positions) can be installed in 3" of unit space.

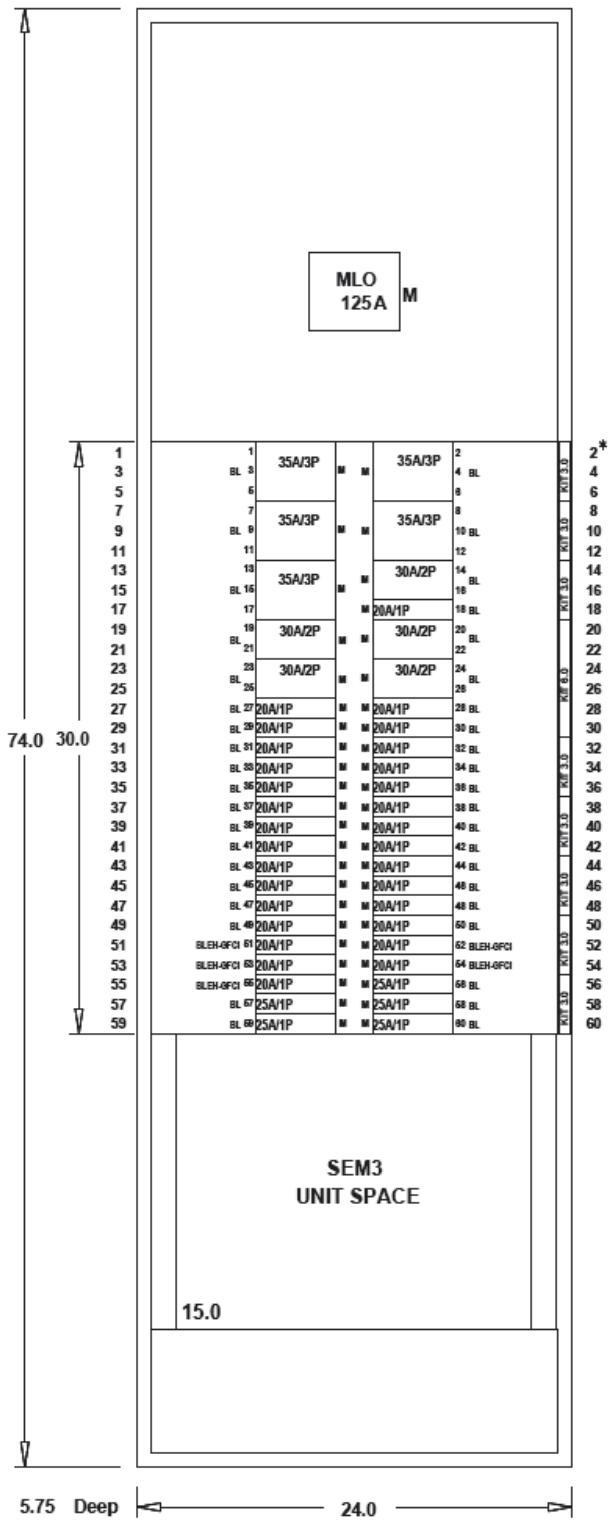
NOTE: Monitoring of 45 circuits will require 9" of unit space: two 21 position racks and one 3 position rack

P2 Devices
Enclosure sizes

Example P2 Panel with SEM3 Type 1 Enclosure (24" Wide x 5.75" Deep)

Enclosure heights are in 6" increments from 26" thru 74".
Enclosure heights: 26", 32", 38", 44", 50", 56", 62", 68", 74"

The COMPAS configuration tool can provide actual dimensions based on the configuration.
Example below is largest standard P2 enclosure for factory assembled panel
with all small (1") branch breakers installed.



24" std. width

Main Breaker / Main Lug space varies based on selected options

Unit space varies based on selected options

Note: All circuits do not have to be monitored by SEM3 - user can select any circuits in this space to be monitored.

Based on smallest branch breakers and a 3-phase main being monitored.
There is a maximum of 63 circuits that can be monitored with the configuration shown.
Some selections of main breakers and other subfeed options could limit this further.

In this situation there is 30" of unit space available - so 60 branch circuits could be monitored.
If monitoring the main three additional circuits could be monitored with a total of 63 circuits.

This requires two controllers and three 21 position racks using 15" of unit space.
- see below -

SEM3 space varies by number of circuits monitored - this uses unit space.

== > 6" of space for up to 21 circuits monitored
one controller and one 21-pos rack

== > 9" of space for up to 42 circuits monitored
one controller and two 21-pos racks

== > 12" of space for up to 45 circuits monitored
one controller and two 21-pos racks plus one 3-pos rack

== > 15" of space for up to 63 circuits monitored
two controllers and three 21-pos racks

Note: If subfeed space is needed - it will take away from available unit space.

Features

Another innovation from Siemens is the updated P3 panel. It is a smaller footprint distribution panel to fit a large number of applications that require more (or larger) branch devices than the smaller lighting panels typically offer.

- The new 3VA family of breakers is fully implemented from 125A frame up to 800A frame main and branch applications.

Main Breakers are available up to 800A and the 30" wide enclosures allow for Horizontal Mains and Subfeeds up to 600A which dramatically increases the quantity of large branch breakers that can be installed to a maximum of 12 Breakers.

- Both Vertical Mount and Horizontal mount Main Breakers are available in most sizes from 250A frame thru 600A. 800A Mains are Vertical Mount only.

P3 Unit Space is available from 9" to 45"

The P3 panel configurations define the unit space allowed for by a given amperage, main device, and box height combination.

Mixing Branch Breakers in Unit space from 100A frame up to 250A frame using many strap kits that are shared with P2 makes field changes quick and easy.

Standard Enclosure: NEMA Type 1 are 24" wide x 7.75" deep x 56"-to-80" high. Size is determined by main device and other configured components. See SpeedFax charts for box heights.

- Type 1 Vented 30" wide x 7.75" deep boxes are available in 68" and 80" high when required. (30" Wide Vented Nema 3R to be available 2022)

Alternate Enclosures: Various alternate NEMA types are available as required in 24" wide x 7.75" deep. NEMA 3R/12, Type 4 & 4X.

Branch Breaker types available:

1" pole breakers (BL, BQD, xGB, xGB2, ED and 3VA41 frames) are mounted in 3" of unit space (6 pole increments). 3VA41 and xGB share the same strap kits and can be mixed and matched as needed.

Large Frame Branch Breakers, above 125 amps, are mounted in 6" single or twin breaker strap kits.

- QR (225A max) and 3VA52 (250A max) breakers are twin mounted in 6" of unit space.
- 3VA61/62 ETU (Electronic Trip) Breakers single mount in 6" of unit space. Communications Compartments are available in Unit Space for 3VA integration as needed.
- A max of 6 total large frame breakers are allowed in unit space in the standard 24" wide enclosure.
- A max of 12 total large frame breakers are allowed in unit space in the new Vented 30" wide enclosures. (max. unit space available will limit total)

Sub-feed breakers do not use Unit space since they mount outside of unit space. New Horizontal Mount 3VA 400A and 600A use less box height than previous Vertical mounted subfeeds.

- Changes to unit space in the field may require changing the deadfront center strip kit. Check with sales or the factory for additional unit space kits.

Many other Options are readily available: Integrated time clocks, bus mounted contactors, as mains or sub mains, split bus and subfeed lugs (up to 400 amp) are just a few of the options for this unique panel.

P3 Main Lug / Main Breaker specs

Voltage – 600V AC max. / 250V DC max.

Amperage:

- Main Lug: 250 to 800 amp max.
- Main Breaker: 225 to 800 amp max.
- Molded Case Switch: 150 to 800 amp max. (MCS)

Short circuit rating

- 200 KAIC max. symmetrical or equal to the lowest rated device installed unless a series rating is indicated.
- Panels with sub-feed or feed-thru lugs without a main device, circuit breaker or fusible unit, are limited to a three-cycle rating. The three-cycle rating for the P3 panel is limited to 22 KAIC. Note that the main device may be mounted remote from the panel.

Bussing – The P3 panel has similar options to P2 to meet market requirements. The standard bussing is temperature rated aluminum.

- **P3 Panel Bus is either 400A max. or 800A max. rated**. The rating is per the requirements of UL 67 – the standard for panelboards. All aluminum bussing is tin-plated.
- Optional bussing for the P3 panel is: 750 A/Si aluminum, temperature rated copper, and 1000 A/Si copper.
- Copper bus is tin-plated as standard, but silver plating is an additional option.

Weight – Approximate
Total panelboard weight when filled with a normal quantity of breakers and accessories is about 5 lbs. (2.3 kg) per inch (90g per mm) of box height.

Gauge Steel of Boxes/Fronts, Surface & Flush (see pgs. 11-37 & 11-41)

Dimensions in Inches (mm)		Gauge Steel		
H	W	Box	Front/Door	Type
56-80 (1422-2032)	24 (610)	16①	14④⑤⑥	Type 1
68-80 (1727-2032)	30 (762)	12②⑧	14⑦	Type 1, Vented
56-80 (1422-2032)	24 (610)	16②	14②	Type 3R/12
56-80 (1422-2032)	24 (610)	14③	14③	Type 4X

① 16 Gauge is Standard (14 Gauge & 12 Gauge are optional)
② No Optional Gauge available
③ 304SS 14 Gauge Std., 316SS 14 Gauge optional
④ FAS-Latch is 14 GA only.
⑤ Optional: Hinge-to-Box, Door-in-Door (14 GA Std./12 GA Std. or 10 GA Optional)
⑥ HTB/DND with Piano Hinge (14 GA Std./12 GA Optional) (304SS Optional)
⑦ Use Surface Mount only - any FasLatch, Hinge-to-Box, Door-in-Door style will fit: 56"-80"H to match Panel size. Lower cover available to fill open space.
⑧ Vented front section is painted ANSI 61 only. Allows use of any P3 Surface Front as needed.

① The vertical main breaker configurations reduce unit space by 6" or 12" vs. Horizontal Main

② The Special Configuration for 42 inches of unit space applies to only Horizontal Mount 400/600A 3VA mains only. This allows for 84 circuits max. in the 80" high Enclosures. This configuration is not available when Subfeed breakers or other devices are needed outside of unit space.

③ 62" and 74" size interiors may not be available in all configurations. These may require a Special Mod in COMPAS or may not be available at all. The next larger size should be available.

④ Minimum box size available for sub-feed breaker is 68H.

① 250VDC ratings are for 2-pole only (or for 2-poles of a 3-pole breaker)
② Special 80"H interior with 42" of unit space is available for 84 circuit requirements with 400A & 600A Horizontal 3VA Mains.
– No subfeed space is available in this configuration. Subfeed breaker, Feed-thru Lugs or SPD will drive to different configuration.
③ With Horiz. Mount 3VA 400/600A main: Available Unit space with Sub-feed 3VA breaker is 15" in a 68H box and 27" in a 80H box.
④ Some Breakers may be available for sale, but panels may not be rated for the application. Ratings may be shown as "n/a".

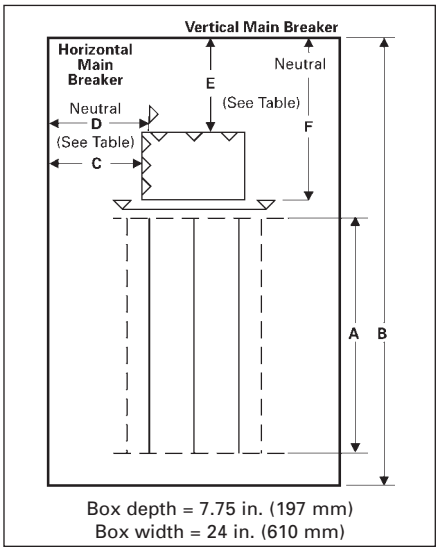
① Wire bending space for (4) 500 aluminum or (4) 350 copper

② Requires 6" of unit space compared to standard.

③ The 20.42" Neutral wire bend dimension is only for "84 circuit" configurations (42" of unit space) in the 80" High Enclosure with 3VA Horizontal Mount 400/600A mains. These "84 circuit" configurations are not available when Subfeed breakers or other options are needed outside of unit space.

Main Breaker Wire Bending Diagram



Box depth = 7.75 in. (197 mm)
Box width = 24 in. (610 mm)

① BLG two-pole breaker is one phase and neutral. Three pole is two phases and neutral - See SpeedFax page 7-31
② 1-pole HED 15-30A rated 65kA; 35-100A rated 25kA: 3-pole HED rated 42kA
③ BT and BTH only available for twin 15A or 20A - Qty. may be limited by number of neutral positions are available.
④ 3VA52 TMTU available in single or twin mount kit. 3VA61/62 with Electronic Trip (ETU) can be used only with the single mount kit.
⑤ 2-pole only or two outer poles of 3-pole breaker
⑥ Approved for CSA and UL Listed.
⑦ Approved for CSA but not UL Listed.

Note: COMPAS will determine actual neutral configuration to be built. Configurations will vary from what is shown – this chart shows max. possible connections for reference only.

① P1 Neutral kits allow for field replacement, or changes in size of neutral strips when needed.
- LNLK4X11B, LNLK6X17B and LNLK7X20B

② Neutral Lug Kit # BNK350N is available for field installations when needed.

③ Reference info: Neutral Lugs are rated for 75°C cable. When running a circuit to a load, the same type of wire should be used on the phase (breaker) and neutral connections in the panel.

a) Cables should be sized per NEC Table 310.16 (formerly Table 310.15(B)(16)) and the 75°C column.

b) Customer can choose to use 90C cable if sized as if it is 75°C.

c) Some 100% rated circuit breakers require the use of 90°C cable sized per the 75°C column. Refer to the Markings on the breaker and use the appropriate cable.

d) Some Circuit breakers 100A or less are marked as being suitable for 60°C, 75°C or 60/75°C cable. Refer to the Markings on the breaker and use the appropriate cable.

General Note: Panel numbers and box sizes are for reference only - COMPAS will configure proper Box size needed. H = Horizontal / V = Vertical Mount Main.

① 250A: for Vert. 3VA52/61/62 subtract 6" of unit space.

② 400A: For 3VA53/63 Horizontal Main and Vertical Main shown in chart - note 42" is special size for Horizontal mount only.

③ 600A: For 3VA54/64 Horizontal Main and Vertical Main shown in chart - note 42" is special size for Horizontal mount only.

General Modifications

P3 Type 1 Enclosures

Description
Extra Gutter to Sides or Ends of the Can: - 24" Wide only - no modifications for 30" wide series a) 6" end gutter b) 2" side gutter c) Barrier in Gutter (additional to extra gutter price - min 4" required.)
Trims / Fronts available: 24" wide a) FasLatch is std (24" wide) b) Hinge-to-Box Trim (HTB) c) Door-in-Door Trim (DID) d) Piano Hinge Trim (HTB or DID) e) Stainless HTB or DID w/Piano Hinge
30" Wide Type 1 Enclosure notes: a) Always use 24" wide Surface Fronts to match interior size – any style above works. b) For flush applications: order Enclosure with Flushing rail option or Flushing Rail kit, but still use Surface front.
Other Options see Page 11-123 / 11-124 a) Trim mounted devices b) Painted boxes / Custom colors c) Increased Gauge trims and boxes d) Panel Skirts e) Special Locks – see page 11-38

(Devices mounted and wired to the trim should also have Hinge-to-Box front or Door-in-Door front specified)

Panel Bus Modifications

P3 Main Bus Type	Catalog Number Codes Amperes Ratings				
	125A	250A	400A	600A	800A

Subfeed, Feed-Thru and Split Bus (for 2-pole or 3-pole)

Ampere Rating	Connector Cu/Al Wire Range	Unit Space (inches)

Subfeed (Double) Lugs (400A max) for Main Lug Panelboards Only

225/250	(2)—#6 AWG-350 kcmil	6
400	(4)—250 kcmil (2)—600 kcmil	0

Feed-Thru Lugs

Sub-Feed Space typically has room for only one device, for example: Feed-thru Lugs, SPD, Sub-feed Breaker or other.

See page 11-69 for unit space adders and compatibility with other options.

225/250	(1)—#6 AWG-350 kcmil	0
400	(2)—250 kcmil or (1)—600 kcmil	6
600	(2)—250-500 kcmil	0
800	(2)—600 kcmil	6

Split Bus (1 max. per interior))

225/250	(1)—#6 AWG-350 kcmil	6
400	(2)—250 kcmil or (1)—600 kcmil	6
600	(2)—250-500 kcmil	6
800	(2)—600 kcmil	6

Branch and Main Breaker Accessories

See SpeedFax Breaker Sections for more info
- Handle blocks, Handle Ties, Handle locks
- Aux. Contacts① and other options
- UVR - Under Voltage Release①

Increase neutral capacity up to 200%

Main Bus Amps
125A / 250A / 400A / 600A Not available for 800A - Limitations/restrictions may apply

Copper MLO (Main Lug Only)

Main Bus Amps
See Main Lug table for details on page 11-61

Branch and Main Breaker Accessories

Type P3 Panelboards are factory labeled suitable for use as service entrance equipment when NEC requirements are met.

a) When a panelboard is used as service entrance equipment, it must be located near the point of entrance of building supply conductors. The National Electrical Code prior to 2020 allowed a maximum of six service disconnects in the same panelboard. The 2020 NEC now restricts panelboards to one service disconnect in a panelboard enclosure. Adoption of this code vary by state or local jurisdiction. Consult the local code authorities to determine if this has been adopted in the area where the panel is to be installed and configure the panel accordingly. Also, panels must include a connector for bonding and grounding the neutral conductor.

b) Factory installed and Field installable Service Entrance Barrier kits are available as required by UL67 (In COMPAS, you must select "Service Entrance Required"). Siemens includes these barriers in all Factory assembled panels, marked as Service Entrance, and also has available Field Installable kits when needed.

Grounding of Panelboards

Ground Bars except for brazed to box are shipped with the panel interior, not factory mounted.
- Non-Insulated Equipment Ground Bar
- Copper Non-Insulated Ground Bar
- AL Insulated Equipment Ground Bar
- CU Insulated Equipment Ground Bar
- Copper Ground Bar Brazed to Box

(Only available for unpainted Type 1 enclosures 24" wide.)

Shunt Trip on Main or Branch

General notes:

a) 3VA series uses internal Shunt trips and other accessories - generally no additional unit space is needed except for 1-pole that requires "1-pole in a 2-pole frame" where applicable.

b) BL, BLH, HBL, NGB, HGB, LGB, ED4, HED4, ED6, HHED6 uses 1" unit space for shunt trip.

Time Clocks

1) Time clocks may be mounted in a 23" encl. to be cable connected to the panel.
2) Sangamo, Tork or Paragon time clock can be supplied and mounted in panelboard cabinet. This adds 12" to panel height and mounts in Sub-feed space.

Description / features
a) Time Clock (1 or 2-pole, single or double throw contacts; 3-pole, single throw) 277V maximum with plain dial b) Astronomical dial c) An omitting device d) Reserve power or carryover e) Space and mounting provisions only

NOTE: n/a = Option Not Available

* Some Options are pending implementation in future COMPAS releases. Expect FY22 availability.

① 200% Neutral may have restrictions based on Lug configurations chosen, for example:

a) 800A 3VA54/64: 200% Neutral is only available with main breaker lugs (2) 600; all other lugs cannot have 200% neutral.

b) COMPAS will restrict as needed during configuration process

② For Sentron: FT compression lugs require only 6" extra box size beyond Main Breaker with non-compression lugs. Feed-thru Compression lug adder not included.

③ (2) 350 CU lugs are available per phase and are sufficient for 600A. (2)500 Cu lugs per phase are not available, but are not needed for 600A with copper wire.

④ Feed-thru compression lugs require only 6" extra box size beyond M/B requirement. Adder for the M/B portion of M/B + FTL is still tbd*

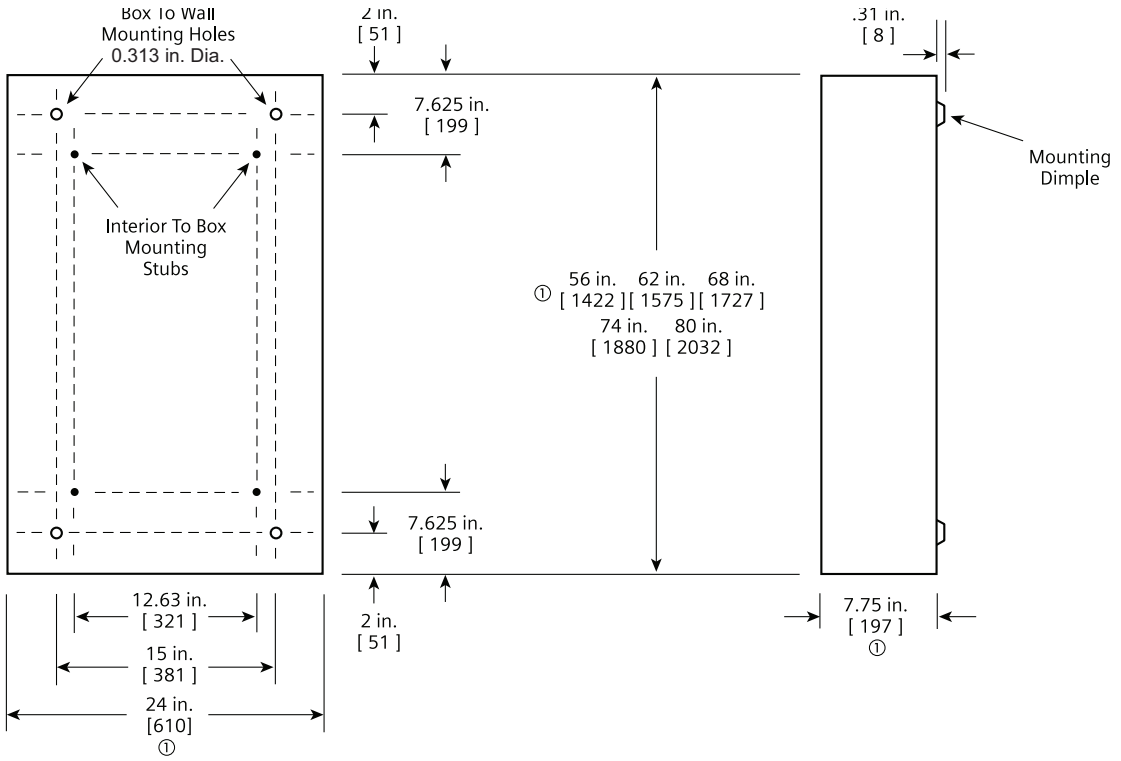
⑤ Split bus is paired with feed-thru lugs by default. Split Bus Guidelines: In COMPAS configure a panel with standard Main Lugs and Feed-Thru lugs, then add all breakers for the top section before selecting "split Bus". (6" of unit space is used for the split.) After the split is shown, add breakers to the next section of bus. Lugs are on each end of the panel. The original System Voltage selected will be shown for the panel. Any variations need to be added per special Mod for tech review before panel is approved.

⑥ 3VA ETU requiring Neutral CT may get pushed to larger panel type. There are limited numbers of CT's that can be mounted in a P3 panel and some Cable sizes require more wire bend space than is available.

⑦ 3VA 400A/600A subfeed - reduced std MLO Unit Space by 18" in 68" and 80" high boxes only, but allows for Main MLO conversion to horizontal Main in the field when kits becomes available.

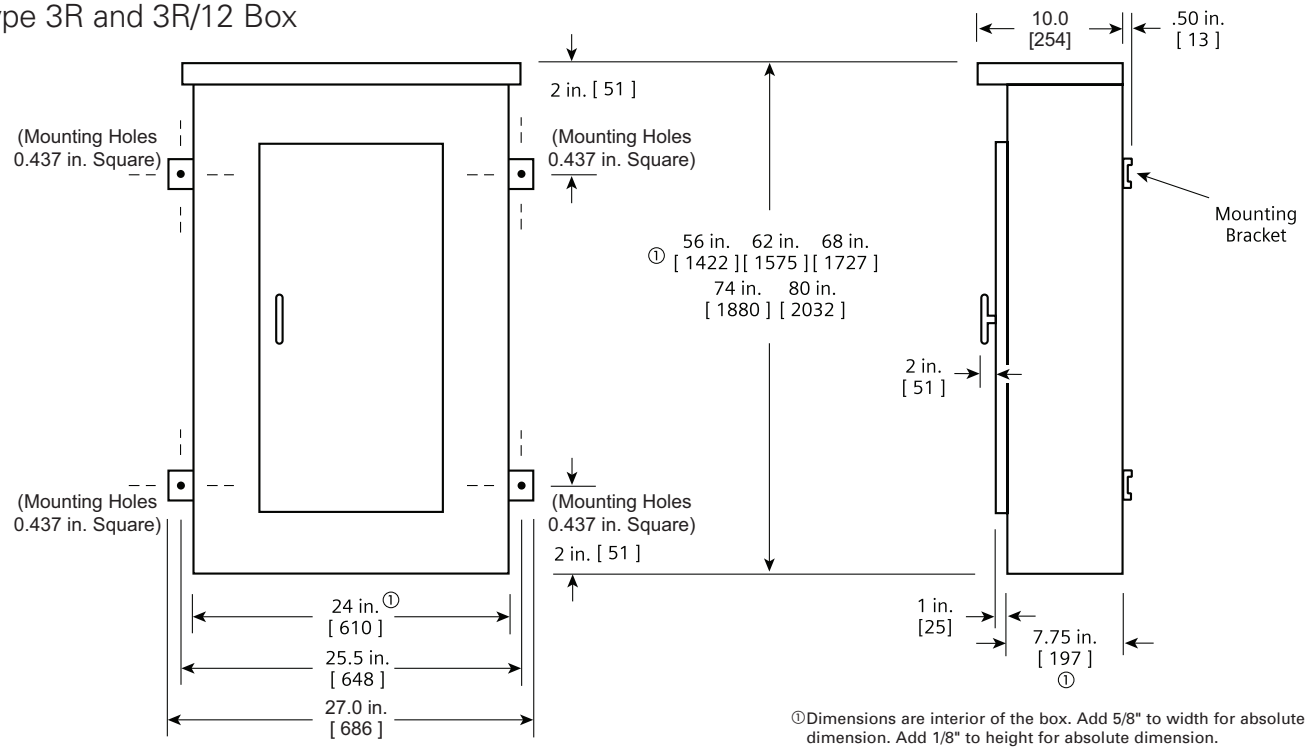
Type 1 Box

Box is symmetrical



(UL approved construction. 16 gage steel or equivalent alternate construction.
14 or 12 gage is available as an optional special order.)
G60 Galvanized is standard without paint.

Type 3R and 3R/12 Box



①Dimensions are interior of the box. Add 5/8" to width for absolute dimension. Add 1/8" to height for absolute dimension.
Dimensions shown in inches and millimeters [ ].

(UL approved construction. 16 gage steel can with
14 gage front or similar approved construction.)
A60 Galvannealed with ANSI 61 light gray paint is standard.

P3 Standard Enclosures / Fronts

Box Height (in.)	24" Wide Enclosures - 7.75" Deep Catalog Numbers				
		FasLatch Front			
	Type 1 Box	Surface	Flush	Type 3R	Type 3R/12
56	24WD56	P3S56	P3F56	24NRD56	24WPD56

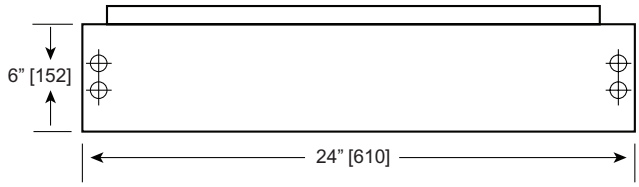
74*	24WD74	P3S74	P3F74	24NRD74	24WPD74
80	24WD80	P3S80	P3F80	24NRD80	24WPD80

*P3 enclosures 62" and 74" will be "Make to Order" with longer Lead-times than other standard sizes.



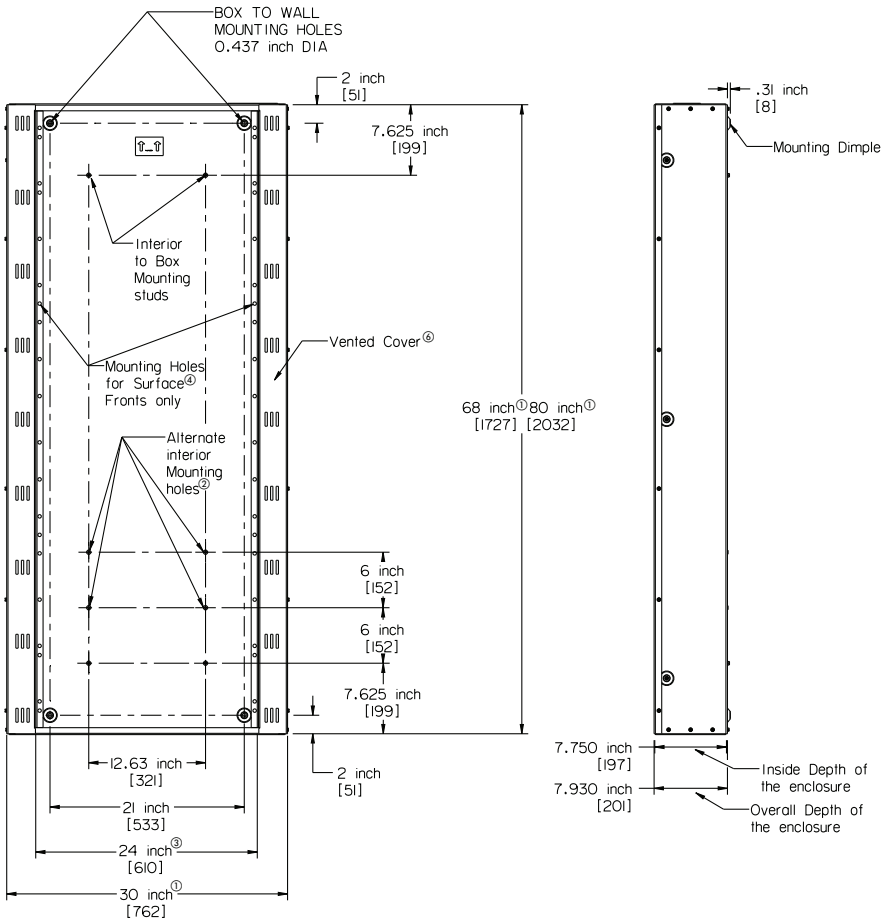
Lower 6-inch-high Cover size for reference

P3 Vented Enclosures / Fronts

Box Height (in.)	30" Wide Vented Enclosures - 7.75" Deep (inside) Catalog Nos.		
	NEMA Type 1 Vented	Front①②	Type 3R Vented③ Exterior Depth 11.93"
		Use Surface only	
68	30WD68V** Surface Mount box	Use 24" wide Surface Mount Fronts to match interior size and add lower covers as needed.	tbd**④ (FY22)
80	30WD80V*** Surface Mount box		tbd***④ (FY22)
68	30WD68VF** Flush Mount box		Flush Mount Type 1 with external Flushing ring available soon. (FY22)
80	30WD80VF*** Flush Mount box		

** 68" high box mounts 56", 62" and 68" high interiors
*** 80" high box mounts 68", 74" and 80" high interiors
① Lower Cover Kit # BXXCVR06S24W can be used with 24" Fronts to cover 6" of open space below the Type 1 front.
② 30" wide Type 1 Enclosure can mount any standard Surface mount Front; FasLatch, Hinge-to-Box, Door-in-Door and all piano Hinge variations including 304 Stainless Steel.
③ Lower Deadfront Cover Kit # BXXDFK06R24W can be used with 30" NEMA 3R to cover 6" of open space below the deadfront.
④ Standard NEMA 3R are Painted Ansi 61 Grey.
- For Stainless versions add "??" to Enclosure number. (tbd)

P3 Type 1 Ventilated Enclosure 30" Wide



① Dimensions are interior of the box. Add 3/8" to width for outside dimension. Add 3/16" to height for outside dimension. Dimensions shown in inches and millimeters [ ].
① Alternate interior mounting holes to mount interiors smaller than box size:
— Alternate mounting hardware included with lower cover kit # BXXCVR06S24W
68" High box : a) 6" smaller = 62" interior or b) 12" smaller = 56" interior
80" High box : a) 6" smaller = 74" interior or b) 12" smaller = 68" interior
② Use 24" wide P3 Surface mount front that matches height of interior mounted
③ Most standard 24" wide Surface Mount P3 fronts will fit, including FasLatch, Hinge-to-Box, Door-in-Door and all Piano Hinge variations
④ For Flush Mount Requirements: order Flush Enclosure that comes with externally mounted Flushing Ring.
— Use Surface mount fronts for these enclosures also. (to be available late FY22)
⑤ Vented Cover included with Enclosure - Painted ANSI 61 Grey to match standard front.

Spare Parts and Field installable Kits for P2/P3 Panels

Kit Number	Current Product: P1 Revised	P2	P3	C1	C2	Old Product is no longer Manufactured, some kits are available: P1 Original	S1, S2, SE	qty/ kit	Product Description Note: Some kits apply to only specific enclosures used or configurations of the product listed	Drawing # ref for part or kit
Strap Kits										
BBKB32		X	X					1	P2/P3 BL/BQD 100A max. Branch Strap kit, uses 3" of unit space for 6 circuits total.	11-D-2267-01
BBKVA4P2P3		X	X					1	P2/P3 3VA41/xGB 125A max. Twin Mount Strap Kit, uses 3" of unit space for 6 circuits.	13-D-2011-13
BBKQR2			X					1	P3 QR 225A max. Twin Mount Branch Strap Kit, 6" of unit space for two 2-p or 3-p breakers	11-D-2637-01
BBKQRP2FK			X					1	P3 Filler for QR horiz. Dual mnt., Kit contains all cover plates necessary to change from QJ to QR both 2p & 3p breakers. For 1-ph panel, both breakers must change from QJ to QR.	see instruction sheet for details
BBKVA5262P2S		X	X					1	P2/P3 250A max. 3VA52/61/62 Single Mount Branch Strap Kit, 1ph or 3ph, uses 6" of unit space for one 2-p or 3-p breaker. (includes 1 #BBKVA5262P2HW kit)	11-D-2894-01
BBKVA5262P2HW		X	X					1	Hardware kit for Branch/Main Horizontal Single mount or for Vertical Mount 3VA52/61/62 in either P2 or P3 panels.	11-D-2895-61
BBKVA52P3T			X					1	P3 only Twin Mount Branch Kit, 250A max., 1ph/3ph strap kit for 3VA52 only, includes two BBKVA52P3HW kits	11-D-2764-01
BBKVA52P3HW			X					1	3VA52 only P3 HDWR KIT for twin mount locations only, 1ph/3ph Hardware kit for Twin mount Branch Horizontal 3VA52 only in P3 panels.	11-D-2763-01
BBKED32①		X	X					1	P2/P3 ED Twin Mount Branch Strap Kit, 3" of unit space for 6 circuits.	Use 3VA41 with BBKVA4P2P3 where possible.
BBKNB32①		X	X					1	P2/P3 xGB Twin Mount Branch Strap Kit, 3" of unit space for 6 circuits.	
BBKGB32①		X	X					1	P2/P3 GB2 Twin Mount Branch Strap Kit, 3" of unit space for 6 circuits.

DFFP1A	X	X	X	X	X	X	X	1	DFFP1A Blank filler , 1 inch snap-in, replaced old QF3 and DFFP1 in Systems Products. Ref. old #12-1800-01 and 11-D-4554-01	11-D-4613-01
DFFP3		X	X					1	DFFP3 Kit includes 3 inch high Blank Deadfront filler plates for both P2 (11-D-3014-02) and P3 (11-D-3035-02). Hardware & installation instructions included.	11-D-2269-01
DFFP6		X	X					1	DFFP6 Kit includes 6 inch high Blank Deadfront filler plates for both P2 (11-D-3014-01) and P3 (11-D-3035-01). Hardware & installation instructions included.	11-D-2270-01
DFFPFD01	X	X	X			X	X	1	FD Main Filler Plate (plastic) for 1-Ph and 3-Ph P1 Panels (use for Original or Revised P1 and other applications)(P2/P3 and S1/S2/SE)	11-D-4617-01
DFFPJD01	X	X	X			X	X	1	JD Main Filler Plate (plastic) for 1-Ph and 3-Ph P1 Panels (Small RP1 opening) (use for Original or Revised P1 and other applications)(P2/P3 and S1/S2) [for JD in large RP1 Main opening use DFFPJD02, ref # 11-D-4598-02]	11-D-4522-61
DFFPVA5262P2A		X	X					1	3VA52/61/62 Filler, used for P2 and P3 single mount horizontal and vertical applications, 1 piece per kit. Included in all appropriate Strap kits.	11-D-4610-01
DFFPVA5262P2B		X	X					1	3VA52/61/62 Provision kit, Blank Deadfront Plate and barrier included for when there is no breaker installed in a strap kit. Used for P2 and P3 single mount horizontal applications.	11-D-3340-01 11-D-4614-01
DFFPVA5363A	X	X	X					1	3VA53/63 Filler for P2/P3 Main/Subfeed (also used in RP1 main applications with Large MB Deadfront opening only)	11-D-4617-01
DFFPVA5363P3B			X					1	3VA53/63 Provision kit, Blank Deadfront Plate and barrier included for when there is no breaker installed in a strap kit. Used for P3 single mount horizontal applications.	11-D-3373-01 11-D-4627-01
EBF1		X	X					1	NEB/HEB Filler Plates (replacement parts)	11-D-4529-01
DFP3AP01		X	X					1	Adapter Kit for P2/P3 BL/BQD/ED/xGB/etc. breakers. This adapter plate fills 3 inches of unit space on one side of the Deadfront to allow the smaller breakers and DFFP1A filler to fit correctly.	11-D-3033-61
DFK1		X	X					1	P2/P3 kit to replace center strips in the deadfront when breaker strap kits are changed or modified. Kit includes mounting hardware, seven different lengths of center strip for 3" thru 21". (for BL/BQD/xGB/3VA4/etc. sizes of breakers)	11-D-2273-01
MBAVA55HEXBR			X					1	P3 3VA55/65 800A Handle Extension Bracket	tbd

① These Strap kits may only be available as field replacement. COMPAS may configure all future 125A frame and larger requirements with 3VA Strap kits and associated breakers.

Panelboard Specific 3VA Accessories Available in Panelboards

3VA Series Accessories

There are 4 positions on each side of the trip handle of the 3VA52 breaker. Accessories can be 1, 2 or 3 positions wide and fit in specific locations as shown on charts and on the inside cover of each breaker.

Accessory types:

3VA breaker auxiliary releases allow remote electrical tripping of the circuit breaker

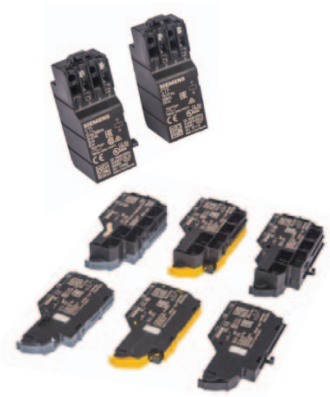
- **STL** – Shunt Trip Left
- **STF** – Shunt Trip Flexible
- **UVR** – Undervoltage Releases Trip
- **UNI** – Universal Release - Shunt Trip and an Undervoltage Release are Combined

All Auxiliary and Alarm Switches for 3VA breakers belong to an integrated range of accessories

- **AUX_HQ / AUX_HP** – Auxiliary Switches
- **LCS_HQ / LCS_HP** – Leading Changeover Switches
- **TAS_HQ / TAS_HP** – Trip Alarm Switches
- **EAS_HQ / EAS_HP** – Electrical alarm switches

3VA Auxiliary and Alarm Switches have standard (HQ) and high capacity (HP) types as well as "electronic" versions for example: **AUX_HQ_el**

* Padlock accessory will be available in a future release.



3VA accessories install easily.
Special Hardware kit for P3 Twin Mount aligns screw for easy installation.

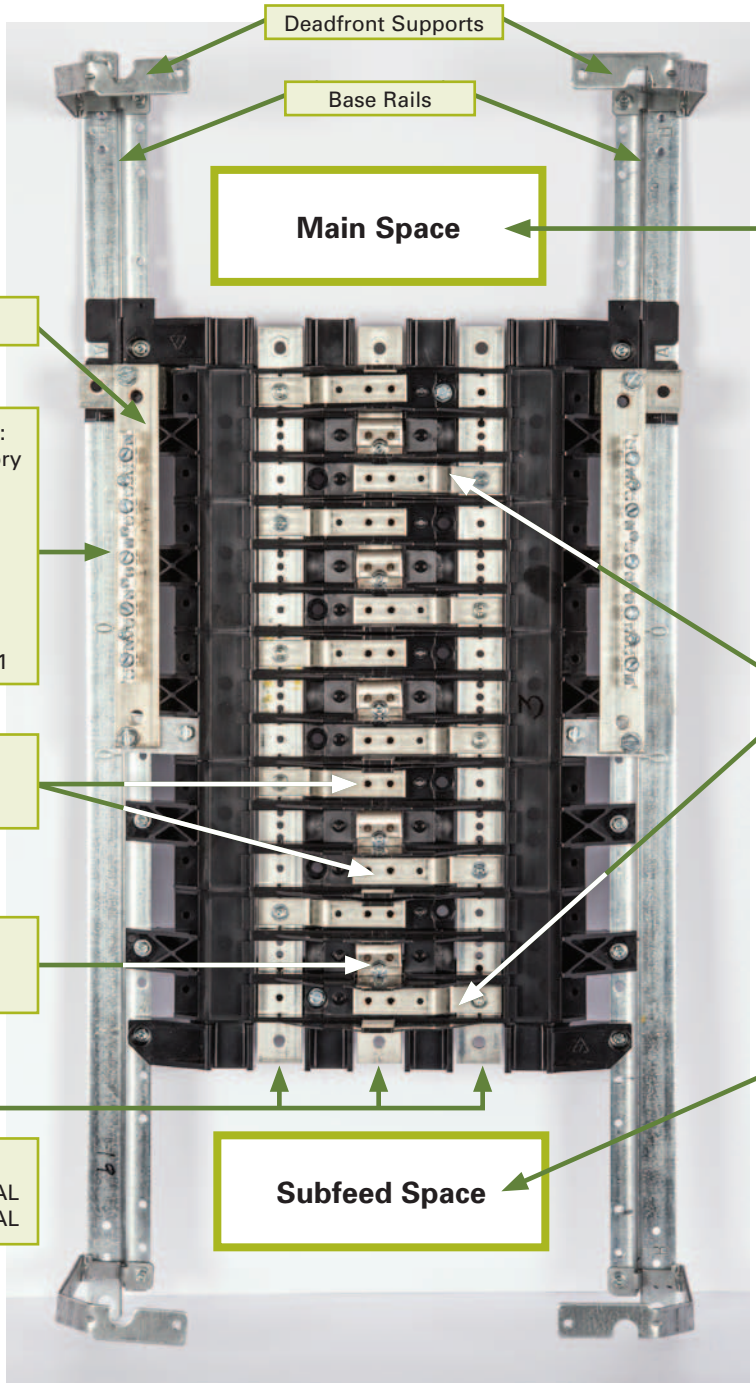
3VA Breaker Configuration Information in Panelboards

P1 Lighting Panelboard

P1 interiors have unit space setup for either:
A) BL/BQD type of breakers only
or
B) xGB and 3VA41 breakers only in same interior
(no BL/BQD allowed)



P1 Lighting Panel

P1 Main Space can include:

Main Lugs: 250A or 400A max
Main Breaker Types:
- 100A max BL/BQD
- 125A max. xGB/3VA41 (TMTU) (horiz. mount)
- 225A max. QR series (horizontal mount)
- 250A max. 3VA52/61/62 (TMTU/ETU) (horiz. mount)
- 400A max. 3VA53/63 (TMTU/ETU) (vertical mount)

(ETU = Electronic Trip Unit)
(TMTU = Thermal Magnetic Trip Unit)
Note: ED, FD, xGB and JD will no longer be selectable in COMPAS by late 2021.

P1 Branch Breakers — Small Frame only:

a) Standard BL/BQD interior unit space will only accept 100A max. BL/BQD series breakers. 15A and 20A BT and BTH Tandem series also available.
b) xGB/3VA41 interior unit space will only accept 125A max. xGB series or 3VA41 TMTU series breakers.
c) BSPD Surge Protective Devices can be added in any location that accepts either BL/BQD or xGB/3VA41 series.
Note: always check dead front labels for allowed breakers.

P1 Subfeed Space offering:

Feed-thru Lugs:
A) 250A or 400A
B) Surge Protection Devices (SPD)
TPS4 01 and TPS4 L1 series of Surge protection is available
C) Subfeed Breakers: (Horizontal only):
- 250A max. 3VA52 TMTU
- 250A max. 3VA61/62 ETU
- 225A max. QR
- 100A max. BL/BQD
- 125A max. xGB/3VA41

Note: xGB, ED & FD will no longer be selectable in COMPAS by late 2021.

3VA Breaker Configuration Information in Panelboards

P2 Lighting Panel General information *Minimum enclosure size: 20" wide x 5.75" deep*

P2 Lighting Panelboard

P2 interiors have flexible unit space setup for Multiple Branch Breaker Types and many different Main/Subfeed options.

Neutral Cross Strap
– positions for mounting Neutral lugs
– many different configurations are used.

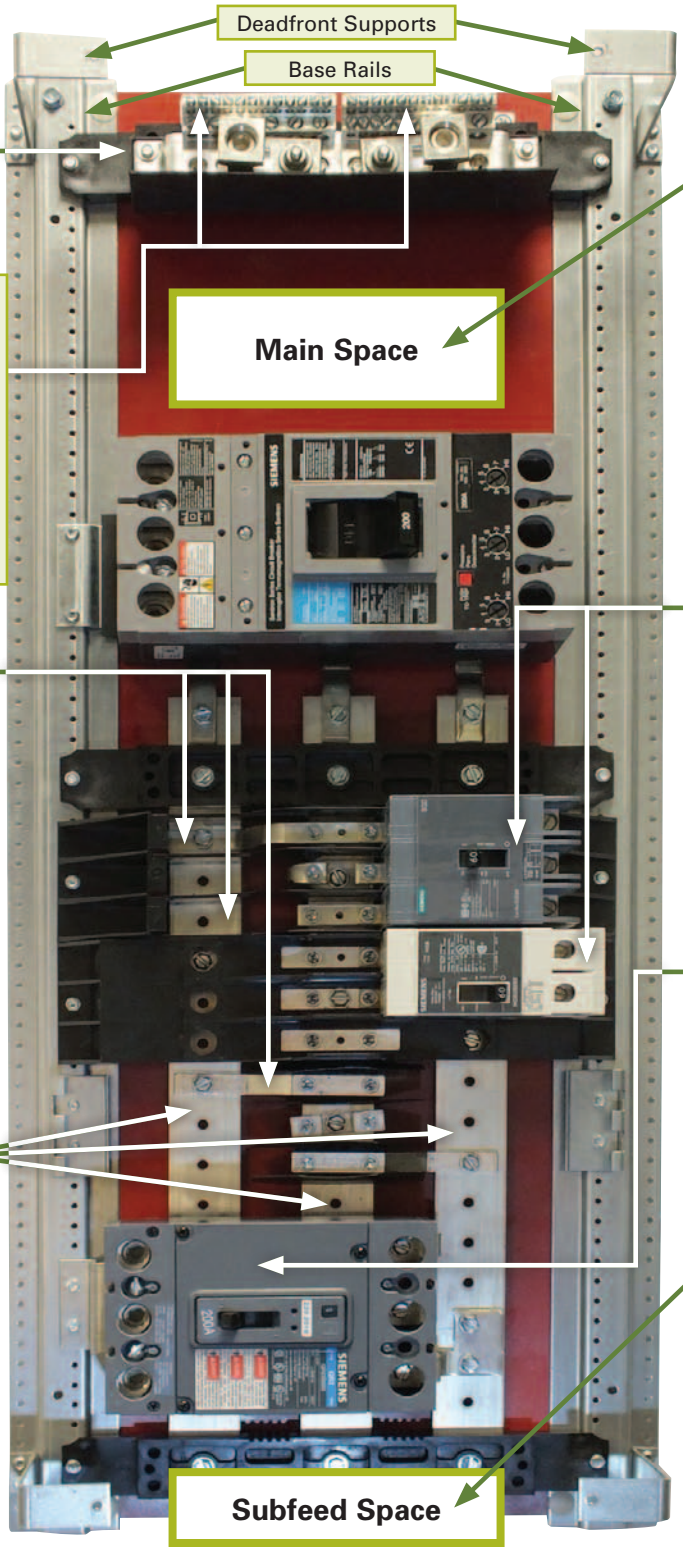
Neutral Strips:
1/0 max. cable size "Step lugs" and other varieties depending on the configuration
– factory assembled only
– optional field installable kits may be added in near future to include 2/0 capability.

Various Branch Breaker Strap Kits installed

Field installable Neutral Extension can be added for AFCI/GFCI when needed due to short pigtails. It can be positioned anywhere along the base rail on either side.
kit # **BNKP2EX1**

BNKP2EX1

Bus Bars:
250A max
- CU or AL
600A max
- CU or AL



P2 Lighting Panel

P2 Main Space can include:

Main Lugs: 125A, 250A, 400A or 600A
==> also Subfeed Lugs: 125A, 250A or 400A

Main Breaker Types:
- 100A max. BL/BQD or 125A max. 3VA41 225A max. QR
- 250A max. 3VA52/61/62 (TMTU/ETU) (horiz. mount)
- 400A max. 3VA53/63 (TMTU/ETU) (vertical mount)
- 600A max. 3VA54/64 (TMTU/ETU) (vertical mount)

Note: xGB, ED, FD, JD and LD will no longer be selectable in Factory assembled panels by late 2021

(ETU = Electronic Trip Unit)
(TMTU = Thermal Magnetic Trip Unit)

P2 Branch Breakers — Small Frame:

a) 100A max. BL/BQD series
b) 15A and 20A BT Tandem series
c) Various AFCI/GFCI series
d) 125A max. 3VA41 series
- 3VA41 TMTU is 480V Delta capable

Note: BSPD Surge Protective Devices can be added in any location that accepts either BL/BQD or xGB/3VA41 series.
Note: ED, xGB & GB2 series will no longer be selectable in COMPAS late 2021.

P2 Branch Breakers — Large Frame (3 max.)

1) 225A max QR series
2) 150A max 3VA61 ETU single mount
3) 250A max 3VA52/62 TMTU/ETU single mount

(Max. count of QR frame and all 3VA52/61/62 frame breakers is three total per panel)

Subfeed Space offering:

Feed-thru Lugs:
A) 125A, 250A, 400A, or 600A
B) Surge Protection Devices (SPD)
– TPS4 01 and TPS4 L1 series of Surge protection is available
C) Subfeed Breakers:
– No 3VA subfeed available

(FD and JD subfeed options are being removed)

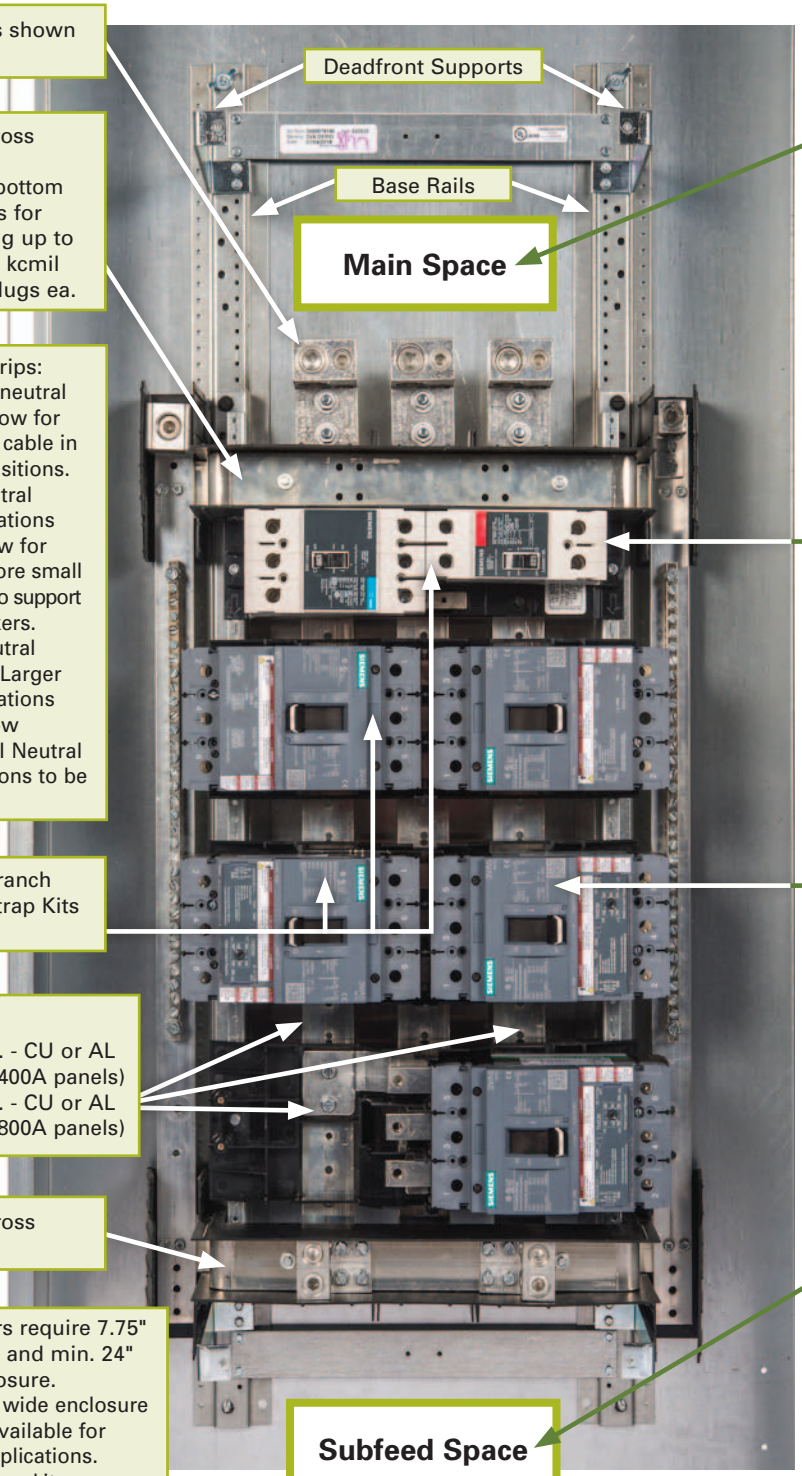
Revised on 08/31/21

3VA Breaker Configuration Information in Panelboards

P3 Lighting Panel General information *Minimum enclosure size: 24" wide x 7.75" deep*

P3 Lighting Panelboard

P3 interiors have flexible unit space setup for Multiple Branch Breaker Types and many different Main/Subfeed options.



Main Lugs shown installed

Neutral Cross Straps
– top and bottom
– positions for mounting up to four 350 kcmil Neutral lugs ea.

Neutral Strips:
– New 2/0 neutral strips allow for 125A AL cable in many positions.
– New neutral configurations also allow for many more small neutrals to support BT breakers.
– New Neutral risers in Larger configurations also allow 350kcmil Neutral connections to be added.

Various Branch Breaker Strap Kits installed

Bus Bars:
400A max. - CU or AL - (250A & 400A panels)
800A max. - CU or AL - (600A & 800A panels)

Neutral Cross Straps

P3 interiors require 7.75" box depth and min. 24" wide enclosure.
– New 30" wide enclosure is now available for some applications.
– Many Strap kits are shared with P2

P3 Lighting Panel

P3 Main Space can include:

Main Lugs: 250A, 400A, 600A or 800A
==> also Subfeed Lugs: 250A or 400A

Main Breaker Types:
- 250A max. 3VA52/61/62 (TMTU/ETU) (horizontal mount)
- 400A max. 3VA53/63 (TMTU/ETU) (horizontal or vertical mount)
- 600A max. 3VA54/64 (TMTU/ETU) (horizontal or vertical mount)
- 800A max. 3VA55/65 (TMTU/ETU) (vertical mount) now available.

Note: FD, JD and LD will no longer be selectable in Factory assembled panels by late 2021

(ETU = Electronic Trip Unit)
(TMTU = Thermal Magnetic Trip Unit)

P3 Branch Breakers — Small Frame:

a) 100A max. BL/BQD series
b) 15A and 20A BT Tandem series
c) Various AFCI/GFCI series
d) 125A max. 3VA41 series
– 3VA41 TMTU is 480V Delta capable

Note: BSPD Surge Protective Devices can be added in any location that accepts either BL/BQD or xGB/3VA41 series.

Note: ED, xGB & GB2 series will no longer be selectable in COMPAS late 2021.

P3 Branch Breakers — Large Frame (6 max. 24" wide, 12 max. 30" wide)

1) 225A max. QR series (twin Mount)
2) 250A max. 3VA52 series (twin Mount)
3) 250A max. 3VA52/62 series & 150A 3VA61 series (single Mount) TMTU/ETU

Max. limit of 6 total of these breakers in a 24" wide enclosure.

Max. limit 12 total in 30" wide enclosure. (unit space available limits max.)

New 3VA offering has many field installable accessories available.

P3 Subfeed Space offering:

Feed-thru Lugs:
A) 225A/250A, 400A, 600A or 800A
B) Surge Protection Devices (SPD)
– TPS4 01 and TPS4 L1 series of Surge protection is available
C) Subfeed Breakers: (only 1 allowed):
– 400A max. 3VA53/63 (TMTU/ETU)
– (Horiz Single Mount only - 24" wide)
or
– 600A max. 3VA54/64 (TMTU/ETU)
– (Horiz Single Mount only - 30" wide enclosure required)

(FD and JD subfeed options are being removed)

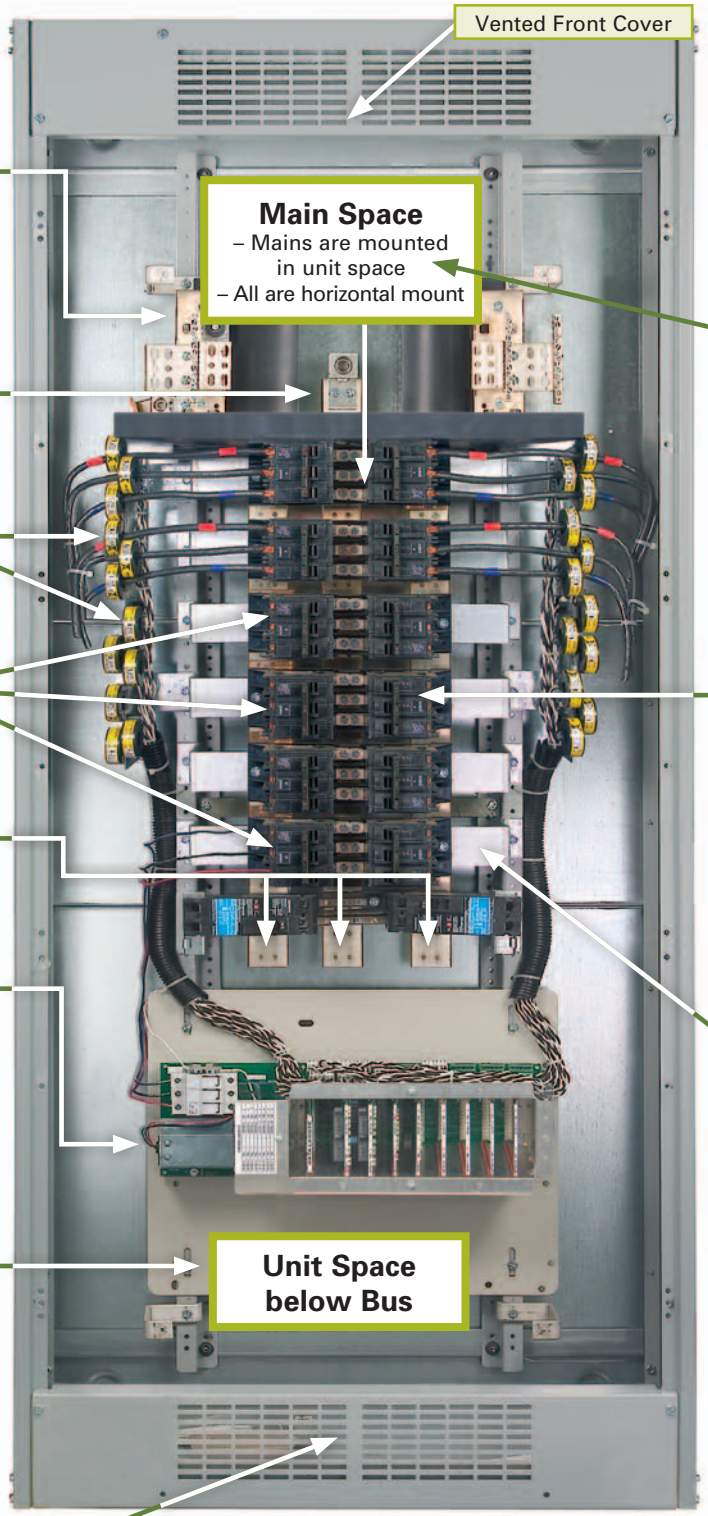
3VA Breaker Configuration Information in Panelboards

P4 Power Panel ==> being replaced by Skinny P5

P4 interiors have unit space setup for Multiple Branch Breaker Types and many different Main Breaker options.

NOTE: COMPAS Configurations will automatically start configuring Skinny P5 instead of P4 when the transition date is reached. Most P4 configurations will convert to Skinny P5 using the 12.75" deep x 32" wide enclosures instead of the 10" deep x 32" side enclosures.

32" Wide Skinny P5 and standard 38" wide P5 will share most strap kits. Skinny P5 will be limited to 800A and smaller breakers similar to existing P4.



Neutral Connections*
– at Main end of panel
– Various configurations.
* Depends on breaker selection - Consult factory for details

Main Lugs shown installed

SEM3 CT's installed

Various Branch Breaker Strap Kits installed

Bus Bars: CU or AL

SEM3 Controller and Meter module racks

P4 Unit Space below Bus: There is no actual Subfeed space.- All Space is unit space, but at the bottom below the bus, there can be additional components such as the SEM3 devices shown.

P4 Power Panel

P4 Main Space can include:

Main Lugs: 400A, 600A, 800A, 1000A or 1200A

Main Breaker Types: (horizontal mount)
- 400A max. 3VA53/63
- 600A max. 3VA54/64
- 800A max. 3VA55/65 (TMTU/ETU)

(ETU = Electronic Trip Unit)
(TMTU = Thermal Magnetic Trip Unit)

P4 Branch Breakers — Small Frame:

a) 100A max BL series (10, 22, 65 kaic @ 240V)
b) 100A max BQD series (14 kaic @ 480/277V)
c) 125A max. 3VA41 TMTU (480V delta capable)

P4 Branch Breakers — Large Frame (6 max.)

1) 150A 3VA61 ETU Series
2) 225A max QR series
3) 250A max 3VA52/62 TMTU/ETU
4) 400A max. 3VA53/63 (TMTU/ETU)
5) 400A max JD and VL-JG series
6) 600A max. 3VA54/64 (TMTU/ETU)

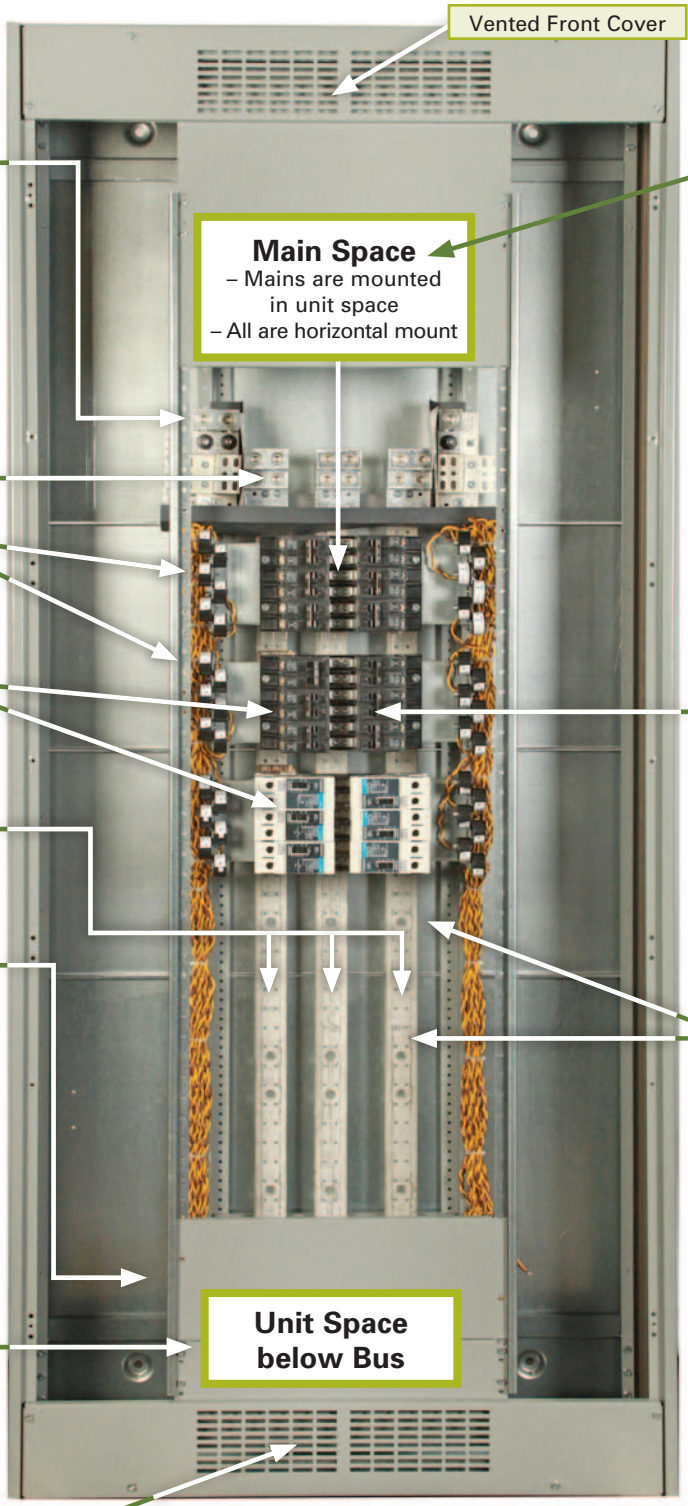
(See Strap Kit Table page 11-104).

P4 Standard Box Width is 32" W ==> this is being replaced by 32" W Skinny P5

3VA Breaker Configuration Information in Panelboards

P5 Power Panel

P5 interiors have unit space setup for Multiple Branch Breaker Types and many different Main Breaker options.



Neutral Connections*
– at Main end of panel
– Various configurations.
* Depends on breaker selection - Consult factory for details

Main Lugs shown installed

SEM3 CT's installed

Various Branch Breaker Strap Kits installed

Bus Bars: CU or AL

SEM3 Controller and Meter module racks

P5 Unit Space below Bus: There is no actual Subfeed space.- All Space is unit space, but at the bottom below the bus, there can be additional components such as the SEM3 devices shown.

P5 Power Panel

P5 Main Space can include:

Main Lugs: 800A, 1000A or 1200A

Main Breaker Types: (horizontal mount)
- 800A max. 3VA55/65 (TMTU/ETU). Also, 1000A 3VA66 in same frame size.
- 800A max. Sentron MD, and VL-MG Series
- 1200A max. Sentron ND and VL-NG series

(ETU = Electronic Trip Unit)
(TMTU = Thermal Magnetic Trip Unit)

P5 Branch Breakers — Small Frame:

a) 100A max BL series
b) 100A max BQD series
c) 125A max. 3VA41 TMTU (480V delta capable)

P5 Branch Breakers — Large Frame (6 max.)

1) 150A 3VA61 ETU Series
2) 225A max QR series
3) 250A max 3VA52/62 TMTU/ETU
4) 400A max. 3VA53/63 (TMTU/ETU)
5) 600A max. 3VA54/64 (TMTU/ETU)
6) 800A max. 3VA55/65 (TMTU/ETU) Also, 1000A 3VA66 in same frame size.
7) 1200A max. ND and VL-NG series

(See Strap Kit Table page 11-119).

P5 Standard Box Width is 38" W

3VA6 ETU – "Electronic Trip" versions of 3VA Breakers used in Panelboards

- See following pages for internal accessory pocket locations available in TMTU & ETU versions
- Standard part number shown for base trip unit - other variations available shown in lower chart
- Breakers shown do not include lugs - lugs are ordered separately as needed per application
- COMPAS will allow various Lug configurations based on Panel Type and mounting location

Connector Kits for 3 Pole 3VA6 series Breakers

One Connector Kit is required for each breaker when panel mounted.
NOTE: Use 3-pole kit for 2-pole applications

Connector Kits	AL body for AL or CU Cable	CU body - copper wire only

...KQ31-2AA0	ETU860 LSIG w/Display & Metering	I_r	I_i	I_{sd}	I_g	Adjustable Protection (b)	yes - both

Trip Unit Feature description and notes	
I_r	Adjustable Overload Protection
I_i	Adjustable Instantaneous Short-Circuit Protection
I_{sd}	Adjustable Delayed Short-Circuit Protection
I_g	Either (a) Adjustable Ground-Fault Alarm or (b) Adjustable Ground-Fault Protection (not both)

3VA 100% rated breakers have restrictions as to where and how they can be used in Panels. COMPAS will configure where allowed.
Ex. #1: 3VA62 frame breakers are NOT allowed in any P1 panels, although 3VA61 will be allowed in the 250A 3VA 52/62 Main/subfeed Strap kits. (3VA61 max. trip is 150A)
Ex. #2: 3VA63 frame has a 250A max. trip in a 400A frame, but must mount in a 400A Panel minimum with a 400A Strap Kits. These 400A strap kits can be either Horiz. or Vert. mount — depending on the panel configuration but are limited to 250A trip. (so treated as a 400A breaker but with 250A trip)
Ex. #3: 3VA64 frame has a 400A max. trip in a 600A frame, but must mount in a 600A Panel minimum with a 600A Strap Kits. These 600A strap kits can be either Horiz. or Vert. mount — depending on the panel configuration but are limited to 400A trip. (so treated as a 600A breaker but with 400A trip)

① The "L" series of UL type codes may not be available for use in all Panelboard types - check COMPAS for verification.

3VA6 Communications modules and related accessories for field installation①

- COMPAS may not allow some of these kits for selection - Special Mod may be required.
- Some items may not be installed in panels and may be shipped separate from Panels even if Configured in COMPAS

① Some accessories may be "field install only" if not available in COMPAS, or not available for use in Panelboards

② Many accessories available for the 3VA5 and 3VA6 breakers may not be suitable for use in Lighting Panelboards.
- COMPAS allows only options that are available for factory assembly.
Some accessories listed above may not be available for all Panelboard configurations.

③ Lugs are NOT supplied with loose breaker as standard - must order seperately or configure in COMPAS to include lugs.
- Factory assembled panels include AL lugs as standard without control wire tap, CU lugs are optional. These kits include 3 connectors and hardware.

3VA41 1 Pole Breakers

① Although some breakers have a kAIC rating above 100 kAIC – many panels are limited to 100 kAIC or less.

② DC Voltage panels are limited by various factors. These DC ratings apply to the Breaker only.

① Although some breakers have a kAIC rating above 100 kAIC – many panels are limited to 100 kAIC or less.

② DC Voltage panels are limited by various factors. These DC ratings apply to the Breaker only.

3VA Breaker Configuration Information in Panelboards

Accessories for 3VA41/51 TMTU 125A max.

- 6 slots max. are available - 3 on each side of trip handle.\
- COMPAS will allow only modules that will be allowed in panel being configured.
- Note: 3VA41/51 2-pole and "1-pole in 2-pole frame" have only 3 Left side Accessory pockets available.

① High capacity/power (HP) max. Amps load capacity is higher than standed module (.55A up to 6.0A) depends on Voltage and AC/DC requirements - see SpeedFax section 7 or 3VA documentation for more information.

② Many accessories available for the 3VA4, 3VA5 and 3VA6 breakers may not be suitable for use in Lighting Panelboards.
– COMPAS allows options that are available. All accessories listed above can be used with Panelboards in general, but there will be exceptions.

③ Lugs are NOT supplied with loose breaker – must order separately or configured in COMPAS to include lugs. 3VA41 is an exception – AL connectors are included as standard – Factory assembled panels include AL lugs as standard, CU lugs are optional. These kits include 3 connectors and hardware

④ Special electronically-compatible (el) variants are available for applications that require the auxiliary switch signals to be linked to low voltage systems.
– May need special Mod in COMPAS.

3VA52 2 and 3 Pole Breakers

3VA52 TMTU 250A max.

- Part numbers shown are without Lugs.
- Standard Lug kits used in Panelboards are shown in tables below.

TMTU frame	Type	kA code	Type ref	MB code
3VA52	MFAS	M	FAS	VA
3VA52	HFAS	H	FAS	VB
3VA52	CFAS	C	FAS	VC

3 Pole 3VA52 without connectors

The default for Panelboard in COMPAS will be AL 1-conductor connectors:
for AL order one 3VA9233-0JB12 (accepts (1) #6 AWG-350kcmil AL/CU conductor)
for CU order one 3VA9233-0JD12 (accepts (1) #6 AWG-350kcmil CU only conductor)

① Although some breakers have a kAIC rating above 100 kAIC – many panels are limited to 100 kAIC or less.

② DC Voltage panels are limited by various factors. These DC ratings apply to the Breaker only.

③ P1 has Main Breaker kits available with these 3VA52 sizes — see page 11-14.

Accessories for 3VA52, 3VA61 and 3VA62 breakers

- 3VA52 TMTU 250A max. and 3VA61 ETU 150A max. and 3VA62 ETU 250A max.
- 6 - 8 slots max. are available – 4 on each side of trip handle.
- COMPAS will allow only modules that will be allowed in panel being configured.

① High capacity/power (HP) max. Amps load capacity is higher than standed module (.55A up to 6.0A) depends on Voltage and AC/DC requirements - see SpeedFax section 7 or 3VA documentation for more information.

② Many accessories available for the 3VA5 and 3VA6 breakers may not be suitable for use in Lighting Panelboards.
– COMPAS allows options that are available. All accessories listed above can be used with Panelboards in general, but there will be exceptions."

③ Lugs are NOT supplied with loose breaker as standard - must order separately or configure in COMPAS to include lugs.
– Factory assembled panels include AL lugs as standard, CU lugs are optional. These kits include 3 connectors and hardware.

④ Special electronically-compatible (el) variants are available for applications that require the auxiliary switch signals to be linked to low voltage systems.
– May need special Mod in COMPAS.

Accessories for 3VA52, 3VA61 and 3VA62 breakers

- 3VA52 TMTU 250A max. and 3VA61 ETU 150A max. and 3VA62 ETU 250A max.
- 6 - 8 slots max. are available – 4 on each side of trip handle.
- COMPAS will allow only modules that will be allowed in panel being configured.

3VA53 Breakers

3VA53 TMTU 400A max.

- Part numbers shown are without Lugs.
- Standard Lug kits used in Panelboards are shown in tables below.

TMTU frame	Type	kA code	Type ref	MB code
3VA53	MJAS	M	JAS	VE
3VA53	HJAS	H	JAS	VF
3VA53	CJAS	C	JAS	VG

3 Pole 3VA53 without connectors

The default for Panelboard in COMPAS will be AL 2-conductor connectors:
for AL order one 3VA9473-0JJ23 (accepts (2) 2/0-600kcmil AL/CU conductors)
for CU order one 3VA9473-0JE23 (accepts (2) 2/0-600kcmil CU only conductors)
Alternate single conductor lugs are available:
for AL order one 3VA9473-0JB13 (accepts (1) #1 AWG-600kcmil AL/CU conductors)
for CU order one 3VA9473-0JD13 (accepts (1) #1 AWG-600kcmil CU only conductors)

① High capacity/power (HP) max. Amps load capacity is higher than standed module (.55A up to 6.0A) depends on Voltage and AC/DC requirements - see SpeedFax section 7 or 3VA documentation for more information.

② Many accessories available for the 3VA5 and 3VA6 breakers may not be suitable for use in Lighting Panelboards.
– COMPAS allows options that are available. All accessories listed above can be used with Panelboards in general, but there will be exceptions.

③ Lugs are NOT supplied with loose breaker as standard - must order separately or configure in COMPAS to include lugs.
– Factory assembled panels include AL lugs as standard, CU lugs are optional. These kits include 3 connectors and hardware.

④ Special electronically-compatible (el) variants are available for applications that require the auxiliary switch signals to be linked to low voltage systems.
– May need special Mod in COMPAS.

Accessories for 3VA53/63, 3VA54/64 breakers (also with 3VA55/65/66 frame)

- 3VA53 TMTU 400A max. and 3VA63 ETU 400A max.3VA54 TMTU 600A max. and 3VA64 ETU 600A max.
- 10 slots max. are available - 5 on each side of trip handle.
- COMPAS will allow only modules that will be allowed in panel being configured.

① High capacity/power (HP) max. Amps load capacity is higher than standed module (.55A up to 6.0A) depends on Voltage and AC/DC requirements - see SpeedFax section 7 or 3VA documentation for more information.

② Many accessories available for the 3VA5 and 3VA6 breakers may not be suitable for use in Lighting Panelboards.
– COMPAS allows options that are available. All accessories listed above can be used with Panelboards in general, but there will be exceptions."

③ Lugs are NOT supplied with loose breaker as standard - must order separately or configure in COMPAS to include lugs.
– Factory assembled panels include AL lugs as standard, CU lugs are optional. These kits include 3 connectors and hardware.

④ Special electronically-compatible (el) variants are available for applications that require the auxiliary switch signals to be linked to low voltage systems.
– May need special Mod in COMPAS.

Features

The P4 panel has a medium sized footprint and fits a larger number of applications that require larger branch devices and higher amp ratings than what the lighting panel class offers. Even with the increased capacity, this panel is a space saver with its 32" width and 10" depth. The P4 panel offers a wide array of factory-assembled options and has the ability to mix breaker frames in unit space up to 800 amps and fusible switches up to 200 amps. Bussing options for the P4 vary from the standard temperature rated aluminum to temperature rated copper and 750A/SI aluminum and 1000A/SI copper designs. All aluminum bussing in the P4 panel is tin-plated as a standard. Silver-plated is offered as the default for copper bus and tin as an option. Integrated time clocks, bus mounted contactors as mains or submains, split bus and subfeed lugs (up to 600 amp) are just a few of the options of this flexible panel.

The 3 panel configurations defined by the unit space allowed for a given amperage, main device and box height. The P4 panel starts with a 60" high box. All of the branch devices are unit space mounted. Breakers and switches can be mixed and matched to meet customer requirements.

Main Lug / Main Breaker

Enclosure – Standard Type 1 enclosure is 32" wide x 10" deep. The Box Height is determined by main device and unit space. See charts for box height.
Voltage – 600V AC max.
250V DC max.

Amperage – 400-800 amp main breaker or 400-1200 amp main lug only.

Short Circuit Rating – 200 KAIC max. symmetrical or equal to the lowest rated device installed unless a series rating is indicated. Panels with subfeed or feed-thru lugs without a main device, circuit breaker or fusible unit, are limited to a three-cycle rating. The three-cycle rating for the P4 panel is limited to 42 KAIC. Note that the main device may be mounted remote from the panel.

Bussing – The P4 panel has more options to meet market requirements. The standard bussing is temperature rated aluminum. The rating is per the requirements of UL 67 – the standard for panelboards. All aluminum bussing is tin-plated. Optional bussing for the P4 panel is: 750 A/SI aluminum, temperature rated copper, and 1000 A/SI copper. The copper bus option for this panel is silver-plated.

Weight – Approximate

Total panelboard weight when filled with a normal quantity of breakers and accessories is about 8 lbs. (1 kg) per inch (54g per mm) of box height.

Main Lugs①

Ampere Rating	Connectors Suitable for Copper or Aluminum
400	(1) - #3/0 AWG-500 kcmil (2) - #3/0 AWG-250 kcmil
600	(2) - #3/0 AWG-500 kcmil
800	(3) - #3/0 AWG-500 kcmil
1000	(4) - #3/0 AWG-500 kcmil
1200	(4) - #3/0 AWG-500 kcmil

① Alternate lugs for 750 kcmil cable are available, but result in significant loss of branch unit mounting space. Consult Siemens.

Gauge Steel of Boxes Fronts, Surface and Flush

Type P4

Shown with Standard Mains, Top Fed and Surface Trim

Catalog number is for aluminum main bus. For optional copper main bus change "A" in position 11 to "E" (silver-plated copper bus).

Panels are top feed, surface mounted. For bottom feed, change "T" in position 12 to "B". For flush mounting, change "S" in position 13 to "F".

Replace fifth and sixth position in panelboard catalog number, with alternate main breaker code. Use price adders from main breaker section table. Horizontally mounted.

Main Lugs Only — shown with aluminum bus, top fed, and surface trims.

① For 600V application, change "F" in position 3 to "G". See alternate main breaker table on page 11-101 for 600V rated mains. Change position 5 and 6 and add price from table. Price only 600V rated branch breakers.

[1] BLG two-pole breaker is one phase and neutral. Three pole is two phases and neutral - See SpeedFax page 7-31

[2] 1-pole HED 15-30A rated 65kA; 35-100A rated 25kA: 3-pole HED rated 42kA

[3] Availability and additional specs tbd, expected late 2019. (COMPAS may allow selection of alternate trip units)

[4] 2-pole only or two outer poles of 3-pole breaker

[5] Accessories such as shunt trips on 3 pole breakers require 6.25" of unit space

[6] Approved for CSA and UL Listed.

[7] Approved for CSA but not UL Listed.

① BLG two-pole breaker is one phase and neutral. Three pole is two phases and neutral - See SpeedFax page 7-31
② 1-pole HED 15-30A rated 65kA; 35-100A rated 25kA: 3-pole HED rated 42kA
③ Availability and additional specs tbd, expected late 2019. (COMPAS may allow selection of alternate trip units)
④ 2-pole only or two outer poles of 3-pole breaker
⑤ Accessories such as shunt trips on 3 pole breakers require 6.25" of unit space
⑥ Approved for CSA and UL Listed.
⑦ Approved for CSA but not UL Listed.

Type S4/P4/SPP (10" deep) and F1/P4/FPP (10" deep)

Connecting Strap Kits — w/o Circuit Breaker – Branch Breakers Only

Cover Plates

For use with Sentron Shallow Depth or Type SPP/FPP/F1/P4 power panels	
Breaker Type	**Catalog Number**
QR	**SQRC**⑥

For inches / millimeters conversion, see Application Data section.

① Includes housing frame plate without breaker handle opening.
② For Class J, R or T fuse clip prices, refer to page 11-105. For Class J fuse clips price 600V, 7½" high units.
③ NEC fuse clips only.
④ Normal stock item.
⑤ Suitable to replace QF3 in P1 thru P5 Panelboards and Switchboards.
⑥ To replace a QJ with a QR only a new cover is needed up to 225A
⑦ Although QR is rated 250A, it is limited to 225A in panelboard.
⑧ Only required when installing a 3VA52, 3VA61, or 3VA62 breaker to an existing provision in the field. Parts are included with kit S3VA52T.
⑨ Strap Kit can also accommodate xGB breakers, reference Installation Instructions
⑩ Kit includes breaker nut keepers & bus extensions

P4 Panelboards

Devices Mounted on Gutter Cover Includes Device, Mounting – Wired or Unwired

Description
One piece front with door
Hinged Gutter Covers 4 pc front
Toggle Switch — SPST or 3-way
15A, 277V maximum
Pilot Light — General Purpose
Neon or Incandescent
Pushbutton

Spanner Wrenches (for Vacu-Break Switches)

Ground Fault on Main Breaker

Description
Conventional Ground Fault ① Includes: ground fault relay, ground sensor, CPT & shunt trip
Test and Monitor Panel ②
Ground Fault add to Sensitrip III breaker price

Time Clocks ③

Sangamo, Tork or Paragon time clock can be supplied, mounted in panelboard cabinet. For required increase in enclosure dimension, consult local sales office.

Description
Time clock (1- or 2-Pole, Single or Double Throw Contacts; 3-Pole Single Throw)
277V Maximum with Plain Dial
Optional: Astronomical Dial An Omitting Device Reserve Power or Carryover
Space and Mounting Provisions Only

Circuit Breaker Accessories Handle Blocking Device Blocks handle in either the "ON" or "OFF" position.

Padlocking Device – Padlocks in "OFF" position.

Main Bus

Standard main bus and ground bus are tin-plated aluminum. For copper main bus, neutral bus and ground bus, add from the table for each panel.

Lugs – For Main Lug Only Panels

Standard main lugs and neutral lugs are tin-plated aluminum, UL listed for use with aluminum/copper cables. Copper only lugs are an option.

Ampere Rating
400 - 1200

Shunt Trip on Main and Branches④

Description
BL, BQD, NGB, HGB, LGB, NGB2, HGB2, LGB2 (branch only)
QR2, QRH2, HQR2, HQR2H, ED4, ED6, HED4, HHED6, CED6
All others to 800A

100% Rated Main Circuit Breakers

Ampere Rating	Breaker Type
400A	JXD6H, HJXD6H
	SCJD6H, SHJD6H
	NJY, HJY, LJY
600A	LXD6H, HLXD6H
	NMY⑤, HMY⑤, LMY⑤

① Available in 90" high enclosure only. Unit space is 42 1/2" with Test and Monitor Panel; 45" without Test and Monitor Panel.

② Not available on Sensitrip III.
③ For required unit space, consult local sales office.
④ Shunt Trip on 100A frame breakers increases mounting height to 6.25" for twin mounting.

⑤ The 600A, 100% rated breaker requires the use of an 800A frame breaker.

SEM3 System configured in Panelboards

The Siemens SEM3 system can be configured for factory installation in branch circuit monitoring applications using the Siemens COMPAS configuration tool. This option can lower the installation time of the system for the installer while providing a factory warrantied solution.

The SEM3 system can be factory installed in unit space in type P2, P4, & P5 Siemens panel boards. Please note P1 and P3 configurations are not available at this time and the amount of unit space needed varies depending upon the application. Please note that lead time adders will apply and may vary depending upon the configuration of the system.

SEM3 for use in Siemens Panelboards

Available in a NEMA 1, 3R, or 12 rated enclosure

Controller

SEM3 controller is mounted in unit space opposite of the feed location specified in COMPAS (i.e., bottom mount for top feed) and will require 3″ of unit space. Each controller will be powered by direct tap connection to the panel section bus. Each controller can monitor up to 45 circuits. Applications that require monitoring more than 45 circuits will require additional controllers.

Current Transformers (CTs)

Seven sizes of CTs are available for use in the P4 panel: 50, 125, 250, 400, 600, 800, 1200 amp. All CTs are pre-mounted to a support bracket that attaches to the base rail of the interior of the panel board. Each bracket supports a maximum of 3 CTs and is designed for the breaker selected (brackets are not interchangeable between breaker frames). Each CT will be attached to a data module that is placed in the meter racks.

Meter Racks

Each meter rack requires 3″ of unit space. All meter racks will be installed next to the SEM3 controller in unit space. The COMPAS configuration tool will select the appropriate meter rack configuration according to the user's application and will use the 21 space meter rack as a default option where possible. Only one meter rack (regardless of number of positions) can be installed in 3″ of unit space.

NOTE: Monitoring of 45 circuits will require 9" of unit space: two 21 position racks and one 3 position rack

Other Considerations

Configuration: Data modules from CTs monitoring a circuit breaker must be mounted adjacent to one another in the meter rack. Any field changes to the factory configuration must take this into account.

Start-up & Commissioning: Siemens can provide these services. Contact your local SIEMENS PDS Power Solutions Business Developer for more details.

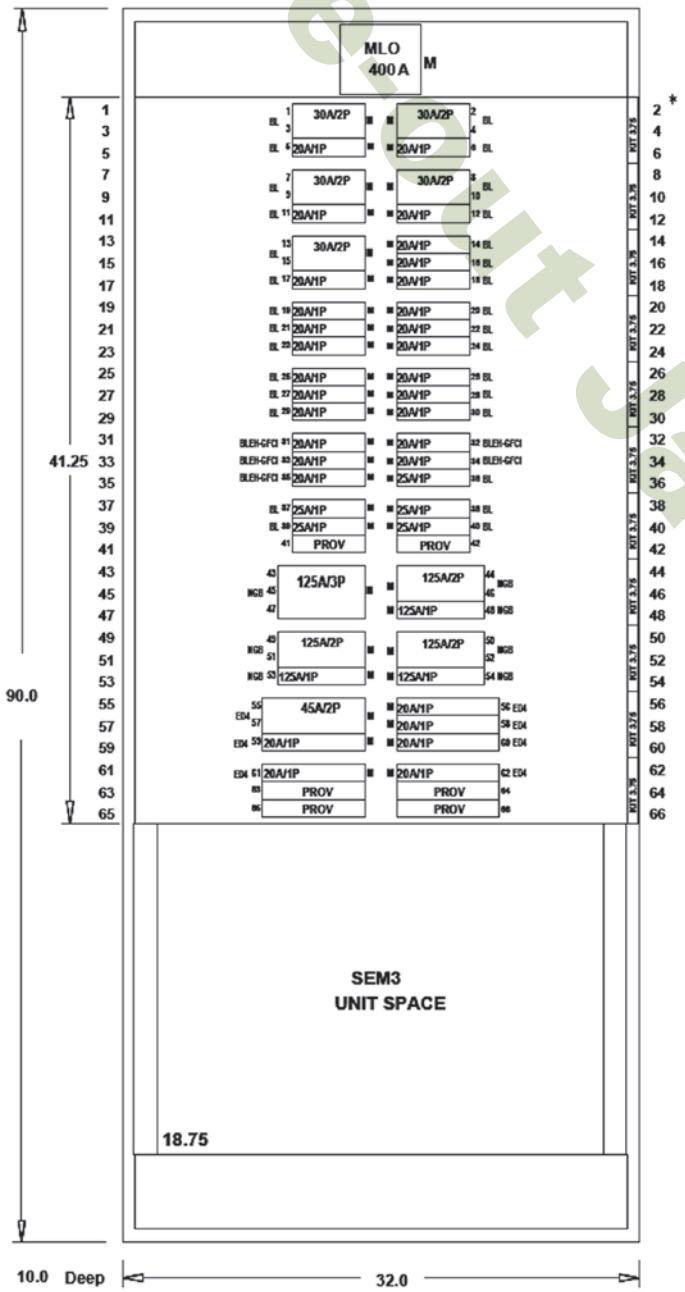
Billing Services for sub billing applications: Billing services are available. Contact your local SIEMENS PDS Power Solutions Business Developer for more details.

P4 Devices
Enclosure sizes

Example P4 Panel with SEM3 Type 1 Enclosure
P4 = (32" Wide x 10" Deep)

Enclosure heights are in 15" increments from 60" thru 90".
Enclosure heights: 60", 75", 90" (there are optional depths also)

The COMPAS configuration tool can provide actual dimensions based on the configuration. Example below is largest standard P4 enclosure for factory assembled panel - unit space is in 3.75" increments - up to 6 circuits can occupy each 3.75" of unit space.



32" std. width for P4

Main Breaker / Main Lug space varies based on selected options

Unit space varies based on selected options

Note: All circuits do not have to be monitored by SEM3 - user can select any circuits in this space to be monitored.

Based on smallest branch breakers and a 3-phase main being monitored. There is a maximum of 63 circuits that can be monitored with the configuration shown. Some selections of main breakers and other subfeed options could limit this further.

In this situation there is 37.5" of unit space available - so 60 branch circuits could be monitored.
If monitoring the main three additional circuits could be monitored with a total of 63 circuits.

This requires two controllers and three 21 position racks using 18.75" of unit space.
- see below -

SEM3 space varies by number of circuits monitored - this uses unit space.

== > 7.5" of space for up to 21 circuits monitored
one controller and one 21-pos rack

== > 11.25" of space for up to 42 circuits monitored
one controller and two 21-pos racks

== > 15" of space for up to 45 circuits monitored
one controller and two 21-pos racks plus one 3-pos rack

== > 18.75" of space for up to 63 circuits monitored
two controllers and three 21-pos racks

Note: If subfeed space is needed - it will take away from available unit space.

Due to gutter space limitations, SEM3 is not available in a P4 Powerpanel for 3VA52, 3VA61, or 3VA62 breakers.

Lug Modifications

Compression Lugs

Style	Amp Rating	Breaker Type	Compression Connectors	Available Unit Space Reduction

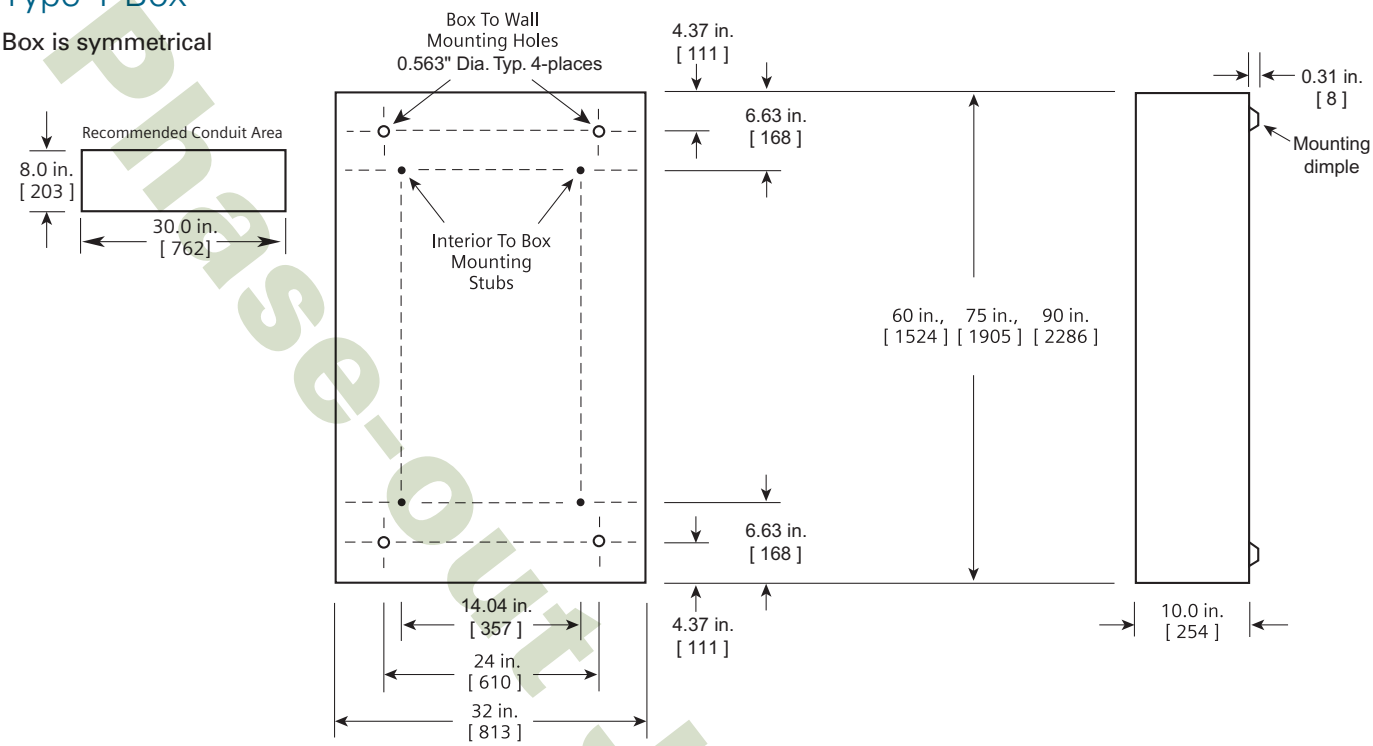
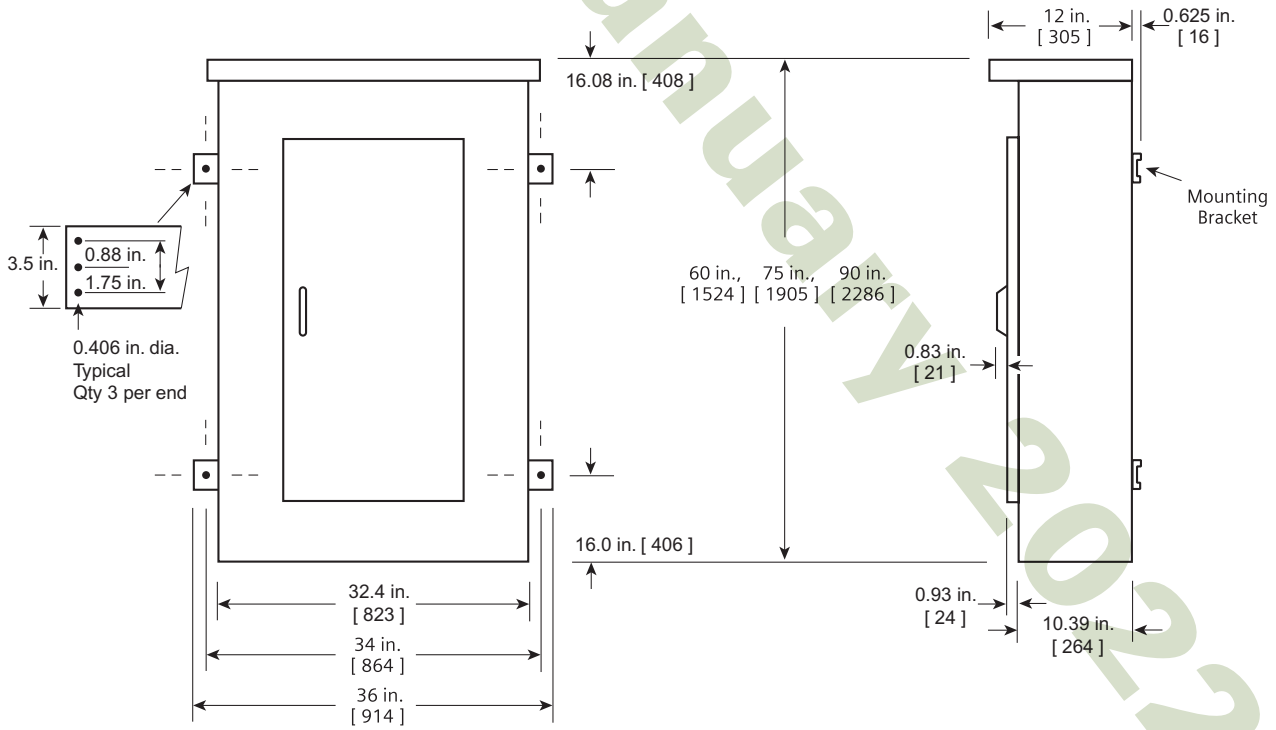
Flush kit for P4 90″ High	F90

Type 1 Box

Box is symmetrical



Type 3R and 3R/12 Box



Dimensions shown in inches and millimeters [ ].

Features

The P5 is the largest distribution panel in the Siemens' panel family. Even with a larger footprint, the P5 is still a space saver with its 38" width and 12.75" depth. The panel offers higher main ratings to fit applications that require larger branch devices.

The "Skinny P5" is the latest variation introduced in 2021 which is available in the 32" width (same as the old P4) and has the same depth as the 38" width P5 allowing for many shared components including strap kits.

- This panel offers a wide array of factory assembled options and has the ability to mix breaker frames in unit space up to 1200 amps and fusible switches up to 1200 amps. The Skinny P5 is limited to 1000A max. Main and Branch Breakers.
- Bussing options for the P5 vary from the standard temperature rated aluminum or copper bus and 750 A/SI aluminum and 1000A/SI copper designs.
- All aluminum bussing in the P5 panel is tin-plated as a standard. Copper bus is silver-plated as a standard with Tin-plated as an option.
- The P5 panel configurations are defined by the unit space allowed for a given amperage, main device and box height.
- The P5 panel starts with a 60" high box. All of the branch devices are unit space mounted. Breakers and switches can be mixed and matched to meet customer requirements.
- Key Interlocks, Integrated time clocks, bus mounted contactors as mains or submains, split bus and subfeed lugs (up to 600 amps) are just a few of the options of this flexible panel..

Main Lug / Main Breaker / Main Switch

Enclosures for P5

- Standard Type 1 enclosures:
  a) 38" wide x 12.75" deep. x Box Height
  b) 32" wide x 12.75" deep. x Box Height
- Replaces P4 32"wide x 10.00"deep x Box Height
- Box Height is determined by main device and unit space. See charts for box heights available: 60", 75" and 90".

Voltage – 600V AC max./250V DC max.

Amperage

- Main 400-1200 amp main breaker (1000A max. for 32"W)
- 400-1200 amp main lug only
- 200-1200 amp main switch (n/a for 32" W)

Short Circuit Rating – 200 KAIC max. symmetrical or equal to the lowest rated device installed unless a series rating is indicated. Panels with subfeed or feed-thru lugs without a main device, circuit breaker or fusible unit, are limited to a three-cycle rating. The three-cycle rating for the P5 panel is limited to 42 KAIC. Note that the main device may be mounted remote from the panel.

Bussing – The P5 panel has more options to meet market requirements. The standard bussing is temperature rated aluminum. The rating is per the requirements of UL 67 – the standard for panelboards. All aluminum bussing is tin-plated. Optional bussing for the P5 panel is: 750 A/SI aluminum, temperature rated copper, and 1000 A/SI copper. The copper bus standard is silver plated with an option for tin-plated.

Weight – Approximate Total panelboard weight when filled with a normal quantity of breakers and accessories is about 10 lbs. (4.53 kg) per inch (178g per mm) of box height for 38" wide. For 32" wide Enclosures use 8 lbs. (3.63 kg) per inch (143g per mm) of box height.

Main Lugs ①

Ampere Rating	Connectors Suitable for Copper or Aluminum	Enclosure Width
400	(1) 250-500Kcmil	32" or 38"
	(2) #3/0 AWG-250 Kcmil	32" or 38"
600	(2) #3/0-500Kcmil	32" or 38"
800	(3) #3/0 AWG-500 Kcmil	32" or 38"
1000	(4) #3/0 AWG-500 Kcmil	32" or 38"
1200	(4) #3/0 AWG-500 Kcmil	32" or 38"

① Alternate lugs for 750 kcmil cable are available, but result in significant loss of branch unit mounting space. Consult Siemens.

Main Lugs Only Wire Bending Space

☐ Product not yet released.

① Standard trim is four piece without door. Surface or flush one piece trim is available for 32 in. or 38 in. wide circuit breaker panel.

② Additional unit space may be available with certain 3VA Main Breakers. Reference COMPAS configurator.

③ All 3VA53, 3VA54, 3VA63 & 3VA64 breaker wire bending space is considered using double barrel lugs.

④ Available with solid state (electronic) trip units only.

⑤ Max cable size allowed is (3) 400kcmil per phase & neutral.

⑥ Max cable size allowed is (2) 600kcmil per phase & neutral, requires the use of copper cable.

Type P5

Shown with Standard Mains, Top Fed and Surface Trim

Catalog number is for aluminum main bus. For optional copper main bus change "A" in position 11 to "C" (silver-plated copper bus).

Panels are top feed, surface mounted. For bottom feed, change "T" in position 12 to "B". For flush mounting, change "S" in position 13 to "F".

Replace fifth and sixth position in panelboard catalog number, with alternate main breaker code. Horizontally mounted.

Main Lugs Only — shown with aluminum bus, top fed, and surface trims.

For in. / mm conversion, see Application Data section.

Product not yet released.

① For 600V, change "F" in position 3 to "G". Price only branch breakers with 600V ratings.

② 800 and 1200 ampere switches have "L" class fuse provisions (Type HCP).

③ For ground fault, see page 11-120.

④ Replace "MS" in catalog number with code letter. (See Main Fusible Switch Table above)

① BLG two-pole breaker is one phase and neutral. Three pole is two phases and neutral - See SpeedFax page 7-31
② 1-pole HED 15-30A rated 65kA; 35-100A rated 25kA: 3-pole HED rated 42kA
③ 2-pole only or two outer poles of 3-pole breaker
④ Accessories such as shunt trips on 3 pole breakers require 6.25" of unit space
⑤ Approved for CSA and UL Listed.
⑥ Approved for CSA but not UL Listed.
⑦ Minimum enclosure width is 32 in.

NEB, HEB	**EBF1**

Note: When a front filler plate is not completely filled with breakers, the openings in the unused space must be closed with filler plates selected from this table.

Cover Plates

For use with P5, Sentron SPP and Type S5 power panels	
Breaker Type	**Catalog Number**
QR	**SQRC**⑥

For inches / millimeters conversion, see Application Data section.

☐ Product not yet released.

① Normal stock item.

② Includes cover plate and mounting hardware, less circuit breaker.

③ Also fits Types FCI, FCII, SB1 and SB2 switchboards.

④ 800–1200 amp units are HCP switch.

⑤ Suitable to replace QF3 and DFFP1 in P1 thru P5 Panelboards and Switchboards

⑥ To replace a QJ with a QR only a new cover is needed up to 225A

⑦ Although QR is rated 250A, it is limited to 225A in panelboard.

⑧ Required to land 3VA breaker to base strap for Factory Installed Provisions prior to June 2021.

⑨ Strap Kit can also accommodate xGB breakers, reference Installation Instructions

⑩ High Density Kit, requires 7.5" Unit Space to fit QTY (6) 2 Pole breakers

⑪ Kit includes breaker nut keepers & bus extensions

⑫ VL 600A & below breaker phase out planned for 10/1/2022, strap kit availability may be limited.

Type P5 Panelboards

Devices Mounted on Gutter Cover Includes Device, Mounting – Wired or Unwired

Description
One piece front with door
(Depth increases to 14.25″)
Hinged Gutter Covers 4 pc front
Toggle Switch — SPST or 3-way
15A, 277V maximum
Pilot Light — General Purpose
Neon or Incandescent
Pushbutton

Feed-Thru Lugs

Ampere Rating	Unit Space (inches)
400	10
600	10
800	17.5
1200	17.5

Grounding of Panelboards

Ground Bars except for brazed to box are shipped with the panel interior factory mounted.

- Non-Insulated Equipment Ground Bar – Standard
- Copper Non-Insulated Ground Bar
- Al Insulated Equipment Ground Bar
- Cu Insulated Equipment Ground Bar
- Ground Bar Brazed to Box (Copper only)

Fuse Clip Provisions (Add to 250 Volts or 600 Volts Unit Prices Per Switch)

Amp Rating	Class J	Class R	Class T

Ground Fault on Main Breaker

Description	Amp Rating
Conventional Ground Fault② Includes:	
Ground Fault Relay, Ground Sensor, CPT and Shunt Trip	800-1200
Test and Monitor Panel ③	
Ground Fault add to Sensitrip III breaker price (takes 5″ of unit space)	800-1200

Time Clocks④

Sangamo, Tork or Paragon time clock can be supplied, mounted in panelboard cabinet. For required increase in enclosure dimension, consult local sales office.

Description
Time clock (1- or 2-Pole, Single or Double Throw Contacts; 3-Pole Single Throw)
277V Maximum with Plain Dial
Optional: Astronomical Dial An Omitting Device Reserve Power or Carryover
Space and Mounting Provisions Only

Circuit Breaker Accessories Handle Blocking Device Blocks handle in either the "ON" or "OFF" position.

Padlocking Device – Padlocks in "OFF" position.

Main Bus

Standard main bus and ground bus are tin-plated aluminum. For copper main bus, neutral bus and ground bus, add from the table for each panel.

Lugs – For Main Lug Only Panels

Standard main lugs and neutral lugs are tin-plated aluminum, UL listed for use with aluminum/copper cables. Copper only lugs are an option.

Ampere Rating
400 - 1200

Shunt Trip on Main and Branches⑤

Description
3VA41, BL, BQD, NGB, HGB, LGB, NGB2, HGB2, LGB2 (branch only)
QR2, QRH2, HQR2, HQR2H ED4, HED4, HHED6, CED6 (branch only)
All others to 1200A

100% Rated Main Circuit Breakers

Ampere Rating	Breaker Type
400	JXD6H, HJXD6H
	NJY, HJY, LJY
400⑥	3VA54, 3VA64
600	LXD6H, HLXD6H
600⑦	3VA55, 3VA65
	NMY, HMY, LMY
800	NNY, HNY, LNY
	MXD6H, HMXD6U, SMD6, SHMD6, SND6, SHND6, NXD6H, HNXD6H
1200	NNY, HNY, LNY
	NXD6H, HNXDH

① For use on main lug, main breaker or main switch panels without subfeed breakers.
② Available in 90″ high enclosure only. Unit space is 42½" with Test and Monitor Panel; 45" without Test Monitor Panel.
③ Not available on Sensitrip III.
④ For required unit space, consult local sales office.
⑤ Shunt Trip on non-3VA 100A frame breakers increases mounting height to 6.25″ for twin mounting.
⑥ The 400A, 100% rated breaker application requires the use of a 600A frame breaker.
⑦ The 600A, 100% rated breaker application requires the use of a 1200A frame breaker.
⑦ The 800A, 100% rated breaker application requires the use of a 1200A frame breaker.

SEM3 System configured in Panelboards

The Siemens SEM3 system can be configured for factory installation in branch circuit monitoring applications using the Siemens COMPAS configuration tool. This option can lower the installation time of the system for the installer while providing a factory warrantied solution.

The SEM3 system can be factory installed in unit space in type P2 & P5 Siemens panel boards. Please note P1 and P3 configurations are not available at this time and the amount of unit space needed varies depending upon the application. Please note that lead time adders will apply and may vary depending upon the configuration of the system.

SEM3 for use in Siemens Panelboards

Available in a NEMA 1, 3R, or 12 rated enclosure

Controller

SEM3 controller is mounted in unit space opposite of the feed location specified in COMPAS (i.e., bottom mount for top feed) and will require 3″ of unit space. Each controller will be powered by direct tap connection to the panel section bus. Each controller can monitor up to 45 circuits. Applications that require monitoring more than 45 circuits will require additional controllers.

Current Transformers (CTs)

Seven sizes of CTs are available for use in the P5 panel: 50, 125, 250, 400, 600, 800, 1200 amp. All CTs are pre-mounted to a support bracket that attaches to the base rail of the interior of the panel board. Each bracket supports a maximum of 3 CTs and is designed for the breaker selected (brackets are not interchangeable between breaker frames). Each CT will be attached to a data module that is placed in the meter racks.

Meter Racks

Each meter rack requires 3″ of unit space. All meter racks will be installed next to the SEM3 controller in unit space. The COMPAS configuration tool will select the appropriate meter rack configuration according to the user's application and will use the 21 space meter rack as a default option where possible. Only one meter rack (regardless of number of positions) can be installed in 3″ of unit space.

NOTE: Monitoring of 45 circuits will require 9" of unit space: two 21 position racks and one 3 position rack

Other Considerations

Configuration: Data modules from CTs monitoring a circuit breaker must be mounted adjacent to one another in the meter rack. Any field changes to the factory configuration must take this into account.

Start-up & Commissioning: Siemens can provide these services. Contact your local SIEMENS PDS Power Solutions Business Developer for more details.

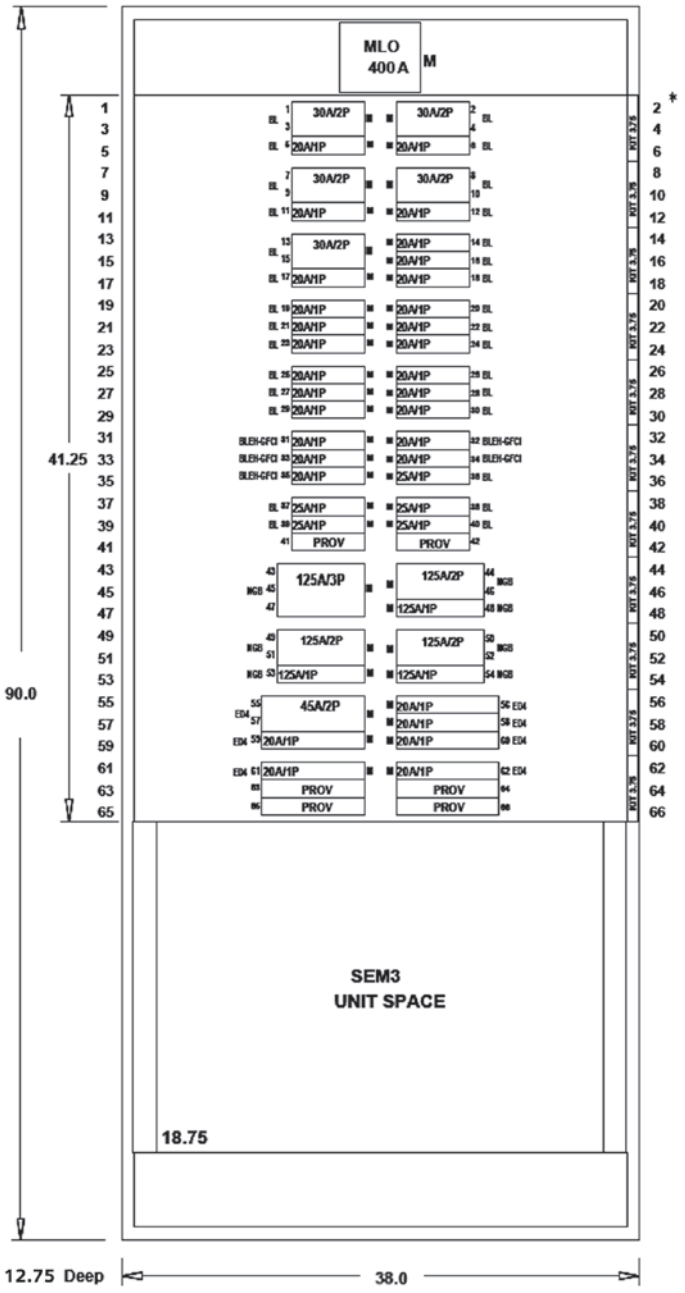
Billing Services for sub billing applications: Billing services are available. Contact your local SIEMENS PDS Power Solutions Business Developer for more details.

P5 Devices
Enclosure sizes

Example P5 Panel with SEM3 Type 1 Enclosure
P5 = 32", 38", or 46" Wide x 12.75" Deep)

Enclosure heights are in 15" increments from 60" thru 90".
Enclosure heights: 60", 75", 90" (there are optional depths also)

The COMPAS configuration tool can provide actual dimensions based on the configuration. Example below is largest standard P5 enclosure for factory assembled panel - unit space is in 3.75" increments - up to 6 circuits can occupy each 3.75" of unit space.



38" std. width for P5

Main Breaker / Main Lug space varies based on selected options

Unit space varies based on selected options

Note: All circuits do not have to be monitored by SEM3 - user can select any circuits in this space to be monitored.

Based on smallest branch breakers and a 3-phase main being monitored. There is a maximum of 63 circuits that can be monitored with the configuration shown. Some selections of main breakers and other subfeed options could limit this further.

In this situation there is 37.5" of unit space available - so 60 branch circuits could be monitored.
If monitoring the main three additional circuits could be monitored with a total of 63 circuits.

This requires two controllers and three 21 position racks using 18.75" of unit space.
- see below -

SEM3 space varies by number of circuits monitored - this uses unit space.

== > 7.5" of space for up to 21 circuits monitored
one controller and one 21-pos rack

== > 11.25" of space for up to 42 circuits monitored
one controller and two 21-pos racks

== > 15" of space for up to 45 circuits monitored
one controller and two 21-pos racks plus one 3-pos rack

== > 18.75" of space for up to 63 circuits monitored
two controllers and three 21-pos racks

Note: If subfeed space is needed - it will take away from available unit space.

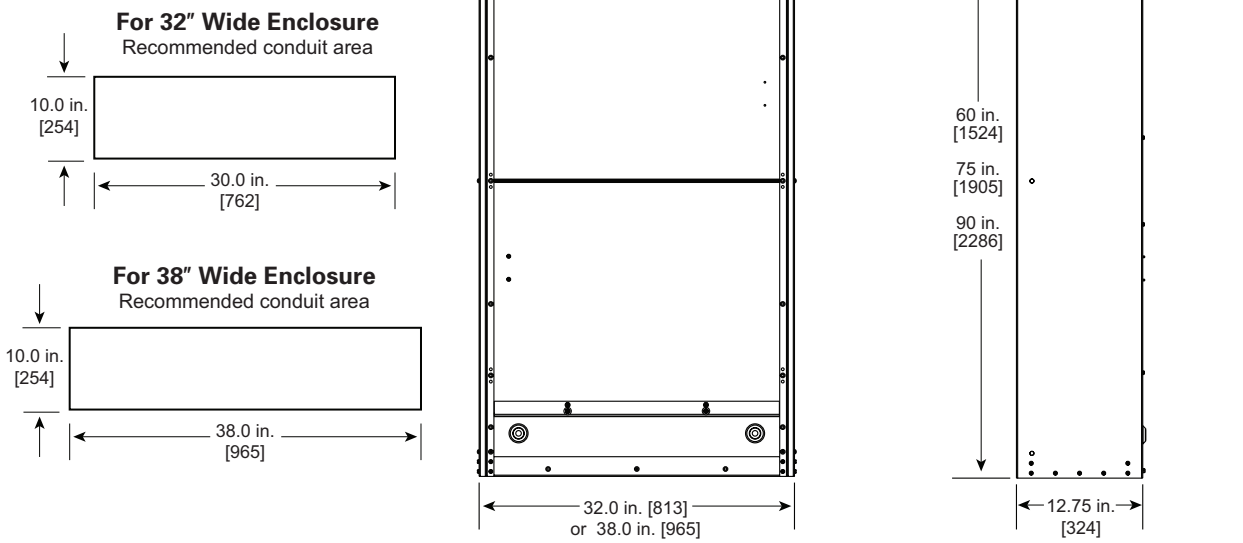
① Required with 1 PC Door & 1 PC Door-in-Door trims over breaker handles.

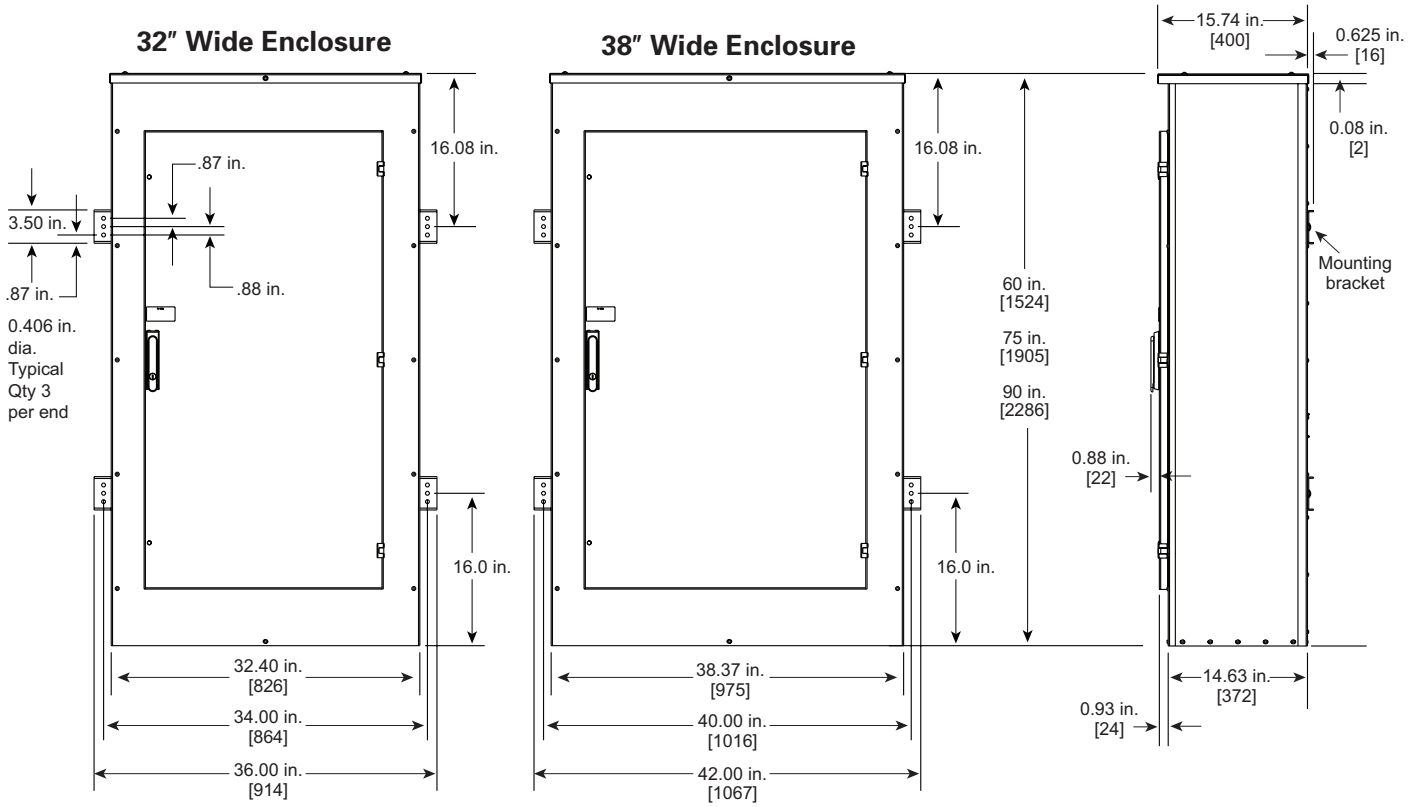
② Unvented trims require amps per square inch bussing.
③ Requires 14.5" deep box.

Type 1 Box

Box is symmetrical



Type 3R and 3R/12 Box



Dimensions are shown in inches [millimeters] and are all approximate for reference only

Type C1

240 Volts AC Maximum
250 Ampere Mains
250 Ampere Maximum Branch
UL Short Circuit Rating — 200,000 IR Maximum

Branch Breaker Symmetrical Interrupting Rating

Based on Underwriters' Test Procedure

Type C2

480Y/277 Volts AC Maximum
250 Ampere Mains
250 Ampere Maximum Branch
UL Short Circuit Rating — 100,000 IR Maximum

Meets NEC wire bending requirement, section 312–6.

Panelboards

Listed by Underwriter's Laboratories, Inc., under "Panelboards" File #E2269.

Meets Federal Specification W–C375B/Gen.

Service

240 Volts Maximum. 1-Phase, 3-Wire, or 3-Phase, 4-Wire.

Panelboards Fronts and Doors

Standard panelboards are furnished with trim with a flush door lock. All are factory assembled for ease of installation. Fronts are fabricated from code gauge steel and finished ANSI-61.

Main Breakers C1

BL, BLH and HBL frame breakers are mounted horizontally. All other frames are mounted vertically.

Main Breakers C2

BQD frame breakers are mounted horizontally. All other frames are mounted vertically.

Boxes

C1 — 7⅝" wide, 5¾" deep.
C2 — 8½" wide, 5¾" deep.

Branch Breaker Side Gutters

Type	Circuit Breaker	Side Gutter (inches)
C1	BL, BLH, HBL	3.505
C2	BQD	3.5

Weight–Approximate

Total panelboard weight when filled with a normal quantity of breakers and accessories is:
*About 3 lbs. per inch of box height.

Gauge Steel Boxes

Type	Width	Height	Gauge Steel
C1	7⅝"	48", 73", 85"	#14
C2	8½"	48", 73", 85"	#14

Fronts

C1	7⅝"	48", 73", 85"*	#14
C2	8½"	48", 73", 85"*	#14

***Note:** Feed thru lugs and subfeed breaker not available for this height.

Main Breaker Connectors

Ampere Rating	Connectors suitable for Cu or Al
100	(1) #14–1/0 AWG
125	(1) #4–1/0 AWG
225	(1) #6 AWG–300 kcmil
250	(1) #4 AWG–350 kcmil Al (1) #6 AWG–350 kcmil Cu

Main Lugs

125	(1) #6 AWG–350 kcmil
250	(1) #6 AWG–350 kcmil

For inches / millimeters conversion, see Application Data section.

① Connector ranges indicated do not apply to all main breaker types. Refer to molded case circuit breaker standard pressure wire connectors in the breaker section of this catalog for the wire ranges for a specific breaker frame.

Main Lugs Only C1 — 240 Volts Maximum

Breaker Kits and Accessories

Kit Number	Description	Contents
MBKQRC1FK	C1 Filler for QR in Main position 1PH or 3PH	Kit contains all cover plates necessary to change from QJ to QR both 2 and 3-pole breakers.

For inches / millimeters conversion, see Application Data section.

① Must be ordered as a manual line.
② Includes 50" extension.

Telephone and Equipment Cabinets: Conform to requirements of Underwriters' Laboratories, Inc., for all cabinets and boxes bearing their label. Surface and Flush enclosures: box and front constructed of code-gauge steel, box galvanized and front only finished with light gray, ANSI-61. Cabinets provided without backboards.

Boxes: Standard construction has blank end walls, without knockouts.

Fronts: Siemens Fas Latch fronts feature concealed hinges and fastening screws. Match P1 and P2 Panels in appearance. Two locks supplied on doors more than 51 inches high.

① Replace (1) with "S" for surface applications and "F" for flush applications.

② Includes Fas latch trim and steel mounting pan. If 2 or more cabinets are to be stackedn order (no extra charge for connecting hardware).

③ Available in P4 or P5 only.

Standard Enclosures Made From Special Materials — Type P1, P2, P3

Stainless Steel Options

14GA 304 SS Grade (Brush Front)	Front Front

* Stainless available only for Screw-to-Box, Hinge-to-Box, and Door-in-Door. All have piano hinges only.
**No special sizes. 20" and 24" wide only.

Stainless Steel Additions to Enclosure Size (Type 1 Only)

	Lighting Panel	Distribution Panels
Width	Order in 2" increments (30" max)	Order in 2" increments
Depth	Order in 2" increments (10" max)	Order in 2" increments

Consult factory for dimension limitations.

Miscellaneous

Description.
Conduit Hubs — Up to 1 1/2 in. Each 2 in. to 2 1/2 in. Each 3 in. Each

Painted Finish

Set-up Charge Net . Box Only Alternate Color Trim

Front And Door Modifications

Two Panels with Common Trim (14 GA only)②

Devices Mounted On Interior-Includes Device, Mounting (Wired or Unwired)①

Toggle Switch-SPST or 3-way; 15A, 277 V Maximum
Pilot Light-General Purpose, Neon or Incandescent
Pushbutton

Gauge Steel of Boxes/Fronts, Surface and Flush (see pgs. 11-6 & 11-7)

Dimensions in Inches (mm)		Gauge Steel		
H	**W**	**Box**	**Front/Door**	**Type**
26-74 (660-1880)	20 (508)	16①	14⑥	Type 1
26-74 (660-1880)	20 (508)	16②	16/14②	Type 3R/12
32-60 (813-1524)	20-36 (508-914)	14③	14③	Type 4
26-74 (660-1879)	20 (508)	14④	14④	Type 4X
36-60 (914-1524)	30-36 (762-914)	N/A⑤	N/A⑤	Type 4X Non-Metallic

① 16 Gauge is Standard (14 Gauge & 12 Gauge are optional)
② 15 Gauge Steel Can with 14 Gauge Door or Similar Approved Construction
③ No Optional Gauge available
④ 304SS 14 Gauge Std., 316SS 14 Gauge optional
⑤ Sizes do not match Standard Enclosure Sizes - See Table P1-21 - material is non-metallic - No Gauge Specified.
⑥ FAS-Latch is 14 GA only.
Screw-to-Box, Hinge-to-Box, Door-in-Door (14 GA Std./12 GA Std. or 10 GA Optional)
STB/HTB/DND with Piano Hinge (14 GA Std./12 GA Optional)

Note: For retro fit interiors and fronts into existing can, retro fit must match or exceed minimum height, width, and depth requirements of standard Type 1 enclosures.

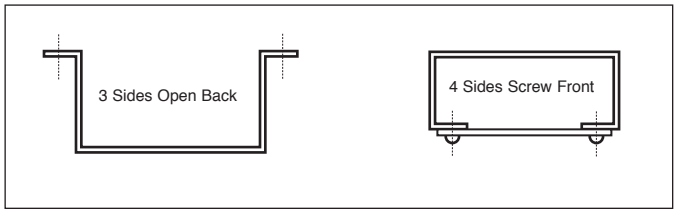
①Panels having doors over 48 in. high, 2 locks are standard.
② Lighting panels only. Field must supply dimensional information and panel orientation.

Conduit Enclosing Shield (Panel Skirts)

Sheet metal to cover conduits above or below a standard panelboard box.

Skirt Length	Width	Depth
8, 9, 11, 12, 14, 17, 18, 23, 25	20.00	5.75
26, 27, 28, 29, 30, 31, 32, 33, 34, 35, 36		
37, 38, 39, 40, 41, 42, 43, 44		
8, 9, 11, 12, 14, 17, 18, 23, 25	24.00	7.75
26, 27, 28, 29, 30, 31, 32, 33, 34, 35, 36		
37, 38, 39, 40, 41, 42, 43, 44		

Panel Skirts Standard Configurations



Notes:
A) 4-sided skirts have standard Part Numbers (not catalog numbers).
B) 3-sided skirts are ordered as Custom in COMPAS.
C) Order in COMPAS with interior when possible.
D) If ordered separate from interior, use a manual line in COMPAS.
E) Must note if Top Entry or Bottom Entry required.

Molded Case Switches①

(Non-Automatic Circuit Interrupters)

When Molded case switches are substituted for thermal breakers deduct from the installed thermal breaker price:

Ampere Rating	Breaker Frame	Availability	
		3-Pole	2-Pole
100	ED2 ED4 ED6	√ √ √	√ √ √
225	QR2	√	√
250	FXD6	√	√
400	JXD2 JXD6	√ √	√ √
600	LXD6	√	√
800	MD6	√	√
1200	ND6	√	—

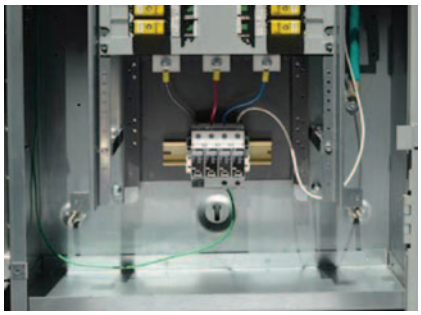
① Available only as a main switch for non-service equipment applications. Not available for branch devices.

QuickShip™

All SQSCP configurations of the standard NEMA 1 enclosure can be specified for shipment within 10 business days of order when specified.

Mains	MLO (Main Lug Only)
	Fused disconnect switch
	Non-fused disconnect switch
Assembly SCCRs	200kA, 100kA or 50kA AC, 100kA or 20kA@125Vdc①
Voltage ratings	Applicable on any 600Vac or less, or 125Vdc② or less systems
Bus amperages	400A, 225A, 200A, 100A, 60A or 30A
Branch circuits	Circuits: 18, 30 or 42*
	Amps: Up to 100A
	Type: 1-, 2- and 3-Pole
Panels	Feed: top & bottom
	Mounting: surface or flush
	Door/Trim: regular or door-in-door
	NEMA Ratings: 1 & 3R. Other ratings available, consult factory.
Through-lugs & loadside disconnect	Feed-Through: single and double
	Sub-Feed
	Feed/Sub-Through
	Fused loadside disconnect, (up to 1/2 of main amp rating)
Neutrals	200A, 400A and 800A unbonded and bonded
Grounds	Non-isolated or isolated
Enclosure sizes	Standard size panelboard (20" W x 5¾" D x 33"- 69" H)*
Spare fuses	Spare fuse compartment holds up to six fuses
Options	Surge protection device (SPD) for high and low energy transients.*

① Depending on configuration.
② 125Vdc rating applicable to only 80 amp or less CCPBs on MLO panels only.



*Factory installed SPD options

System & Voltage	Catalog Number	Discharge Current		Response Time	SCCR	Data Sheet Number
		Nominal (I_n)	Maximum (I_{max})

Delta, 480	**BSPM3480DLG**					2151

Catalog Symbol: SQSCP4

Description

Panelboards for commercial/industrial branch or service entrance applications on systems up through 600Vac.

The SQSCP is specifically designed to address the NEC® Selective Coordination Requirements for Emergency, Legally Required Standby, Healthcare Essential Electrical and Critical Operation Power Systems (COPS) per NEC® 700.28, 701.27, 645.27 and 708.54. Not for applications requiring AFCI protected circuits. The SQSCP is configured to order for the application. To confirm availability of options and constructions, contact your Siemens distributor.

Ratings

Volts: 600Vac (or less), 125 Vdc
Amps: 30, 60, 100, 200, 225, 400A
SCCR: 20kA or 100kA @ 125Vdc–See panelboard short circuit ratings table for AC ratings.

Agency information

- UL 67–Standard for panelboards
- UL 50/UL 50E–Enclosures for electrical equipment
- CSA 22.2, No. 29-M1989–Panelboards and encl. panelboards
- UL listed, class CTL panelboard (meets editions of the NEC prior to 2008 with regard to the NEC® 408.15 limit of 42 overcurrent devices per panel)
- UBC and CBC Seismic Qualified and IBC Approved

Main options

- Main lug only (MLO)
- Fused main disconnect
- Non-fused main disconnect

Branch disconnect options

- 1-, 2-, and 3-pole 15, 20, 30, 40, 50, 60, 70, 90, and 100A rejecting branch disconnects (see table for details).

  Branch ampacity on 125Vdc panels limited to SCCPB 80A or less.

Branch circuit positions

- 18, 30 and 42

Neutral options

- Unbonded and bonded 200A, 400A and 800A

Ground options

- Isolated and non-isolated

Enclosures

- NEMA 1 and NEMA 3R. Other ratings available. Consult factory.

Spare fuse compartment

- Six space spare fuse compartment standard on all models

① CCPB disconnect can accept CUBEFuses® with amp ratings less than or equal to the amp rating of the SCCPB disconnect.
② 1A indicating CUBEFuse® not available. Correct fit with SCCPB disconnect requires indicating CUBEFuse® with date code R38 or later.

Fuse and disconnect performance data

For details and specifications,
access the following data sheets online at
www.usa.siemens.com/panelboards

CUBEFuse® Specifications Catalog Symbols

STCF_ (6-100A Indicating version)
STCF_RN (1-100A Non-indicating version)

Description

The CUBEfuse® is a finger-safe, dual-element, time delay UL Class CF power fuse with Class J fuse electrical performance charcteristics. 10 Seconds minimum operating time at 500% rated current.

Ratings

Volts: 600Vac/300Vdc
Amps: 1-100 (non-indicating version)
6-100 (indicating version)
IR: 300kA RMS Sym. (UL)
200kA RMS. Sym (CSA)
100kA DC (UL & CSA)

Agency Information

- UL Listed Special Purpose Fuse: Guide JFHR, File E56412
- CSA Certified Fuse: Class 1422- 02, File 53787
- CE compliance for the European Union low voltage directive

Other Ratings/Specifications

Watts Loss at rated current: STCF30: 3.99W
STCF60: 6.23W
STCF100: 9.51W

Operating and Storage Temperature Range

14 to 149°F(-10 to 65°C)

Material Specifications

- Case: Glass filled PES (Polyethersulfone)
- Terminals: Copper alloy
- Terminal plating: Electroless tin
- Indicator lens: PES (Polyethersulfone) (indicating version only)
- Indicator: Energetic chemical

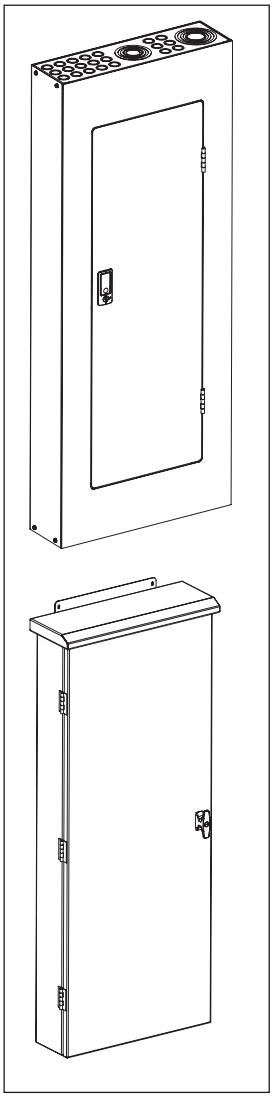
① SCCPB disconnect can accept CUBEFuses® with amp ratings less than or equal to the amp rating of the SCCPB disconnect.
② Correct fit with SCCPB disconnect requires indicating CUBEFuses® with date code R38 or later.

NEMA 1

- Flush or surface mount.
- Galvanized steel with removable end walls –blank or with knockouts to order.
- Box sizes: 20" W x 5.75" D x 33", 50", 59" or 69" H (510 W x 145 D x 838, 1270, 1500 or 1753mm H). Box can be rotated 180° to accommodate conduit feed.
- Enclosure and chassis mounting instructions are found in supplied literature.
- Chassis mounts directly onto studs in the enclosure.
- Trim finished with gray powder coat paint over phosphatized steel (ANSI 61).
- Door and door-in-door configurations with locks.
- Door locks use key #2A1910-2.
- Circuit directory card is located on the inside of the door.
- Trim screws are concealed.

NEMA 3R

- Surface mount only.
- Finished with gray powder coat paint over phosphatized steel (ANSI 61).
- Bottom feed only, no knockouts
- Box sizes: 20" W x 7.7" D x 34.5", 51.5", 60.5" or 70.5 H (510 W x 195 D x 876, 1310, 1535 or 1791mm H).
- Enclosure and chassis mounting instructions are found in supplied literature
- Chassis mounts directly onto studs in the enclosure.
- Gasketed door has vault handle with lock.
- Door locks use key #2A1910-1.
- Circuit directory card is located on the inside of the door.



Busing

Tin-plated copper with sufficient cross section to meet UL 67 temperature rise requirements.

Distributed 1- & 3-phase busing
All SCCPB branch disconnects can be mounted in any branch circuit position.
