Cost in Use

An important factor to consider when purchasing a product is the "cost in use". Comparing the liter's prices is not a good indication of the final price paid. The formula to obtain the cost in use is as follows:

(Price / Litre) / Total Parts From Dilution = Cost in Use

Here's an example:

Dilution	Price	Format
1:80	$15.00	4 L

$15.00 / 4 L = 3.75 / 81 = $0.046
