

PROLINE™ WINDOW & DOOR INSULATING FOAM SEALANT

All PowerSeal® Foams comes on a 12PK branded case.

ProLine™ POWERSEAL® minimal expansion Insulating Polyurethane Foam is formulated to fill, insulate and deaden sound around the house or during building construction. Can be used to fill in gaps and voids, window and door installation around the frames, insulation of pipes or any DIY application. This very low-expanding foam improves energy-efficiency with an R factor of 4-5 for each inch of foam in place, creating an airtight, weather resistant bond that seals out drafts and blocks insects and pests.

- Formulated to fill and insulate around doors and windows without creating any distortion around the frame.
- Excellent adhesion on most materials (except PE/PP, Silicone, Teflon).
- Weather resistant closed cell formulation – Will not shrink during freeze or thaw cycles.
- High thermal insulation and sound absorption.
- Works at ambient temperature between -20°C (-4°F) to 40°C (104°F).
- Can be cut, sanded or painted approximately 1 hour after application.
- Tack free in less than 6 minutes.
