According to HCS-2012 APPENDIX D TO §1910.1200

Version: 1.0/EN Product name: Rechargeable Li-ion Battery

Revision date: 11-Sept-2019 Printing date: 11-Sept-2019

1. Identification			
(a) Product identifier			
Product name:	Rechargeable Li-ion Battery		
(b) Other means of identifice	ation		
Product description:	Model: L617-1S1P-D Nominal Voltage: 3.65V Ampere-hour: 2.15Ah Typical Capacity: 2150mAh Weight: 46.0g Dimension: 22.0mm×66.7mm (D×T)		
(c) Recommended use of the	e chemical and restrictions on use		
Recommended use: Restriction on use:	LITHIUM ION BATTERIES. No information available.		
(d) Details of the supplier of	the product		
Company name(China) Address: E-mail: Telephone:	COMPUPAL (GROUP) CORPORATION No.1555 Jiashan Avenue, Jiashan, Zhejiang, (selina.j@compupal.com.cn +86-573-84669808	China	
(e) Emergency phone numbe +86-573-84669808			

2. Hazard(s) identification

(a) Classification of the chemical

This chemical is not considered hazardous by the 2012 OSHA Hazard Communication Standard (29 CFR 1910.1200). This product is an article which is a sealed battery and as such does not require an MSDS per the OSHA hazard communication standard unless ruptured. The hazards indicated are for a ruptured battery.

Acute toxicity - Oral	Category 4
Acute toxicity - Dermal	Category 4
Skin corrosion/irritation	Category 1 Sub-category B
Serious eye damage/eye irritation	Category 1
Carcinogenicity	Category 1A
Specific target organ toxicity (repeated exposure)	Category 1

(b) GHS Label elements, including precautionary statements

Signal word: Danger Hazard Statements Harmful if swallowed Harmful in contact with skin Causes severe skin burns and eye damage Causes serious eye damage

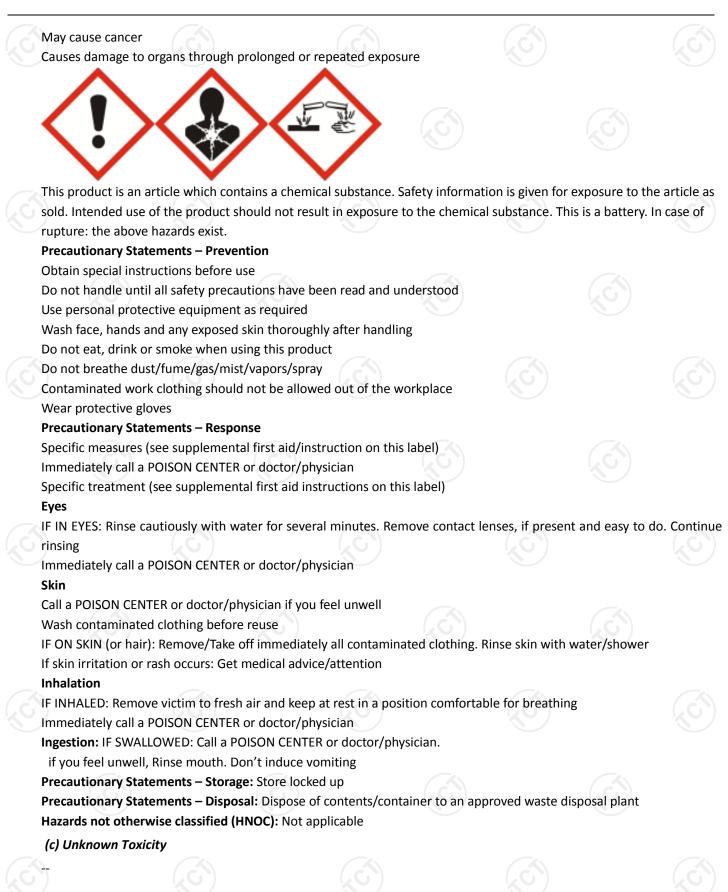

Emergency Overview

-- Page 1 / 11 --

According to HCS-2012 APPENDIX D TO §1910.1200

Version: 1.0/EN Product name: Rechargeable Li-ion Battery

Revision date: 11-Sept-2019 Printing date: 11-Sept-2019

- Page 2 / 11 -

According to HCS-2012 APPENDIX D TO §1910.1200

Version: 1.0/EN

Product name: Rechargeable Li-ion Battery

Revision date: 11-Sept-2019 Printing date: 11-Sept-2019

(d) Other information

Very toxic to aquatic life with long lasting effects; Repeated or prolonged skin contact may cause allergic reactions with susceptible persons. (e) Interactions with Other Chemicals

No information available.

3. Composition/information on ingredients

Chemical name	CAS No.	Concentration%
Lithium Cobalt Oxide (CoLiO2)	12190-79-3	38.5
Graphite powder	7782-42-5	21.5
Phosphate(1-), hexafluoro-, lithium	21324-40-3	21.7
Copper	7440-50-8	8.8
Aluminum	7429-90-5	3.4
Nickel	7440-02-0	3.6
PVC (Chloroethylene, polymer)	9002-86-2	2.5

4. First-aid measures

(a) Description of first aid measures

General Advice Eye contact: First aid is upon rupture of sealed battery.

Rinse immediately with plenty of water, also under the eyelids, for at least 15 minutes. Keep eye wide open while rinsing. Do not rub affected area. Remove contact lenses, if present and easy to do. Continue rinsing. Seek immediate medical attention/advice.

Skin contact:

Inhalation:

Self-protection of the first aider:

Wash off immediately with soap and plenty of water while removing all contaminated clothes and shoes. Immediate medical attention is required. May cause an allergic skin reaction. Remove to fresh air. If breathing has stopped, give artificial respiration. Get medical attention

immediately. Do not use mouth-to-mouth method if victim ingested or inhaled the substance; give artificial respiration with the aid of a pocket mask equipped with a one-way valve or other proper respiratory medical device. If breathing is difficult, (trained personnel should) give oxygen. Delayed pulmonary edema may occur. Get medical attention immediately if symptoms occur.

Do NOT induce vomiting. Rinse mouth immediately and drink plenty of water. Never give anything by mouth to an unconscious person. Call a physician or poison control center immediately.

Avoid contact with skin, eyes or clothing. Use personal protective equipment as required. Wear personal protective clothing (see section 8).

(b) Most important symptoms/effects, acute and delayed

Most important symptoms and effects:

Itching. Coughing and/ or wheezing. Burning sensation.

(c) Indication of any immediate medical attention and special treatment needed

Notes to Physician

Product is a corrosive material. Use of gastric lavage or emesis is contraindicated. Possible perforation of stomach or esophagus should be investigated. Do not give chemical antidotes.

According to HCS-2012 APPENDIX D TO §1910.1200

Version: 1.0/EN Product name: Rechargeable Li-ion Battery

Revision date: 11-Sept-2019 Printing date: 11-Sept-2019

Asphyxia from glottal edema may occur. Marked decrease in blood pressure may occur with moist rales, frothy sputum, and high pulse pressure. May cause sensitization of susceptible persons. Treat symptomatically.

5. Fire-fighting measures

(a) Extinguishing media

Suitable extinguishing media: Unsuitable extinguishing media: Use foam, dry powder or dry sand, CO₂ as appropriate. No information available.

(b) Special hazards arising from the chemical

Under fire conditions, batteries may burst and release hazardous decomposition products when exposed to a fire situation. This could result in the release of flammable or corrosive materials. Hazardous combustion products: CO, CO₂, Metal oxides, Irritating fumes

(c) Special protective equipment and precautions for fire-fighters

Firefighters must wear fire resistant protective equipment and appropriate breathing apparatus. The staff must equip with filtermask (full mask) or isolated breathing apparatus. The staff must wear the clothes which can defense the fire and the toxic gas. Put out the fire in the upwind direction. Remove the container to the open space as soon as possible. Spray water on the containers in the fireplace to keep them cool until finish extinguishment.

6. Accidental release measures

(a) Personal precautions, protective equipment and emergency procedures

Personal Precautions

Other Information (b) Environmental Precautions Environmental Precautions Attention! Corrosive material. Avoid contact with skin, eyes or clothing. Ensure adequate ventilation. Use personal protective equipment as required. Evacuate personnel to safe areas. Keep people away from and upwind of spill/leak.

Refer to protective measures listed in Sections 7 and 8.

Refer to protective measures listed in Sections 7 and 8. Prevent further leakage or spillage if safe to do so. Should not be released into the environment. Do not allow to enter into soil/subsoil. Prevent product from entering drains.

(c) Methods and materials for containment and cleaning up

Methods for Containment Methods for cleaning up Prevent further leakage or spillage if safe to do so.Pick up and transfer to properly labeled containers.

7. Handling and storage

(a) Precautions for safe handling

Always follow the warning information on the batteries and in the manuals of devices. Only use the recommended battery types. Keep batteries away from children. For devices to be used by children, the battery casing should be protected against unauthorized access. Unpacked batteries shall not lie about in bulk. In case of battery change always

Version: 1.0/EN Product name: Rechargeable Li-ion Battery

replace all batteries by new ones of identical type and brand. Do not swallow batteries. Do not throw batteries into water. Do not throw batteries into fire. Avoid deep discharge. Do not short-circuit batteries Use recommended charging time and current.

(b) Conditions for safe storage, including any incompatibilities

If the Lithium-ion Battery is subject to storage for such a long term as more than 3 months, it is recommended to recharge the Lithium-ion Battery periodically. Operating temperature: Charge:0°C~45°C. Discharge: -20°C~60°C And recommended at -20°C~45°C for 1 month storage, at -20°C~35°C for 3 months storage. The capacity recovery rate in the delivery state (50% capacity of fully charged) after storage is assumed to be 80% or more. The voltage for a long time storage shall be 3.7V~4.2V range. Do not storage Lithium-ion Battery haphazardly in a box or drawer where they may short-circuit each other or be short-circuited by other metal objects. Keep containers tightly closed in a dry, cool and well-ventilated place. Protect from moisture. Store locked up. Keep out of reach of children.

8. Exposure controls/personal protection

(a) Waste treatment methods

Disposal methods

This material, as supplied, is not a hazardous waste according to Federal regulations (40 CFR 261). This material could become a hazardous waste if it is mixed with or otherwise comes in contact with a hazardous waste, if chemical additions are made to this material, or if the material is processed or otherwise altered. Consult 40 CFR 261 to determine whether the altered material is a hazardous waste. Consult the appropriate state, regional, or local regulations for additional requirements.

Contaminated Packaging

Dispose of contents/containers in accordance with local regulations

14. Transport information

Note:		Civil Aviation C Maritime Dang batteries must the requireme Association Da Department of lithium batteri December 15, Lithium Batter Lithium batter equipment", o "Dangerous Go	The transportation of primary lithium cells and batteries is regulated by the International Civil Aviation Organization, International Air Transport Association, International Maritime Dangerous Goods Code and the US Department of Transportation. The batteries must meet the following criteria for shipment: 1. Air shipments must met the requirements listed in Special Provision A45 of the International Air Transport Association Dangerous Goods Regulations. 2. Meet the requirements for the US Department of Transportation listed in 49 CFR 173.185. 3. The transport of primary lithium batteries is prohibited aboard passenger aircraft. Refer to the Federal Regise December 15, 2004 (Hazardous Materials; Prohibited on the Transportation of Primary Lithium Batteries and Cells Aboard Passenger Aircraft; Final Rule) Lithium batteries shipped as "Lithium batteries", "Lithium batteries packed with equipment", or "Lithium batteries contained in equipment" may not be classified as "Dangerous Goods" when shipped in accordance with "special provision A45 of IATA-DGR" or "special provision 188 of IMO-IMDG Code"

(c) Disclaimer

Because all of our batteries are defined as "articles", they are exempted from the requirements of the Hazard Communication Standard. The information in this SDS is provided all the relevant data fully and truly. However, the information is provided without any warranty on their absolute extensiveness and accuracy. This SDS was prepared to provide safety preventive measures for the users who have got professional training. The personal user who obtained this SDS should make independent judgment for the applicability of this SDS under special conditions. In these special cases, we do not assume responsibility for the damage.
